

This patented industrial design includes an exclusive tamper resistant system to protect against objects being placed in a blade opening. Due to a unique switching technology, power is not present if an object is inserted within an individual slot. This is significantly superior to the plastic shutter method that is used by competition today.

The National Electric Code per article 517.18C states "Pediatric Locations, receptacles located within rooms, bathrooms, playrooms, activity rooms and patient care areas of pediatric wards shall be listed tamper resistant or shall employ a listed tamper resistant cover."

This Fed Spec solution is also an excellent choice for psychiatric areas, medical facilities, heavy industrial, prisons, day care, laboratories, elderly facilities and schools. Industrial "robust" mechanical design & materials provide a receptacle with superior performance. This technology is also available in Hospital Grade.
