**School Science Practical Work in Africa** Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and post graduate students in the fields of science education and educational policy.

**Trends and Challenges of Medical Education in the Changing Academic and Public Health Environment of the 21st Century** Mainul Haque, Mohammed S. Razzaque, Md Anwarul Azim Majumder, 2023-04-20

**Education and the UN Sustainable Development Goals** Kim Beasy, Caroline Smith, Jane Watson, 2023-11-02 This book focuses on the complex relationship between education and the Sustainable Development Goals (SDGs) and highlights how important context is for both critiquing and achieving the Goals. Though education given the critical role teachers, schools and curriculum play in young people's lives. Readers will find examples of thinking and practice across the spectrum of education and training sectors, both formal and informal. The book adds to the increasing body of literature that recognises that education is and must be in its praxis at the heart of all the SDGs. As we enter the third decade of the 21st century, we have a clear understanding of the wicked and complex crises regarding the health of life on our planet and we cannot ignore the high levels of anxiety our young people are experiencing about their future. Continuing in the direction of unsustainable exploitation of people and nature is no longer an option if life is to have a flourishing future. The book illustrates how SDGs are supported in and by education and training, showcasing the conditions necessary to ensure SDGs are forefronted in policy reform. It includes real world examples of SDGs in education and training contexts as well as novel critiques of the SDGs in regard to their privileging of anthropocentrism and neoliberalism. This book is beneficial to academics, researchers, post graduate and tertiary students from all fields relating to education and training. It is also of interest to policy developers from across disciplines and government agencies who are interested in how the SDGs relate to education.
