Budget Speech Year 2015 2016 Of Sa:

Local Government Finance Dirk Brand, 2016-05-22 Local Government Finance does not follow the conventional operational approach to local government finance which typically focuses on issues such as revenue collection budgeting performance auditing and accounting and debt administration Instead it offers a broader systemic and multi level perspective by assessing the governance model of local government finance For this purpose the authors compare and contrast the South African model with the international experience The publication thus makes a significant contribution to analysts and scholars in their sense making and knowledge production endeavours in this field **The Geography of South Africa**

Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South **The Report: South Africa 2013** Oxford Business

Group, 2013-09-04 The Rainbow Nation benefits from an internationally competitive private sector which accounts for roughly 70% of GDP and extremely competitive infrastructure its utility sector for example produces just under half of the total power generated on the African continent South Africa represents by far the most developed market in Africa but there are still some structural challenges it is grappling with Government strategies have set a target of increasing labour market participation from 54% in 2010 to 65% by 2030 bringing the number of workers in the formal sector to 25.3m people and lowering unemployment from 25% to 6% While its fiscal space is narrow long term investments in infrastructure education and health are expected to be key to attaining its growth potential Recent years have seen both the public and private sectors look to strengthen regulatory frameworks in mining and industry in some cases like the automotive sector with impressive results **The Report: South Africa 2014** Oxford Business Group, 2014-12-08 Indeed since the end of apartheid in 1994

South Africa has become a major diplomatic player both on the African continent as well as further afield Despite the size of South Africa's economy the country currently faces a number of major economic challenges As of the end of July 2014 the unemployment rate was at 25.5% according to data from Statistics South Africa which was among the highest in the world While the government's long term development plans are generally highly regarded delivery and execution has occasionally been problematic While there are major hurdles that must be cleared given the country's strong institutions and the rapid pace of economic expansion over the past two decades South Africa should be able to look forward to 20 more years of peace and steady sustained economic growth **#FeesMustFall and Youth Mobilisation in South Africa** Musawenkosi

Ndlovu,2017-07-14 Cover Title Copyright Contents Preface Introduction and rationale 1 The view of South African youth before FeesMustFall 2 Were the 2015 student protests a revolution 3 What the 2015 protests actually were and how they were possible 4 Ikohlisan ihlomile FMF students engagement with power and their ideological differences 5 Can South Africa s declining economy inspire student led new revolution 6 Youth s declining news consumption levels and ideologically divided media 7 Youth s polysemic interpretation of the ANC regime and the limits of the new revolution 8 Youths declining participation levels in the public sphere the constraints of new revolution 9 Conclusion FMF protests will not lead to a revolution per se at least not yet but to wide ranging reforms References Index **South Africa** International Monetary Fund. African Dept.,2017-07-06 This 2017 Article IV Consultation highlights that South Africa s vulnerabilities have become more pronounced and are set to increase further unless economic growth revives Following near standstill in economic activity in 2016 growth is projected to increase to 1 0 percent in 2017 and 1 2 percent in 2018 The current account deficit is projected to decline to 3 percent of GDP in 2017 boosted by mining and agricultural exports Consumer price inflation recently returned below 6 percent owing in part to the easing of the drought and is projected to remain marginally below the upper threshold of the 3 6 percent target band for the remainder of 2017 and in 2018 *Greening the South African Economy* Mark Swilling,Josephine Kaviti Musango,Jeremy Wakeford,2016-02-23 The depletion of South Africa s and in some cases the world s natural resources and the degradation of environmental sinks including the atmosphere lakes and rivers and land are continuing at such a rate that natural resource prices are climbing and many critical ecosystem services that underpin human welfare are increasingly threatened The concept of the green economy has gained increasing traction in South African policy discourses over the past few years However in much of this discourse it is viewed in a piecemeal way as one part or sector of the economy e g an industrial sector dealing with manufacture and installation of renewable energy technologies and energy efficient equipment and appliances In the view of the authors greening the South African economy requires an application of sustainability principles and practices across the full range of primary secondary and tertiary sectors of the economy in an integrated manner The aim of this book is therefore to apply principles of sustainability and green economics to the entire South African socio economic system and its major elements in an integrated and comprehensive manner The Political Economy of Mental Illness in South Africa André J van Rensburg,2021-02-17 The book describes key socio political reforms that helped shape post apartheid South Africa s mental health system The author interrogates how reforms shaped public community based services for people living with severe mental illness and how features of this care has been determined in part at least by the relations between actors and structures in the state private for profit health care and civil society spheres A description of the development of South Africa s post apartheid health system and the contentions that emerge therein sets the stage for an analysis of the country s most tragic human rights failure during its democratic period namely the Life Esidimeni tragedy The roots of the tragedy are not only framed as a loss

of life and dignity as a result of political corruption and administrative mismanagement but as a power differential that ultimately highlights an unjust system that relegates its most vulnerable citizens to commodities without voice and without agency The book concludes that the commodification of severe mental illness has been a product of neoliberal discourses that have shaped the economic ways in which the post apartheid South African state have governed poverty and severe mental illness This book will be of interest to scholars of health social and economic policy in South Africa

State and Trends of Carbon Pricing 2014 World Bank World Bank,2014-05-28 The report is a one stop shop for learning about key developments and prospects of existing and emerging carbon initiatives A challenging international carbon market has not stopped the development of domestic carbon pricing initiatives Today about 40 national and over 20 sub national jurisdictions responsible for almost one fourth of global greenhouse gas emissions are putting a price on carbon Together these initiatives cover the equivalent of almost 6 gigatons of carbon dioxide or about 12% of global emissions

The South African Response to COVID-19 Pieter Fourie,Guy Lamb,2023-03-28 This book analyses the first two years of South Africa's response to the COVID 19 epidemic from its emergence in early 2020 Drawing on the perspectives of a range of public health experts economists and other social scientists and development practitioners this book argues that understanding this early response will be essential to moderate and improve future policy thinking around health governance and epidemic readiness This book provides a systemic analysis of not only the epidemiological progression of COVID 19 in South Africa but also the socio political factors that will be key in determining the future of the country as a whole including health system challenges socio economic disparities and inequalities and variable often contradictory and tardy policy responses Overall this book exposes Manichean thinking and the spurious policy dichotomies that pitch public health against human rights economic recovery against viral vector control and science against ideology with lessons not just for South Africa but also for elsewhere on the African continent and beyond This book will be perfect for researchers and practitioners across Public Health Health Policy and Global Health as well as those with an interest in South African politics and development more generally The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

South Africa: 2021 Article IV Consultation-Press Release; Staff Report; and Statement by the Executive Director for South Africa International Monetary Fund. African Dept.,2022-02-11 South Africa's subpar economic performance over the last decade has weakened its macroeconomic fundamentals and social indicators In response to formidable COVID 19 related challenges government expenditure surged and amid declining revenue the budget deficit widened significantly The South African Reserve Bank SARB and the Prudential Authority PA preserved adequate liquidity conditions and financial sector stability The cyclical recovery from the deep contraction has been faster than expected but its strength is unlikely to be sustained Benign global market conditions have supported asset performance although term premia are elevated due to fiscal risks Bank soundness indicators remain solid but a deepening bank sovereign nexus raises some concerns

Problematizing the Foreign Shop Gastrow, Vanya,2018-08-03 Small businesses owned by international migrants and refugees are often the target of xenophobic hostility and attack in South Africa This report examines the problematization of migrant owned businesses in South Africa and the regulatory efforts aimed at curtailing their economic activities In so doing it sheds light on the complex ways in which xenophobic fears are generated and manifested in the country's social legal and political orders Efforts to curb migrant spaza shops in South Africa have included informal trade agreements at local levels fining migrant

shops and legislation that prohibits asylum seekers from operating businesses in the country Several of these interventions have overlooked the content of local by laws and outdated legal frameworks The report concludes that when South African township residents attack migrant spaza shops they are expressing their dissatisfaction with their socio economic conditions to an apprehensive state and political leadership In response governance actors turn on migrant shops to demonstrate their allegiance to these residents to appease South African spaza shopkeepers and to tacitly blame socio economic malaise on perceived foreign forces Overall these actors do not have spaza shops primarily in mind when calling for the stricter regulation of these businesses Instead they are concerned about the volatile support of their key political constituencies and how this backing can be undermined or generated by the symbolic gesture of regulating the foreign shop

Exploring the link between poverty and human rights in Africa Edited by Ebenezer Durojaye and Gladys Mirugi-Mukundi, 2020-01-01
 About the publication This book addresses poverty one of the important issues confronting Africa from a multi disciplinary approach With contributions from eminent scholars from diverse backgrounds the book explores poverty from a human rights perspective Its central message is that poverty is not necessarily a failure on the part of an individual but rather caused by the actions or inactions of governments which are often exacerbated by structural inequalities in many African societies This in turn requires a more pragmatic approach grounded in respect for human rights Exploring the link between poverty and human rights in Africa will be useful to researchers policymakers students activists and others interested in addressing poverty

Security, Governance, and State Fragility in South Africa Edward L. Mienie, 2020-03-06 Do existing measures of state fragility measure fragility accurately Based on commonly used fragility measures South Africa SA is classified as a relatively stable state yet rising violent crime high unemployment endemic poverty eroding public trust identity group based preferential treatment policies and the rapid rise of the private security sector are all indications that SA may be suffering from latent state fragility Based on a comprehensive view of security this study examines the extent to which measures of political legitimacy and good governance effectiveness in the security system especially with respect to the police system and mounting economic challenges may be undermining the stability of SA in ways undetected by commonly used measures of state fragility Using a mixed methods approach based on quantitative secondary data analysis and semi structured interviews with government officials security practitioners and leading experts in the field this study finds that the combination of colonization apartheid liberation struggle transition from autocracy to democracy high levels of direct and structural violence stagnating social political and economic developments make South Africa a latently fragile state Conceptually the results of this research call into question the validity of commonly used measures of state fragility and suggest the need for a more comprehensive approach to assessing state fragility Practically this study offers a number of concrete policy recommendations for how South Africa may address mounting levels of latent state fragility
