Land Law and Urban Policy in Context Thanos Zartaloudis, 2016-10-14 This book is a collection of essays honouring and engaging with the work of the late Professor Patrick McAuslan. It is a collection that narrates analyses and critiques McAuslan's contributions as well as offering substantive perspectives on how his work has impacted the legal fields in which he was involved including those of land law, urban planning law and policy, land use and participation in developing countries, democratic constitutionalism and legal education. The essays present McAuslan's contributions in the contexts in which they emerged and according to both the circumstances and motivations that shaped them as well as the challenges they encountered. It thus provides an ideal point of engagement for scholars, students and policy makers that have already interacted with McAuslan's ideas and work or who have yet to do so.

Authentic University Lawrence Muganga Ph.D., 2022-08-22 Today's universities fail students leaving them stranded in an alien world that differs markedly from the ivory tower institution that ostensibly molded them for the future. The Authentic University proposes to overcome the manifold shortcomings of the contemporary postsecondary school by offering an innovative education that corresponds to the realities of the modern era. This university blends three distinct concepts of student-centered education to provide students with a personalized learning experience that develops distinct skills and competencies required by today's employers. Students can save time, money and effort while learning the information and applications that they want and need. Contained within the covers of this groundbreaking book lies a thorough description of everything that educational stakeholders must know about the Authentic University including supporting literature and practical models alongside strategies for planning and implementation. The world has passed the university by and will not wait for education to keep pace with its ever-evolving information and communication technology situated in an increasingly entrepreneurial economy. We as educational stakeholders must meet the challenge of change in an urgent way. The first step toward bringing the university into the modern era begins with this book, the manual for a radically new type of education termed the Authentic University.

The Development of Tertiary Education in the Eastern African Region Isabella M. Musyoka-Kamere, Daniel Namusonge Sifuna, Kisilu Kombo, 2023-11-16 This book gives a riveting account of the higher education advancements made in five East African countries, each presenting unique characteristics. While some of the countries enjoyed relative calm throughout their years of growth and development, others have endured a turbulent past marked by civil war, coups and other forms of unrest, including one of the most atrocious genocide events ever recorded in the history of mankind. It is a known fact that the past defines the present and describes the future. The book specifically tracks the historical development of teacher education, technical and vocational education and training and university education in Kenya, Uganda, Tanzania, Rwanda and Burundi. The extensive research and up-to-date accounts provide a rich overview of tertiary education in the five countries with candid reviews of the past, the current situation and perspectives on the future. The book is a refreshing addition to the books of

history and education and a must read for students professionals and policy makers in the field of higher education as well as scholars of history

The Paris Framework for Climate Change Capacity Building Mizan R Khan, J. Timmons Roberts, Saleemul Huq, Victoria Hoffmeister, 2018-04-09 The Paris Framework for Climate Change Capacity Building pioneers a new era of climate change governance performing the foundational job of clarifying what is meant by the often ad hoc one off uncoordinated ineffective and unsustainable practices

of the past decade described as capacity building to address climate change As an alternative this book presents a framework on how to build effective and sustainable capacity systems to meaningfully tackle this long term problem Such a reframing of capacity building itself requires means of implementation The authors combine their decades long experiences in climate negotiations developing climate solutions climate activism and peer reviewed research to chart a realistic roadmap for the implementation of this alternative framework for capacity building As a result this book convincingly makes the case that universities as the highest and sustainable seats of learning and research in the developing countries should be the central hub of capacity building there This will be a valuable resource for students researchers and policy makers in the areas of climate change and environmental studies *Higher Education in Sub-Saharan Africa in the 21st Century* Ben Kei

Daniel,Ronald Bisaso,2023-07-08 This book contributes to the understanding of regional and global perspectives on the development and challenges the higher education sector in sub Saharan Africa faces in the era of globalization It focuses on the critical aspects of the higher education sector in the Global South with a particular emphasis on sub Saharan Africa It brings together empirical theoretical and philosophical perspectives from researchers in some of the leading universities in sub Saharan Africa The book highlights the higher education sector s stages of growth and development and the contemporary challenges it faces in aligning its goals and capacity globally and maintaining its image and public identity locally This book covers neoliberal educational reforms leadership and governance pedagogy technology the global knowledge economy and digital advancement It delves into how the nature and practice of learning teaching research and community engagement as core functions of higher education are re oriented to contribute to societal transformation in Africa Further the book discusses the implications of contemporary issues in higher education internationalization employability leadership and management and accountability and autonomy in teaching research and community engagement *Research Universities in Africa* Cloete, Nico,Bunting, Ian,2018-11-09 From the early 2000s a new discourse

emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has

benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa

Research and Discussions in Critical Discourses and Remedies in Global Health Education Ashti A. Doobay-Persaud, Tracy L. Rabin, Tomlin Paul, Jessica Evert, Benedicta Ayiedu Mensah, 2024-10-01 Global Health a field of study research and practice defined in 2009 with precursors in international health and development is currently reckoning with itself The field has well intended goals emphasizing collaboration and dialogue between population health public health clinical care and other disciplines to address socioeconomic determinants of health and employing interdisciplinary approaches to address health inequities wherever they exist Despite these lofty ideals there are concerns that the field itself has historically served to reinforce rather than deconstruct colonialism and power imbalances At this point in time the field has evolved toward a vision of a community of practice between institutions across the income spectrum HIC LMIC LIC working in bidirectional and multidirectional ways to develop staff space systems and strategies to eliminate health disparities However with deeply rooted colonial assumptions racism elitism and other forms of bias underlying institutions and individuals initiatives operating under the auspices of Global Health are all too often antithetical to the pursuit itself
