The Warburg Effect Regulation Under Siege: The Intertwined Pathways in Health and Disease Concetta Bubici, Salvatore Papa, 2019-10-17 Many cells including immune neuronal cancer and stem cells become dependent on

aerobic glycolysis to escape apoptosis and accommodate their bioenergetics needs How this metabolic change also known as the Warburg effect is regulated remains largely unknown The Warburg effect has been widely investigated in cancer cells where it was first observed with the aim of decoding the molecular networks controlling its activation for therapeutic purposes This Research Topic aimed to discuss and review all the intracellular signaling regulating the Warburg effect in cancerous and normal non cancerous cells though original research articles mini reviews and reviews *Perspectives in Zebrafish Research* Maria Caterina Mione,Patrick Blader,Filippo Del Bene,Eirini Trompouki,Isaac Henry Bianco,2020-04-22 In the past decade a small tropical vertebrate fish zebrafish has rapidly gained the interest of research laboratories worldwide as a model system This topic will provide updated perspectives on all fields of zebrafish research from experts gathering at the 5th Zebrafish Principal Investigators Meeting in Trento 20-23 March 2018 The community of researchers using zebrafish is rapidly expanding necessitating a clear plan for how to tackle central questions that remain a challenge in the field and providing inspiration for future studies This is the aim of the workshop and the Frontiers Research Topic will provide a platform for dissemination of novel ideas arising from this meeting Stem Cell Biology and Regenerative Medicine Charles Durand,Pierre Charbord,2022-09-01 The study of stem cell biology is under intensive investigation Because stem cells have the unique capability to self renew and differentiate into one or several cell types they play a critical role in development tissue homeostasis and regeneration Stem cells also constitute promising cell candidates for cell and gene therapy The aim of this book is to provide readers and researchers with timely and accurate knowledge on stem cell biology and regenerative medicine This book will cover many topics in the field and is based on conferences given by recognized scientists involved in the international master course on stem cell biology at Sorbonne Universit in Paris *The Integrative Physiology of Metabolic Downstates* Alessandro Silvani,2021-11-02 Non-Coding RNAs in Reproductive Biology Linjun Hong,Katja Teerds,Tang Zhonglin,Zuo Bo,Li Meng,2021-08-25 **Cell Biology and Translational Medicine, Volume 3** Kursad Turksen,2018-11-28 Much research has focused on the basic cellular and molecular biological aspects of stem cells Much of this research has been fueled by their potential for use in regenerative medicine applications which has in turn spurred growing numbers of translational and clinical studies However more work is needed if the potential is to be realized for improvement of the lives and well being of patients with numerous diseases and conditions This book series Cell Biology and Translational Medicine CBTMED as part of SpringerNature s longstanding and very successful Advances in Experimental Medicine and Biology book series has the goal to accelerate advances by timely information exchange Emerging areas of regenerative medicine and translational aspects of stem cells are covered in each volume Outstanding researchers are recruited to highlight developments and remaining challenges in both the basic research and clinical arenas This current book is the third volume of a continuing series *The 11th Edition of the International Meeting of the SPCE-TC: Advances in Stem Cells and Cell Therapies* Susana Solá,Joana Paiva Miranda,2021-09-14 Integrative Approaches to the Molecular
