Time-Series Observations of Ocean Acidification: a Key Tool for Documenting Impacts on a Changing Planet Abed El Rahman Hassoun, Adrienne J. Sutton, Sam Dupont, Jose Martin Hernandez-Ayon, Xianghui Guo, 2025-04-15 Ocean acidification is a global phenomenon with local effects Marine ecosystems are facing multiple stressors leading to significant changes Time series observations are the basis to understand these changes and distinguishing between natural and anthropogenic variability of physical chemical and biological components of marine environments Moreover field monitoring is often neglected as a tool to document the responses of marine organisms and key habitats to ocean acidification Time series observations of ocean acidification are thus critical to understanding the current threats that the ocean's ecosystems are witnessing and efficiently developing and implementing adaptation and mitigation solutions Time series dedicated to observing ocean acidification other stressors as well as biological parameters are the baseline for long term assessment of the ocean's health and for evaluating the efficiency of local and global actions toward achieving climate targets Therefore the goal of this Research Topic is to highlight the latest research efforts conducted to document ocean acidification patterns and trends and their consequences on marine life In this issue we will focus on new and old time series stations efforts to bridge

physical chemical and biological observations and their application for modeling and future projections

User Centric E-Government Saqib Saeed,T. Ramayah,Zaigham Mahmood,2017-09-17 This book provides user studies and theories related to user centered technology design processes for e government projects The book mainly discusses inherent issues of technology design implications user experiences and guidelines for technology appropriation Ethnographic studies focusing on real life examples will enable readers to understand the problems in an effective way Furthermore the theories and results will help researchers and practitioners to handle these challenges in an efficient way E Government is about harnessing the information revolution to improve the efficiency of government processes and the lives of citizens It aims at a citizen centered approach to governance through effective use of the Internet and Information and Communication Technologies ICTs E Government promotes transparency and effectiveness of a government s processes as well as citizens participation e participation in the affairs of the government Whereas E government projects are huge undertakings for government departments a user centric approach requires citizens participation in the design and delivery of e government services In both these respects there are huge challenges and governments require long term commitment as well as correct planning and availability of financial resources to address them System design for e governmental applications is inherently a complex process In successful e government projects appropriately designed technology infrastructure plays a pivotal rule The technology appropriation process requires that e government technologies should be in line with the work practices of end users so that successful usage of these technologies can be realized E governmental systems which fail to take into account such human factors result in failure and wasting huge amounts of public money as well as a loss of confidence of the public in such technological infrastructures It is highly important that citizens are enabled to have access to the appropriate information technology have knowledge and skills to use the available technology and have the positive commitment to affect the governments strategies So enabling citizens to effectively participate is much more difficult This book addresses these inherent challenges and available opportunities with respect to user centric e government
