The Land of the Long Night Paul Belloni Du Chaillu, 1899 Account of the author's travels in the European Arctic Description of life and ways of Lapps *Cold Front* David Fairhall, 2010-10-30 The Arctic land of ice and the six month day irresistible goal for explorers and adventurers enduring source of romance and mystery and now also a poignant and unavoidable indicator of the impact of climate change As the ice cap shrinks the geography of the entire Arctic region changes clear shipping channels replace immovable ice and inaccessible oil resources become available What will be the long term consequences of these cataclysmic changes not only environmental but also social and political How will the lives of the many individuals who depend upon the natural resources of the Arctic be changed And how will the global powers who wish to exploit the region's many assets respond Cold Front is not just another attempt to predict the outcome of global warming Instead it offers a clear sighted and penetrating investigation of the Arctic's pivotal role in international relations placing the polar region in its historical political and legal context The thawing of the ice cap creates huge opportunities for trade and transport and therefore also for conflict between the Arctic nations This important and timely addition to the literature on the region will be essential reading for anyone interested in humanity's effect on the Arctic or the Arctic's effect on humanity

The Arctic Land Expedition, 1832 Narrative of the Arctic Land Expedition to the Mouth of the Great Fish River, and Along the Shores of the Arctic Ocean in the Years 1833, 1834, And 18 Sir George Back, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1836 edition Excerpt us to see A little more than an hour's pulling however took us to the end of it and we found that a reef of large stones cased in ice divided it from another lane This ice being in shallow water was porous and rotten so that it yielded to the united effect of the axe and the weight of the men and at the expiration of an hour and a half the boat was got through though not without some awkward scrapings An easy rapid and the shelving shore of a sand hill rather encouraged the hope that the river would turn out favourably but that illusion was soon dispelled by a very long rapid immediately succeeding where the boat was only saved by all hands jumping into the breakers and keeping her stern up the stream until she was cleared from a rock that had brought her up We had hardly time

to get into our places again when we were carried with considerable velocity past a river which joined from the westward a rapid then followed after which another tributary was observed coming from the same quarter The hills in that direction did not exceed three hundred feet in height and often not fifty but they had the same sterile appearance and were spotted with the same dark fragments of rocks or stones as those already passed On the eastern side sandy banks were frequently met with which gradually rose into acclivities or gently sloping mounds with small streamlets winding round their bases affording pasturage A SERIES OF RAPIDS to musk oxen and deer The latter scampered away as we approached but the former stood stupidly gazing at us luckily for them we were not in want of their carcasses An island near the centre of the river with thin columns of mist rising suspiciously at quick intervals on each side made it *Narrative of the Arctic land expedition to the mouth of the Great Fish River, and along the shores of the Arctic Ocean, in the years 1833, 1834 and 1835* George Back,1836
