Soviet Union Jean Louis Cohen traces the powerful concept of Amerikanism and its impact on Russia's built environment from early czarist interest in Revolutionary America through the spectacular World's Fairs of the 19th century to department stores skyscrapers and factories built in Russia using American methods during the 20th century Visions of America also captivated the Russian avant garde from El Lissitzky to Moisei Ginzburg and Cohen explores the ongoing artistic dialogue maintained between the two countries at the mid century and in the late Soviet era following a period of strategic competition This first major study of Amerikanism in the architecture of Russia makes a timely contribution to our understanding of modern architecture and its broader geopolitics **Conflicted American Landscapes** David E.

Nye, 2021-04-27 How conflicting ideas of nature threaten to fracture America's identity Amber waves of grain purple mountain majesties American invest much of their national identity in sites of natural beauty And yet American lands today are torn by conflicts over science religion identity and politics Creationists believe that the Biblical flood carved landscapes less than 10 000 years ago environmentalists protest pipelines Western states argue that the federal government's land policies throttle free enterprise Native Americans demand protection for sacred sites In this book David Nye looks at Americans irreconcilably conflicting ideas about nature A landscape is conflicted when different groups have different uses for the same location for example when some want to open mining sites that others want to preserve or when suburban development impinges on agriculture Some landscapes are so degraded from careless use that they become toxic anti landscapes Nye traces these conflicts to clashing conceptions of nature ranging from pastoral to Native American to military industrial that cannot be averaged into a compromise Nye argues that today's environmental crisis is rooted in these conflicting ideas about land Depending on your politics global warming is either an inconvenient truth or fake news America's contradictory conceptions of nature are at the heart of a broken national consensus *The Environmental Humanities* Robert S. Nye,2022-05-17 A reconception of the sublime to include experiences of disaster war outer space virtual reality and the Anthropocene We experience the sublime overwhelming amazement and exhilaration in at least seven different forms Gazing from the top of a mountain at a majestic vista is not the same thing as looking at a city from the observation deck of a skyscraper looking at images constructed from Hubble Space Telescope data is not the same as living through a powerful earthquake The varieties of sublime experience have increased during the last two centuries and we need an expanded terminology to distinguish between them In this book David Nye delineates seven forms of the sublime natural technological disastrous martial intangible digital and environmental which express seven different relationships to space time and identity These forms of the sublime can be experienced at historic sites ruins cities national parks or on the computer screen We find them in beautiful landscapes and gigantic dams in battle and on battlefields in images of black holes and microscopic particles The older forms are tangible when we are physically present and our senses are fully engaged increasingly others are intangible mediated through technology Nye examines each of the seven sublimes framed by philosophy but focused on historical examples **Out of Stock** Dara Orenstein,2019-11-07 In *Out of Stock* Dara Orenstein delivers an ambitious and engrossing account of that most generic and underappreciated site in American commerce and industry the warehouse She traces the progression from the nineteenth century s bonded warehouses to today s foreign trade zones enclaves where

goods can be simultaneously on US soil and off US customs territory Orenstein contends that these zones nearly 800 of which are scattered across the country are emblematic of why warehouses have begun to supplant factories in the age of Amazon and Walmart Circulation is so crucial to the logistics of how and where goods are made that it is increasingly inseparable from production to the point that warehouses are now some of the most pivotal spaces of global capitalism Drawing from cultural geography cultural history and political economy Out of Stock nimbly demonstrates the centrality of warehouses for corporations workers cities and empires The Oxford Handbook of American Economic History, vol. 1 Edited by Louis P. tandem with the rise of the modern technocratic state Taking coal as an essential feedstock of national wealth and power Chinese and Japanese bureaucrats engineers and industrialists deployed new technologies like open pit mining and hydraulic stowage in pursuit of intensive energy extraction But as much as these mine operators idealized the might of fossil fuel driven machines their extractive efforts nevertheless relied heavily on the human labor that those devices were expected to displace Under the carbon energy regime countless workers here and elsewhere would be subjected to invasive techniques of labor control ever escalating output targets and the dangers of an increasingly exploited earth Although Fushun is no longer the coal capital it once was the pattern of aggressive fossil fueled development that led to its ascent endures As we confront a planetary crisis precipitated by our extravagant consumption of carbon it holds urgent lessons This is a groundbreaking exploration of how the mutual production of energy and power came to define industrial modernity and the wider world that carbon made
