

# Birds

Birds are warm-blooded vertebrates. Vertebrates are living things that have a backbone. Most birds can fly but some species are unable to do this. Penguins and ostriches are examples of birds that cannot fly.

## What do they look like?

There are many different types of birds. They can look very different but they have some similar features. Birds have:

a beak

two wings

two legs

feathers

a tail

short or long

## How big are they?

Birds vary in size. Some are tiny and others are much bigger. The common ostrich is the world's largest bird. It can be as tall as about 2.7 metres. The world's smallest bird is the bee hummingbird. It is only around 5cm long.

## What do they eat?

Most birds eat insects, seeds or fruit. Some birds are carnivores and eat meat. Examples of carnivorous birds are eagles, vultures, hawks and owls. Vultures mostly eat the remains of dead animals.

## Did you know...?

- There are around 10,000 species of birds.
- They are found on every continent of the world.
- Female birds lay eggs. Birds sit on their eggs to keep them warm until the young are ready to hatch.
