Boge Compressor Air Manual:

Energy Efficiency in Industry Markus Blesl, Alois Kessler, 2022-01-01 This book quantifies the potential for greater energy efficiency in industry on the basis of technology and sector related analyses Starting from the methodological fundamentals the first part discusses the electricity and heat based basic technologies and cross sectional processes on the basis of numerous application examples In addition to classic topics such as lighting and heat recovery the study also covers processes that have received less attention to date such as drying and painting The second part is devoted to energy intensive industries in particular metal production and processing the manufacture of the non metallic materials cement and glass and the chemical paper plastics and food industries Both parts are concluded by placing them in a larger energy and economic context The findings are condensed into checklists at many points and summarized in the overall view at the end to form generally applicable recommendations This book is a translation of the original German 2nd edition *Energieeffizienz in der Industrie* by Markus Blesl and Alois Kessler published by Springer Verlag GmbH Germany part of Springer Nature in 2017 The translation was done with the help of artificial intelligence machine translation by the service DeepL.com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors

Energy Management in Plastics Processing Robin Kent, 2018-07-06 *Energy Management in Plastics Processing Strategies Targets Techniques and Tools* Third Edition addresses energy benchmarking and site surveys how to understand energy supplies and bills and how to measure and manage energy usage and carbon footprinting The book's approach highlights the need to reduce the kWh/kg of materials processed and the resulting permanent reductions in consumption and costs Every topic is covered in a 2 page spread providing the reader with clear actions and key tips for success This revised third edition covers new developments in energy management power supply considerations automation assembly operations water footprinting and transport considerations and more Users will find a practical workbook that not only shows how to reduce energy consumption in all the major plastics shaping processes moulding extrusion forming but also provides tactics that will benefit other locations in plants e.g. in factory services and nonmanufacturing areas Enables plastics processors in their desire to institute an effective energy management system both in processing and elsewhere in the plant Provides a holistic perspective shining a light on areas where energy management methods may have not been previously considered Acts as a roadmap to help companies move towards improved sustainability and cost savings
