**Background and Introduction to Jurassic Park**

Steven Spielberg defined the modern blockbuster with *Jaws* back in 1975. Nearly twenty years later, Spielberg proved how sharp his chops still are with *Jurassic Park*, a film whose dinosaurs are alive and among mankind. A mixture of anticlockwork and science fiction, the film challenges what Spielberg does best and raised thematic questions about man's relationship to nature and science. The director later declared that by choosing a creature-driven thriller, "I was really just trying to make a good sequel to *Jaws*... on land." While some critics only note Spielberg's blockbuster instincts, the acclaimed director has also shined in character fare as well with *Saving Private Ryan* years later and successfully followed *Jurassic Park* in the same year with one of the most lauded films about the Holocaust of all time, *Schindler's List*.

*Jurassic Park* was both a critical and cultural phenomenon and has since become one of the most successful franchises for the studio. Because it predates *Titanic* and *Avatar* (the most financial successful PG-13 films), *Jurassic Park* became the highest grossing film released worldwide up to that time. *Rolling* magazine gave the film five stars, calling it as "quite simply one of the greatest blockbusters of all time." A *Rotten Tomatoes* consensus states, "*Jurassic Park* is a spectacle of special effects and life-like animatronics, with some of Spielberg's best sequences of sustained awe and sheer terror since *Jaws*." The film was honored for its special effects achievements, especially at the Academy Awards where it won all three Oscars it was nominated for: Best Sound Editing, Best Sound Mixing, and Best Visual Effects. At the same ceremony, Spielberg, editor Michael Kahn, and composer John Williams all took home Academy Awards for the film they all collaborated on together immediately after *Jurassic Park*, *Schindler's List*.
