Private International Law and Arbitral Jurisdiction Faidon Varesis, 2022-12-23

International commercial arbitration and litigation are often seen as competing fora fields of law or markets This intersection is at its highest at the forefront of any proceedings at the jurisdictional stage The analysis of jurisdictional issues at the forefront of an arbitration has been confined in a descriptive analysis of the law and jurisprudence dealing with jurisdictional intersections almost in a mechanistic manner These are not however issues which can be treated as mere mechanical rules They are issues pertaining to core notions of authority sovereignty their origins and their allocation At the same time the pragmatic and practical domination of party autonomy is a fact which cannot be disregarded when one considers the normative and theoretical foundations of any model of dealing with these issues This book moves beyond an analysis of arbitration and jurisdiction clauses to reconcile theory and practice and provides an underlying theoretical model to explain and regulate jurisdictional intersections at the early stages of an arbitration from a private international law perspective It combines both an in depth engagement with the theoretical literature as well as a close examination and analysis of its practical consequences in the form of a restatement of the law of England and Wales From a methodological perspective it utilises contemporary theories in private international law to propose a coherent model of regulating arbitral jurisdictions

which promotes autonomy and freedom of the parties at this stage Demonstrating first how the theoretical model can be applied in practice and second to provide a basis for a potential future top down or bottom up approach of adopting the proposed model it includes a succinct and practical codification of the current state of affairs in relation to the whole spectrum of jurisdictional issues in England and Wales to serve as a useful tool for practitioners considering jurisdictional issues both from the perspective of State courts and from the perspective of arbitral tribunals as well as academics researching in these areas *Remedies in Construction Law* Roger ter Haar,Camilla Ter Haar,2024-12-27 Remedies in Construction Law brings together various well established strands of the law and considers practical remedies for breach of contract and tort in connection with construction projects The third edition brings the text up to date with significant new cases in respect of duress force majeure and liquidated damages It also features new content on retention clauses remedies associated with Grenfell Tower type cladding bonds and variation clauses This book continues to be a vital reference to lawyers and construction professionals seeking specialist insight into how remedies function in the construction sector

Building Big Business in Russia Yuko Adachi, 2013-09-05 This book examines the development of big business in Russia since the onset of market oriented reform in the early 1990s It explains how privatized post Soviet enterprises many of which made little sense as business units were transformed into functional firms able to operate in the environment of a market economy It provides detailed case studies of three key companies Yukos Oil Company Siberian Russian Aluminium and Norilsk Nickel all of which played a key role in Russia's economic recovery after 1998 describing how these companies were created run and have developed It shows how Russian businesses during the 1990s routinely relied on practices not entirely compatible with formal rules in particular in the area of corporate governance The book fully explores the critical role played by informal corporate governance practices such as share dilution transfer pricing asset stripping limiting shareholders access to votes and bankruptcy to order as Russian big business developed during the 1990s Unlike other studies on Russian corporate governance this book highlights the ambiguous impact of informal corporate governance practices on the companies involved as commercial entities and suggests that although their use proved costly to Russia's business reputation they helped core groups of owners managers at the time to establish coherent business firms Overall the book shows that we cannot understand the nature of current economic changes in Russia without recognising the crucial role played by informal corporate governance practices in the creation and development of big business in post Soviet Russia
