Bomb Scare By Cirincione Joseph Columbia University Press 2008 Paperback:

Desiring the Bomb Calum Lister Matheson, 2018-11-13 A timely interdisciplinary study that applies psychoanalysis and the rhetorical tradition of the sublime to examine the cultural aftermath of the Atomic Age Every culture throughout history has obsessed over various end of the world scenarios The dawn of the Atomic Age marked a new twist in this tale For the first time our species became aware of its capacity to deliberately destroy itself Since that time the Bomb has served as an organizing metaphor a symbol of human annihilation a stand in for the unspeakable void of extinction and a discursive construct that challenges the limits of communication itself The parallel fascination with and abhorrence of nuclear weapons has metastasized into a host of other end of the world scenarios from global pandemics and climate change to zombie uprisings and asteroid collisions **Desiring the Bomb** Communication Psychoanalysis and the Atomic Age explores these world ending fantasies through the lens of psychoanalysis to reveal their implications for both contemporary apocalyptic culture and the operations of language itself What accounts for the enduring power of the Bomb as a symbol What does the prospect of annihilation suggest about language and its limits Thoroughly researched and accessibly written this study expands on the theories of Kenneth Burke Jacques Lacan Sigmund Freud and many others from a variety of disciplines to arrive at some answers to these questions Calum L Matheson undertakes a series of case studies including the Trinity test site nuclear war games urban shelter schemes and contemporary survivalism and argues that contending with the anxieties individual social cultural and political born of the Atomic Age depends on rhetorical conceptions of the real an order of experience that cannot be easily negotiated in language Using aspects of media studies rhetorical theory and psychoanalysis the author deftly engages the topics of Atomic Age survival extinction religion and fantasy along with their enduring cultural legacies to develop an account of the Bomb as a signifier and to explore why some Americans have become fascinated with fantasies of nuclear warfare and narratives of postapocalyptic rebirth **Weapons of Mass Destruction** Michael Kort, 2010 Presents a guide to the issues of weapons of mass destruction including definitions primary sources case studies research tools organizations and notable persons **The Search for Truth** Maxwell Bennett, 2022-05-01 Universities have searched for truth over nearly a millennium Maxwell Bennett recounts the history of this search during three of its most momentous periods in the 13th 18th and 20th centuries which helped fashion the idea of a university He concludes with a cautionary assessment of whether universities given their present level of material support can reliably continue to protect and advance society **Arms for Uncertainty** Professor Stephen J Cimballa, 2013-11-28 Nuclear weapons are here to stay They have survived into the twenty first century as instruments of influence for the US Russia and other major military powers But unlike the Cold War era future nuclear forces will be developed and deployed within a digital driven world of enhanced conventional weapons As such established nuclear powers will have smaller numbers of nuclear weapons for the purpose of deterrence working in parallel with smarter conventional weapons and elite military personnel The challenge is to agree

proportional reductions in nuclear inventories or abstinence requiring an effective nonproliferation regime to contain aspiring or threshold nuclear weapons states This is the most comprehensive view of nuclear weapons policy and strategy currently available The author's division of the nuclear issue into the three ages is a never seen before analytical construct With President Obama reelected the reduction and even elimination of nuclear weapons will now rise to the top of the agenda once more Moreover given the likelihood of reductions in US defense spending the subject of the triad which is covered in Chapter One will no doubt be an important subject of debate as will the issue of missile defense covered in Chapter 10 This book provides an excellent analysis of the spread of nuclear weapons in Asia and the Middle East and the potential dangers of a North Korean or Iranian breakout subjects that dominate current policy debates **On Endings** Daniel

Grausam, 2011-08-03 What does narrative look like when the possibility of an expansive future has been called into question This query is the driving force behind Daniel Grausam's *On Endings* which seeks to show how the core texts of American postmodernism are a response to the geopolitical dynamics of the Cold War and especially to the new potential for total nuclear conflict Postwar American fiction needs to be rethought he argues by highlighting postmodern experimentation as a mode of profound historical consciousness In Grausam's view previous studies of fiction mimetically concerned with nuclear conflict neither engage the problems that total war might pose to narration nor take seriously the paradox of a war that narrative can never actually describe Those few critical works that do take seriously such problems do not offer a broad account of American postmodernism And recent work on postmodernism has offered no comprehensive historical account of the part played by nuclear weapons in the emergence of new forms of temporal and historical experience *On Endings* significantly extends the project of historicizing postmodernism while returning the nuclear to a central place in the study of the Cold War **Uranium** Chetan Bisariya, 1982 Professional Journal of the United States Army, 2015 Daily Life in
