Js World Affairs 2015:

Democracy and an Open-Economy World Order George C. Bitros, Nicholas C. Kyriazis, 2017-04-12 The essays in this volume explore several key issues facing democracies today They discuss the dilemma of how to protect civil liberties and individual freedoms in the light of external threats and assess the policies adopted by governments in this area The book also addresses the question of how free exactly free markets should be in an economy in order to secure social peace before going on to highlight the rudiments of the model of social market economy as applied in Germany It examines the problem of the democratic and legitimacy deficits that beset European integration and suggests reforms for a more democratic European Union Last but not least by looking back in history they provide evidence and propose policies for the revitalization of institutions in present day democracies The book is of considerable interest to researchers and students in economics and political science as well as to readers who wish to gain insights into the thorny social issues involved *Matching Visibility*

and Performance Nian Cai Liu, Ying Cheng, Qi Wang, 2016-11-25 The concept of world class universities WCU has increasingly gained popularity in the past two decades around the world WCU are regarded as cornerstone institutions of any academic system and imperative to develop a nation's competitiveness in the global knowledge economy The development of such universities is high on the policy agenda of various stakeholders worldwide in both developed and developing countries and regions and at both national and institutional levels to promote their global competitiveness Visibility and performance are among the most watched concepts in relation to develop WCUs but remain complicated in nature and with no agreed upon definitions Existing literature have focused on how to raise universities prestige status impact and rankings in the global and regional arena on the one hand and how to enhance universities quality efficiency effectiveness and academic output on the other However whether visibility is a legitimate indicator of performance or vice versa is yet to be answered *Matching Visibility and Performance A Standing Challenge for World Class Universities* provides insights of developing academic excellence from global national and institutional perspectives and intends to stimulate discussion on how universities can be globally visible and locally engaged and how visibility and performance can be integrated and balanced in practice

External Governance as Security Community Building Pernille Rieker, 2016-04-26 The European Neighbourhood Policy ENP was initially intended to create a ring of friends surrounding the Union from Morocco to Russia and the Black Sea Prodi 2002 Today however the ever worsening security situation in the region clearly shows that the aim has not been achieved With wars in Ukraine Syria and Libya the Union's neighbourhood can therefore better be described as a ring of fire Does this mean that the policy has failed and that an alternative policy towards the EU's neighbours is needed Or should these developments be seen as temporary setbacks caused by external factors beyond EU control By comparing the EU's approach to its eastern and southern neighbours this volume seeks to answer such overarching questions The authors find that the EU still has a potential role to play in providing regional security but that this role also risks being increasingly undermined if it does not increasingly take into account the broader geostrategic realities in both regions

American Global Pre-eminence William R. Thompson, 2022 A unique analysis that assesses how we can determine which country will be the next world leader Will China surpass the United States as the world's leader In American Global Pre-eminence William R. Thompson argues that the answer depends on leads in technological innovation energy and global reach These are the forces that influence the hierarchy of global power a system which began emerging a thousand years ago and started becoming more evident after the 1490s especially after Dutch activities in the seventeenth century and British operations in the nineteenth century The US followed in this fashion after 1945 Yet leads do not last forever Ironically as it becomes clearer how technological innovation military force and energy power interact the processes under scrutiny may themselves be fundamentally transforming Thus Thompson contends the real policy question is not whether the US is ahead or behind China but rather whether it will remain possible for a single state to lead the global system As technological innovation energy consumption and global reach capability grow less concentrated the prospects for systemic leadership shrink even as global problems become more complex and acute With a sweeping analysis of global power Thompson provides a foundation for understanding the realities and possibilities of lead states past present and future
