**Shaping the Bar** Joan Howarth, 2022-12-13 The comprehensive source on attorney licensing and how to reform it In Shaping the Bar Joan Howarth describes how the twin gatekeepers of the legal profession law schools and licensers are failing the public Attorney licensing should be laser focused on readiness to practice law with the minimum competence of a new attorney According to Howarth requirements today are both too difficult and too easy Amid the crisis in unmet legal services record numbers of law school graduates disproportionately people of color are failing bar exams that are not meaningful tests of competence to practice At the same time after seven years of higher education hundreds of thousands of dollars of law school debt two months of cramming legal rules and success on a bar exam a candidate can be licensed to practice law without ever having been in a law office or even seen a lawyer with a client Howarth makes the case that the licensing rituals familiar to generations of lawyers unfocused law degrees and obsolete bar exams are protecting members of the profession more than the public Beyond explaining the failures of the current system this book presents the latest research on competent lawyering and examples of better approaches This book presents the path forward by means of licensing changes to protect the public while building an inclusive diverse competent ethical profession Thoughtful and engaging Shaping the Bar is both an authoritative account of attorney licensing and a pragmatic handbook for overdue

equitable reform of a powerful profession      *Reforming Legal Education* David M. Moss, Debra Moss Curtis, 2012-11-01 In today's volatile law school environment curriculum reform has emerged as a significant focus. It is commonly understood that law schools effectively teach certain analytical skills but are less successful in other areas and often scramble to adapt to evolving aims. This book demonstrates how law schools are successfully reforming their curriculum and lays the framework to show how all schools of law can engage in a continuous reform model that proactively shapes our profession. It is expected that faculty and professional staff engaged in legal education will utilize this book as a primary resource to guide their respective reform efforts. Each contributed chapter presents a case study of a data-driven curriculum reform effort. The initial chapters set the conceptual context for the book while the final chapter offers summative recommendations for considering legal education reform as derived from the earlier case study chapters. This book adds significantly to the literature in legal education as we gain first-hand insight into evidence-based reform for the legal education community.

*Academia Next* Bryan Alexander, 2020-01-14 From the renowned futurist a look at how current trends will transform American higher education over the next twenty years. 2020 Most Significant Futures Work Award Winner Association of Professional Futurists. The outlook for the future of colleges and universities is uncertain. Financial stresses, changing student populations, and rapidly developing technologies all pose significant challenges to the nation's colleges and universities. In *Academia Next*, futurist and higher education expert Bryan Alexander addresses these evolving trends to better understand higher education's next generation. Alexander first examines current economic, demographic, political, international, and policy developments as they relate to higher education. He also explores internal transformations within postsecondary institutions, including those related to enrollment, access, academic labor, alternative certification, sexual assault, and the changing library, paying particularly close attention to technological changes. Alexander then looks beyond these trends to offer a series of distinct scenarios and practical responses for institutions to consider when combating shrinking enrollments, reduced public support, and the proliferation of technological options. Arguing that the forces he highlights are not speculative but are already in play, Alexander draws on a rich, extensive, and socially engaged body of research to best determine their likeliest outcomes. It is only by taking these trends seriously, he writes, that colleges and universities can improve their chances of survival and growth. An unusually multifaceted approach to American higher education that views institutions as complex organisms, *Academia Next* offers a fresh perspective on the emerging colleges and universities of today and tomorrow.      **2019**

**Evaluation Models** George F. Madaus,M. Scriven,D.L. Stufflebeam,2012-12-06 Attempting formally to evaluate something involves the evaluator coming to grips with a number of abstract concepts such as value merit worth growth criteria standards objectives needs norms client audience validity reliability objectivity practical significance accountability improvement process product format summative costs impact information credibility and of course with the evaluation itself To communicate with colleagues and clients evaluators need to clarify what they mean when they use such terms to denote important concepts central to their work Moreover evaluators need to integrate these concepts and their meanings into a coherent framework that guides all aspects of their work If evaluation is to lay claim to the mantle of a profession then these conceptualizations of evaluation must lead to the conduct of defensible evaluations The conceptualization of evaluation can never be a one time activity nor can any conceptualization be static Conceptualizations that guide evaluation work must keep pace with the growth of theory and practice in the field Further the design and conduct of any particular study involves a good deal of localized conceptualization
