Systems Engineering Using SDL-92 A. Olsen,2012-12-02 CCITT now ITU T Specification and Description Language SDL and systems engineering formal and informal in SDL are considered in this publication The latest version of the language SDL 92 ITU Z 100 SDL 92 is introduced The book has been written for existing and potential users of SDL technologists involved in the specification and engineering of systems It offers easier learning through examples and application than the Z 100 Recommendation of March 1993 which gives precise technical definitions and concepts The book has sufficient coverage of the language so that for normal use it should not be necessary to consult Z 100 For this reason the grammars both textual and graphical are included and the index makes it possible to find text on most of the language mechanisms Chapter 1 provides an overview of specification and design of telecommunication systems It considers the usage and scope of SDL Chapter 2 gives an overview of the language with an introduction of the major language elements Chapter 3 focuses on the specification of behaviour and the information interchange between processes Chapter 4 covers the structuring of systems in terms of instances how these may be defined by types and how types may be organised in type subtype hierarchies by inheritance Parameterised types and packages of type definitions are also covered Chapter 5 presents the part of the language that provides data types with emphasis placed on how to use predefined data types Chapter 6 presents the use of SDL for system engineering with a discussion of general systems engineering principles followed by an introduction to methodologies which use SDL The use of other languages in combination with SDL documentation issues naming and other lexical rules errors and language support are considered since they are more relevant to the use of language in engineering than when initially learning the language
