And what is meant by a living body? German Leib. Does our brain dictate what we will and do? Or do we have free will? Why are we the same people tomorrow that we were yesterday? Given the discoveries of the modern neural sciences, can human beings still be understood in the context of the unity of body and soul? Or should we rather define ourselves as mind-brain beings? German Gehirn, Geist, Gestalten. Marcus Knaup explores these questions and discusses the most relevant approaches and arguments concerning the living body-soul debate. His own approach to current challenges presented by modern brain research emanates from his bringing together Aristotelian Hylomorphism and phenomenology of the living body.
