Johannesburg Geography Paper One Scope Grade11:

Politics and the Urban Frontier Tom Goodfellow, 2022-09-26 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations. Despite the rise of global technocratic ideals of city making, cities around the world are not merging into indistinguishable duplicates of one another. In fact, as the world urbanizes, urban formations remain diverse in their socioeconomic and spatial characteristics with varying potential to foster economic development and social justice. In this book, Tom Goodfellow argues that these differences are primarily rooted in politics and if we continue to view cities as economic and technological projects to be managed rather than terrains of political bargaining and contestation, the quest for better urban futures is doomed to fail. Dominant critical approaches to urban development tend to explain difference with reference to the variegated impacts of neoliberal regulatory institutions. This, however, neglects the multiple ways in which the wider politics of capital accumulation and distribution drive divergent forms of transformation in different urban places. In order to unpack the politics that shapes differential urban development, this book focuses on East Africa as the global urban frontier, the least urbanized but fastest urbanizing region in the world. Drawing on a decade of research spanning three case study countries, Ethiopia, Rwanda, and Uganda, *Politics and the Urban Frontier* provides the first sustained, book-length comparative analysis of urban development trajectories in Eastern Africa and the political dynamics that underpin them. Through a focus on infrastructure investment, urban propertyscapes, street-level trading economies, and urban political protest, it offers a multi-scalar, historically grounded and interdisciplinary analysis of the urban transformations unfolding in the world's most dynamic crucible of urban change.
