Delusions of Competence Robin Pearson, 2022-02-09 This book examines the crisis at the famous insurance market Lloyd's of London during the late twentieth century which nearly destroyed the 300 year old institution While rapid structural change resulting from system collapse is less common in insurance than in the history of other financial services one exception was the Lloyd's crisis Hitherto explanations of the crisis have focused on the effects of catastrophic losses and poor governance By drawing on contemporary accounts of the crisis the author constructs the first comprehensive scholarly analysis of the public and political response The book applies theoretical concepts from behavioural economics and economic psychology to argue that multiple delusions of competence were at work both within and outside the Lloyd's market Arrogance elitism and defence of vested interests comprised endogenous elements of the crisis Entrenched ideas about the

virtues of self regulation and faith in insider experts also played a role The result was a misdiagnosis by both insiders and politicians of what ailed Lloyd s and a series of reforms that failed to address the underlying causes of its disease This book offers a salutary lesson from recent history about the importance of the transparency accountability and effective monitoring of financial institutions It is of interest to academics and students of economic and financial history business insurance political economy and history
