Branding the American West Marian Wardle, Sarah E. Boehme, 2016-02-17 Artists and filmmakers in the early twentieth century reshaped our vision of the American West In particular the Taos Society of Artists and the California based artist Maynard Dixon departed from the legendary depiction of the Wild West and fostered new images or brands for western art This volume illustrated with more than 150 images examines select paintings and films to demonstrate how these artists

both enhanced and contradicted earlier representations of the West Prior to this period American art tended to portray the West as a wild frontier with untamed lands and peoples Renowned artists such as Henry Farny and Frederic Remington set their work in the past invoking an environment immersed in conflict and violence This trademark perspective began to change however when artists enamored with the Southwest stamped a new imprint on their paintings The contributors to this volume illuminate the complex ways in which early twentieth century artists as well as filmmakers evoked a southwestern environment not just suspended in time but also permanent rather than transient Yet as the authors also reveal these artists were not entirely immune to the siren call of the vanishing West and their portrayal of peaceful yet exotic Native Americans was an expansion rather than a dismissal of earlier tropes Both brands cast a romantic spell on the West and both have been seared into public consciousness *Branding the American West* is published in association with the Brigham Young University Museum of Art Provo Utah and the Stark Museum of Art Orange Texas *Vanishing America* James Conaway, 2008-10-10 A mixture of travelogue and personal narrative James Conaway's smart informative essays offer an insightful depiction of his journeys between Washington D C and Big Sur California as he tries to understand what has become of the places people and traditions that were once so precious but have now been irreparably changed Incorporating the voices of cowboys real estate agents activists and many others he raises vital questions about the merits of sprawling development and the ever increasing use of resources in the name of progress He urges us to consider the value of preservation in our growth driven culture as well as the ramifications of prosperity on the places important to our national identity **Reading Rural Landscapes** Robert Stanford, 2015-09-15 Everywhere we go in rural New England the past surrounds us In the woods and fields and along country roads the traces are everywhere if we know what to look for and how to interpret what we see A patch of neglected daylilies marks a long abandoned homestead A grown over cellar hole with nearby stumps and remnants of stone wall and orchard shows us where a farm has been reclaimed by forest And a piece of a stone dam and wooden sluice mark the site of a long gone mill Although slumping back into the landscape these features speak to us if we can hear them and they can guide us to ancestral homesteads and famous sites Lavishly illustrated with drawings and color photos Provides the keys to interpret human artifacts in fields woods and roadsides and to reconstruct the past from surviving clues Perfect to carry in a backpack or glove box A unique and valuable resource for road trips genealogical research naturalists and historians *America First* Mandy Merck, 2012-11-12 At a time when the expanded projection of US political military economic and cultural power draws intensified global concern understanding how that country understands itself seems more important than ever This collection of new critical essays tackles this old problem in a new way by examining some of the hundreds of US films that announce themselves as titularly American From early travelogues to contemporary comedies national nomination has been an abiding characteristic of American motion pictures heading the work of Porter Guy Blach DeMille Capra Sternberg Vidor Minnelli and Mankiewicz More recently George Lucas

Paul Schrader John Landis and Edward James Olmos have made their own contributions to Hollywood's Americana What does this national branding signify Which versions of Americanism are valorized and which marginalized or excluded Out of which social and historical contexts do they emerge and for and by whom are they constructed Edited by Mandy Merck the collection contains detailed analyses of such films as *The Vanishing American* *American Madness* *An American in Paris* *American Graffiti* *American Gigolo* *American Pie* and many more

Desolate Barns of the American West Marques Vickers, 2017-06-28 This edition represents a photographic celebration of damaged and often abandoned barns and silos located within the rural Western United States Over fifty structures are photographed amidst a backdrop of panoramic mountains turbulent rivers and sagebrush flatlands Many are inaccessible via roadways or difficult to approach due to private property restrictions The captures images are spread over California Oregon Washington Idaho and Montana The objective of this photography project is to isolate the abandoned and frequently decaying remnants of a uniquely national architecture treasure Barns and silos represent an iconic and important American rural tradition An altered historic frontier has left many of these monoliths forsaken and deteriorating organically into the landscape American agriculture has become forever transformed by advanced machinery technology and the consolidation of land holdings These remaining stately buildings represent a crossroads between traditional rural lifestyle and the effects of modernity In numerous instances timber framed structures undergo a gradual deterioration before collapsing into splinted heaps Their disintegrating structural supports corrode until gravity ultimately prevails The wood remnants are often simply left to blend harmoniously into the natural surroundings The isolation and expansive landscape of the American northwest provides an evocative comparison to contemporary confined urban and suburban environments The continuity of these utilitarian structures remains timeless in spite of their condition

Rhetorical Landscapes in America Gregory Clark, 2021-11-24 A panoramic explanation of civic tourism and the shaping of a national identity At the same time a reading of Kenneth Burke and of tourist landscapes in America Gregory Clark's new study explores the rhetorical power connected with American tourism Looking specifically at a time when citizens of the United States first took to rail and then highway to become sightseers in their own country Clark traces the rhetorical function of a wide ranging set of tourist experiences He explores how the symbolic experiences Americans share as tourists have helped residents of a vast and diverse nation adopt a national identity In doing so he suggests that the rhetorical power of a national culture is wielded not only by public discourse but also by public experiences Clark examines places in the American landscape that have facilitated such experiences including New York City Shaker villages Yellowstone National Park the Lincoln Highway San Francisco's 1915 Panama Pacific International Exposition and the Grand Canyon He examines the rhetorical power of these sites to transform private individuals into public citizens and he evaluates a national culture that teaches Americans to experience certain places as potent symbols of national community Invoking Burke's concept of identification to explain such rhetorical encounters Clark considers Burke's lifelong study of symbols linguistic and otherwise and their place in the construction and transformation of individual identity Clark turns to Burke's work to expand our awareness of the rhetorical resources that lead individuals within a community to adopt a collective identity and he considers the implications of nineteenth and twentieth century tourism for both visual rhetoric and the rhetoric of display
