Practitioner's Guide to Global Investigations Judith Seddon, 2018-01-19 There has never been a greater likelihood a company and its key people will become embroiled in a cross border investigation. But emerging unscarred is a challenge. Local laws and procedures on corporate offences differ extensively and can be contradictory. To extricate oneself with minimal cost requires a nuanced ability to blend understanding of the local law with the wider dimension and in particular to understand where the different countries showing an interest will differ in approach, expectations or conclusions. Against this backdrop, GIR has published the second edition of *The Practitioner's Guide to Global Investigation*. The book is divided into two parts with chapters written exclusively by leading names in the field. Using US and UK practice and procedure, Part I tracks the development of a serious allegation, whether originating inside or outside a company, looking at the key risks that arise and the challenges it poses along with the opportunities for its resolution. It offers expert insight into fact gathering, including document preservation and collection, witness interviews, structuring the investigation, the complexities of cross border privilege issues and strategising effectively to resolve cross border probes and manage corporate reputation. Part II features detailed comparable surveys of the relevant law and practice in jurisdictions that build on many of the vital issues pinpointed in Part I.

Manufactured Crisis James Simpson, 2024-09-24 Few could have imagined ten years ago where we would be in America today. We are confronted on all sides by interminable crises that threaten the very fabric of our nation: from a border flooded with millions of migrants from all over the world to a fentanyl crisis killing more American youths every year than the past three wars combined. Radical transgender activism and other cultural insanity has pushed more youths to commit suicide than at any other time in history. It seems as though the world is rapidly coming unglued. But it is actually a diabolical plan that has been operating for over a hundred years and is now showing its face. This book describes this plan in excruciating detail and shows us a path out if we're willing to take it.

Expulsions Saskia Sassen, 2014-05-05 Income inequality, displaced and imprisoned populations, destruction of land and water: today's dislocations cannot be understood in the usual terms of poverty and injustice. Saskia Sassen argues they are more accurately understood as expulsions from professional livelihood, from living space, from the very biosphere that makes life possible.

The BRICs Superpower Challenge Kwang Ho Chun, 2016-03-23 In an imaginative and interesting way, Kwang Ho Chun seeks to capture the dynamics of the changing international system and the prospects for a change in the international distribution of power. The idea that new superpowers could rise and that some of the BRICs (Brazil, Russia, India, and China) could be such superpowers is particularly intriguing and the main idea explored in this study. In line with neo-realist approaches, this book argues that in a unipolar world, competitors

will rise to challenge the global hegemon As the power profiles of the BRICs rise and they gain greater control of geo global politics they are likely to attain significant regional dominance among other regional powers although their underdeveloped tradition of hard power and internal challenges could prevent them from gaining superpower status This book captures the dynamics of the changing international system and the prospects for a change in the international distribution of power

Human Rights Trade-Offs in Times of Economic Growth Areli Valencia,2016-11-03 This book uncovers a historical dependency on smelting activities that has trapped inhabitants of La Oroya Peru in a context of systemic lack of freedom La Oroya has been named one of the most polluted places on the planet by the US Blacksmith Institute Residents face the dilemma of whether to defend their health or to preserve job stability at the local smelter the main source of toxic pollution in town Valencia unpacks this paradoxical human rights trade off This context shaped by social historical political and economic factors increases people s vulnerabilities and decreases their ability to choose resulting in residents trading off their right to health in order to work This book shows the deep connection of this local dilemma to the country s national paradox arising out of Peru s vision of natural resource extraction as the main path to secure economic growth for the entire country at the expense of some groups

Governing Under Stress Timothy J. Conlan,Paul L. Posner,Priscilla M. Regan,2017 The underappreciated but surprisingly successful implementation of the American Recovery and Reinvestment Act ARRA helped rescue the economy during the Great Recession and represented one of the most important achievements of the Obama presidency It tested all levels of government with urgent time frames and extensive accountability requirements While ARRA passed most tests with comparatively little mismanagement or fraud negative public and media perceptions of the initiative deprived the president of political credit Drawing on more than two hundred interviews and nationwide field research *Governing under Stress* examines a range of ARRA stimulus programs to analyze the fraught politics complex implementation and impact of the legislation Essays from public administration scholars use ARRA to study how to implement large federal programs in our modern era of indirect networked governance Throughout the contributors present potent insights into the most pressing challenges facing public policy and management and they uncover important lessons about policy instruments and networks the effects of transparency and accountability and the successes and failures of different types of government intervention

The Profiteers Sally Denton,2017-02-14 The tale of the Bechtel family dynasty is a classic American business story It begins with Warren A Dad Bechtel who led a consortium that constructed the Hoover Dam From that auspicious start the family and its eponymous company would go on to build the world from the construction of airports in Hong Kong and Doha to pipelines and tunnels in Alaska and Europe to mining and energy operations around the globe Today Bechtel is one of the largest privately held corporations in the world enriched and empowered by a long history of government contracts and the privatization of public works made possible by an unprecedented revolving door between its San Francisco

headquarters and Washington Speaking Truth to Power Ginsberg, Benjamin, Paschall, Collin, 2022-09-06 Truth and power have a difficult relationship Decision makers are often required to make judgements that depend upon specialized knowledge and thus reluctantly surrender power They are apt to reject advice inconsistent with their perceived interests experiences and cognitive capacities Speaking Truth to Power aims to guide the reader through the tangled relationship between truth and power manifesting as the interplay between experts and decision makers in society **Oversight of DOE's Strategy for the Management and Disposal of Used Nuclear Fuel and High-level Radioactive Waste** United States.
