To Touch the Face of God Kendrick Oliver, 2013-01-15 Was the space program the signature project of secular modernity or a symbol of humankind's perpetual quest for communion with God In the beginning God created the heavens and the earth In 1968 the world watched as Earth rose over the moonscape televised from the orbiting Apollo 8 mission capsule Radioing back to Houston on Christmas Eve astronauts recited the first ten verses from the book of Genesis In fact many of the astronauts found space flight to be a religious experience *To Touch the Face of God* is the first book length historical study of the relationship between religion and the U S space program Kendrick Oliver explores the role played by

religious motivations in the formation of the space program and discusses the responses of religious thinkers such as Paul Tillich and C S Lewis Examining the attitudes of religious Americans Oliver finds that the space program was a source of anxiety as well as inspiration It was not always easy for them to tell whether it was a godly or godless venture Grounded in original archival research and the study of participant testimonies this book also explores one of the largest petition campaigns of the post war era Between 1969 and 1975 more than eight million Americans wrote to NASA expressing support for prayer and bible reading in space Oliver s study is rigorous and detailed but also contemplative in its approach examining the larger meanings of mankind s first adventures in the heavens
