

### What is the Bloomberg Aptitude Test (BAT)?

The BAT is a two hour, one hundred multiple choice question test that offers students a granular assessment of their strengths and weaknesses. Over 200,000 students from over 3,500 universities have taken the BAT. It tests aptitude for finance across eight key performance areas required of all major finance roles, including:

- News Analysis
- Economics
- Math Skills
- Analytical Reasoning
- Financial Statement Analysis
- Investment Banking
- Chart and Graph Analysis

The BAT is available for free on campus – find upcoming BAT sessions on [our website](#).

### How does it work?

Bloomberg Institute collaborated with 100 entry-level recruiters and 40 finance professors around the world to create the BAT and develop questions. To ensure we use accurate content, we leverage finance information from Bloomberg News, Bloomberg Charts & Graphs.

After taking the BAT, students can opt to have their anonymous profile included in our Talent Search database. This database is used by recruiters daily to connect with candidates for internship and full time positions. Student information remains hidden from the recruiter, until they choose to accept a connection. Their contact information and resume is then released to the employer.

**Alternative Beta Strategies and Hedge Fund Replication** Lars Jaeger,Jeffrey Pease,2008-10-13 There's a buzzword that has quickly captured the imagination of product providers and investors alike hedge fund replication In the broadest sense replicating hedge fund strategies means replicating their return sources and corresponding risk exposures However there still lacks a coherent picture on what hedge fund replication means in practice what its premises are how to distinguish different approaches and where this can lead us to Serving as a handbook for replicating the returns of hedge funds at considerably

lower cost Alternative Beta Strategies and Hedge Fund Replication provides a unique focus on replication explaining along the way the return sources of hedge funds and their systematic risks that make replication possible It explains the background to the new discussion on hedge fund replication and how to derive the returns of many hedge fund strategies at much lower cost it differentiates the various underlying approaches and explains how hedge fund replication can improve your own investment process into hedge funds Written by the well known Hedge Fund expert and author Lars Jaeger the book is divided into three sections Hedge Fund Background Return Sources and Replication Techniques Section one provides a short course in what hedge funds actually are and how they operate arming the reader with the background knowledge required for the rest of the book Section two illuminates the sources from which hedge funds derive their returns and shows that the majority of hedge fund returns derive from systematic risk exposure rather than manager Alpha Section three presents various approaches to replicating hedge fund returns by presenting the first and second generation of hedge fund replication products points out the pitfalls and strengths of the various approaches and illustrates the mathematical concepts that underlie them With hedge fund replication going mainstream this book provides clear guidance on the topic to maximise returns
