argued that the CGFTE policy which emphasises extrinsic benefits but limits professional development does not have a significant negative impact on pre service teachers motivation to choose teaching This conclusion is supported by the offsetting effects of the policy s restrictive and encouraging aspects as explained by expectancy value theory and the qualitative data Nevertheless the intrinsic motivation of policy funded pre service teachers did not improve as much as that of their self supported counterparts indicating potential undermining effects of the policy The study concludes by discussing the implications of these findings for enhancing the CGFTE policy teacher training and career education in China The book will be an essential read for students and scholars of higher education Chinese studies and educational studies in general
