Getting to Good Arthur L. Caplan, Barbara K. Redman, 2018-07-23 This book represents the first comprehensive gold standard reader on research integrity in the biomedical sciences Now more than ever the responsible conduct of research RCR has become critically important as new technologies affect research practices in both positive and negative ways Since learning to do science and practicing it brings researchers into contact with a vast array of ethical issues it is critical to know the standards and how they are evolving Indeed research integrity requires scientists at all levels to operate ethically in a system that supports ethical practice This unique foundational text covers all the relevant areas subject protection research misconduct and conflict of interest as well as newly quantified concerns about research bias and non reproducibility as well as other unique

issues Developed by renowned experts this compelling title discusses the full range of practices and policies that should support research that is honestly produced and disseminated It also specifically incorporates topics noted by the National Institutes of Health as essential and required for training in RCR Getting to Good Research Integrity in the Biomedical Sciences is a major contribution to the literature on bioethics and will serve as an invaluable resource for all researchers students administrators and professionals interested in research ethics and integrity

Yearbook of International Organizations 2014-2015 (Volume 4) Union Of International Associations, Union of International Associations, 2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available Detailed profiles of international non governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here In addition to the history aims and activities of international organizations with their events publications and contact details the volumes of the Yearbook include networks between associations biographies of key people involved and extensive statistical data Providing both an international organizations and research bibliography Volume 4 cites over 46 000 publications and information resources supplied by international organizations and provides nearly 18 000 research citations under 40 subject headings This volume also includes a research bibliography on international organizations and transnational associations

The Age of Stress Mark Jackson, 2013-03-28 An exploration of the history of scientific studies of stress in the modern world Reveals how the science that legitimates and fuels current anxieties about stress has been shaped by a wide range of socio political and cultural as well as biological factors stress is both a condition and a metaphor

The Planet Remade Oliver Morton, 2015-10-01 The risks of global warming are real and potentially vast The difficulty of doing without fossil fuels is daunting and possibly insurmountable So there is an urgent need for new thinking on climate change To meet that need a small but increasingly influential group of scientists is exploring proposals for planned human intervention in the climate system A stratospheric veil against the sun the cultivation of photosynthetic plankton a fleet of unmanned ships seeding clouds these are the radical technologies of climate geoengineering It is chilling to think of such power and such scope for misadventure or malice in humans hands And yet we are now at the point where we have no choice but to take them very seriously indeed The Planet Remade explores the science history and politics behind these strategies It looks at who might want to see geoengineering put to use and why others would be dead set against it In the last two centuries changes to the planet to the clouds and soils to the winds and the seas to the great cycles of nitrogen and carbon have been far more profound than most of us realize Appreciating the scale of that change compels us to rethink not just our responses to global warming but our relationship to nature With sensitivity insight and expert science Oliver Morton unpicks the moral

implications of climate change our fear that people have become a force of nature and what it might mean to try and use that force for good The Planet Remade is about imagining a world where people take care instead of taking control 13+
