controversies in the twenty first century Advances in digital technology raise pressing questions regarding freedom of speech and with it intellectual property and privacy rights Campaign finance reform limits the formerly sacrosanct category of political speech Expressive liberties may face their greatest challenge from government efforts to thwart terrorism The twelve legal scholars and philosophers whose work appears in this volume examine the history of free speech doctrine its relevance to other social and personal values and the radical critiques it has withstood in recent years *The Intellectual Property of Nations* Laura R. forward Higher Education and Capacity Building in Africa contests such universalistic notions Inspired by ideas about the geography of scientific knowledge it explores what role specific places and relationships have in knowledge production and analyses how cultural experiences are included and excluded in teaching and research Thus the different chapters show how what constitutes legitimate scientific knowledge is negotiated and contested In doing so the chapters draw on discussions about the hegemony of Western thought in education and knowledge production The authors own experiences with higher education capacity building and knowledge production are discussed and used to contribute to the reflexive turn and rise of auto ethnography This book is a valuable resource for researchers and postgraduate students in education development studies African studies and human geography as well as anthropology and history **Arguing About Law** Aileen
