Defeating the Dictators Charles Dunst,2023-02-02 Charles Dunst s deeply researched timely and powerful book offers a blueprint for how democracies should fight back Sir Kim Darroch Remarkable A thoughtful and perceptive book Rt Hon Jeremy Hunt MP The world is currently experiencing the lowest levels of democracy we have seen in over thirty years Autocracy is on the rise and while the cost of autocracy seems evident it nevertheless remains an attractive option to many While leaders like Viktor Orb n disrupt democratic foundations from within autocrats like Xi Jinping and Vladimir Putin do so from abroad eroding democratic institutions and values and imperilling democracies that appear increasingly fragile There are even those who disillusioned with the current institutions in place increasingly think authoritarianism can deliver them a better life than democracy has or could They re wrong Autocracy is not the solution better democracy is But we have to make the case for it We have to combat institutional rot by learning from one another and at times from our rivals And we have to get our own houses in order Only then can we effectively stand up for democratic values around the world and defeat the dictators *Teaching Political Science to Undergraduates* Laure Paquette,2016-01-15 By 2020 half of the world s population and most university students will have a supercomputer in their pockets This revolution will affect the way students respond to higher education The university classroom must henceforth engage students and the classic lecture format alone might not be enough to do so This book answers the question how university students can learn in the classroom what they cannot learn in any other way The answer is inspired by options that are not available to political scientists in the way that they are in the laboratories for the sciences in the performances for the live arts and in the studios for visual arts as well as ideas that are already present but not widespread in the discipline problem solving and case studies as in the professional schools and simulation exercises in many other disciplines This book proposes therefore an active pedagogy for political science at a time when active pedagogy is more important than ever Prof Laure Paquette PhD has been a visiting researcher or professor in 23 countries She has advised several foreign governments as well as her own Canada and has published extensively in four languages This is her sixteenth book
