Knowledge for a Sustainable World

The search for answers to the issue of global sustainability has become increasingly urgent. In the context of higher education, many universities and academics are seeking new insights that can shift our dependence on ways of living that rely on the exploitation of so many and the degradation of so much of our planet. This is the vision that drives SANORD and many of the researchers and institutions within its network. Although much of the research is on a relatively small scale, the vision is steadily gaining momentum, forging dynamic collaborations and pathways to new knowledge. The contributors to this book cover a variety of subject areas and offer fresh insights about chronically under-researched parts of the world. Others document and critically reflect on innovative approaches to cross-continental teaching and research collaborations. This book will be of interest to anyone involved in the transformation of higher education or the practicalities of cross-continental and cross-disciplinary academic collaboration. The Southern African-Nordic Centre (SANORD) is a network of higher education institutions from Denmark, Finland, Iceland, Norway, Sweden, Botswana, Namibia, Malawi, South Africa, Zambia and Zimbabwe. Universities in the southern African and Nordic regions that are not yet members are encouraged to join.

This is a book about the variegated frontlines of value within an uneven, but not random, geography of capitalist expansion.

Teppo, 2021-12-16 Urban Africa is undergoing a transformation unlike anywhere else in the world as unprecedented numbers of people migrate to rapidly expanding cities But despite the growing body of work on urban Africa the lives of these new city dwellers have received relatively little attention particularly when it comes to crucial issues of power and inequality This interdisciplinary collection brings together contributions from urban studies geography and anthropology to provide new

insights into the social and political dynamics of African cities as well as uncovering the causes and consequences of urban inequality Featuring rich new ethnographic research data and case studies drawn from across the continent the collection shows that Africa's new urbanites have adapted to their environs in ways which often defy the assumptions of urban planners By examining the experiences of these urban residents in confronting issues of power and agency the contributors consider how such insights can inform more effective approaches to research city planning and development both in Africa and beyond

Hierarchies of Power Imam Ardianto, 2022-04-11 This book focuses on a Pentecostal Evangelical Kenyah community in central Borneo a region that crosses the border between Malaysia and Indonesia The book argues that the Pentecostal Evangelical Pentecostal mode of religious authority and organization has the capacity to adapt to both the pre-existing hierarchical traditional institution such as Adat and modern egalitarian social forms It has been necessary within the context of Kenyah's experience of religious change as it enabled many actors from various social classes to obtain and perceive religious authority in a specific local and regional political religious situation while promoting their identity as egalitarian and autonomous modern subjects In contrast with other studies on the Pentecostal church that emphasize its egalitarian spirit as a factor that supports its impressive growth the book contends that its adaptive structural characteristics have enabled the development of this specific Christian denomination to expand rapidly and play a dominant position in contemporary social life in various parts of the world The book thus provides novel findings in the study of religious change in Southeast Asia by enriching the discussion of historical transformation in the region and analyzing the articulation of global and regional Christian movements with the socio-political characteristics of Bornean society
