**Linking Architecture and Education** Anne Taylor, 2009-05-16 For the past forty years Anne Taylor has studied how schools classrooms playgrounds homes museums and parks affect children and how they learn As a result she has developed a holistic sustainable philosophy of learning environment design She argues persuasively that architects must integrate their design knowledge with an understanding of the developmental needs of learners while at the same time educators parents and students must broaden their awareness of the built natural and cultural environment to maximize the learning experience In other words schools and other environments can themselves become three dimensional textbooks When architects are cognizant of newer models of education and educators view the environment as more than a box in which to teach prescribed lessons the result is an informed architecture that enables children to discover the power of their own learning The book presents numerous examples of dynamic designs that are the result of interdisciplinary understanding of place Taylor includes designer perspectives forums derived from commentary by outside contributors involved in school planning and a wealth of photographs of thoughtful and effective solutions to create learning environments from comprehensive design criteria Because the concept of school is enlarged to a community campus the book also spawns a new model of teaching and learning This book is essential reading for educators architects and community members who are anxious to transform education in America and elsewhere Anne Taylor is the most outstanding educator leading proponent and practitioner in the three dimensional textbook field Her work is the finest resource available for connecting students young and old to their learning environments and visa versa Edward E Kirkbride NCARB REFP Before Western man divided the universe into discrete subject matter areas the order in the universe was and still is both interdisciplinary and holistic The branching of trees spiraling of shells meandering of streams and the radial designs of flowers for example represent an analogy of mathematics biology and art The current artificial separation of subject matter is in contrast to the way the world is constructed and the way children perceive it Architecture and the study of the built natural and cultural environment synthesize the world of material things and the world of ideas Further more it helps us to realize that we are a part of not apart from the environment This book is a tool and a gift to designers educators and students everywhere to assist them in seeing the meaning behind all that we view and use for living on earth To know our precious relationship to our surroundings is the intent of this book In this way life is a work of art and each of us is an artist Anne Taylor *American Scenic Design and Freelance Professionalism* David Bisaha, 2022-11-29 An inclusive history of the professionalization of American scenic

design The figure of the American theatrical scenic designer first emerged in the early twentieth century As productions moved away from standardized painted scenery and toward individualized scenic design the demand for talented new designers grew Within decades scenic designers reinvented themselves as professional artists They ran their own studios proudly displayed their names on Broadway playbills and even appeared in magazine and television profiles American Scenic Design and Freelance Professionalism tells the history of the field through the figures institutions and movements that helped create and shape the profession Taking a unique sociological approach theatre scholar David Bisaha examines the work that designers performed outside of theatrical productions He shows how figures such as Lee Simonson Norman Bel Geddes Jo Mielziner and Donald Oenslager constructed a freelance professional identity for scenic designers by working within their labor union United Scenic Artists Local 829 generating self promotional press building university curricula and volunteering in wartime service However while new institutions provided autonomy and intellectual property rights for many women queer and Black designers were not always welcome to join the organizations that protected freelance designers interests Among others Aline Bernstein Emeline Roche Perry Watkins Peggy Clark and James Reynolds were excluded from professional groups because of their identities They nonetheless established themselves among the most successful designers of their time Their stories expand the history of American scenic design by showing how professionalism won designers substantial benefits yet also created legacies of exclusion with which American theatre is still reckoning

**The Crisis of the African-American Architect** Melvin L. Mitchell, 2003 another missing piece of our rich history and profound contribution to western civilization For history buffs please put this book on your must read list George C Fraser Author of Race For Success and Success Runs In Our Race Mitchell believes that the entire future of blacks in the field of architecture is in jeopardy He then discusses the impact of the Harlem Renaissance on black architecture and the subsequent emergence of Howard University as the center of the black architectural universe The Journal of Blacks in Higher Education seminal Architecture Magazine In this long overdue book aimed at Black America and her allies Melvin Mitchell poses the question why haven t black architects developed a Black Architecture that complements modernist black culture that is rooted in world class blues jazz hip hop music and other black aesthetic forms His provocative thesis inspired by Harold Cruse s landmark book The Crisis of the Negro Intellectual exposes the roots of an eighty year old estrangement between black architects and Black America Along the way he provides interesting details about the politics of downtown development in the Marion Barry era of Washington DC Mitchell calls for a bold and inclusive New Black Urbanism He sees the radical reform and re missioning of the handful of accredited HBCU based architecture schools as a critical tool in refashioning a rapprochement between black architects and Black America

architecture Who was the only American architect to receive the Congressional Medal of Honor for bravery during the Civil War Which architect designed a castle in California for William Randolph Hearst Master Builders answers these and scores of other questions about more than 100 architects and builders who have left indelible marks on American architecture This unique guide puts faces with America's most well known and loved buildings from the U S Capitol and Washington Monument through the first skyscrapers and landmarks of the Post Modern movement Why should you want to know more about these architects asks Roger K Lewis in his introduction The reason is simple You are undeniably connected to the built environment that you inhabit use see and respond to You affect building design and building design affects you Can you pair these master builders with their works Frank Lloyd Wright U S Capitol Skidmore Owings and Merrill Central Park Adler and Sullivan University of Virginia Ludwig Mies van der Rohe Glass House William Thornton Home Insurance Building Orson Squire Fowler Fallingwater H H Richardson CBS Building Frederick Law Olmsted San Simeon James Renwick Seagram Building Robert Mills Trinity Church Boston I M Pei Salk Institute Julia Morgan Sears Tower Eero Saarinen Smithsonian Castle Cass Gilbert John E Kennedy Library McKim Mead and White U S Supreme Court Louis I Kahn Chicago Stock Exchange Thomas Jefferson Octagonal Houses Philip Johnson Pennsylvania Station William Le Baron Jenney Washington Monument

**Think Like an Architect** Hal Box, 2010-01-01 An award winning architect and educator demystifies the process of making architecture and explains why good architectural design matters The design of cities and buildings affects the quality of our lives Making the built environments in which we live work and play useful safe comfortable efficient and as beautiful as possible is a universal quest What many don't realize is that professional architects design only about five percent of the built environment While much of what non architects build is beautiful and useful the ugliness and inconveniences that blight many urban areas demonstrate that an understanding of good architectural design is vital for creating livable buildings and public spaces To help promote this understanding among non architects and those considering architecture as a profession award winning architect and professor Hal Box explains the process from concept to completed building using real life examples to illustrate the principles involved To cause what we build to become architecture we have three choices hire an architect become an architect or learn to think like an architect In this book organized as a series of letters to students and friends Box covers what architecture should be and do how to look at and appreciate good buildings how to understand the design process work with an architect or become an architect an overview of architectural history with lists of books to read and buildings to see practical guidance about what goes into constructing a building an architect's typical training and career path how architecture relates to the city where the art of architecture is headed why good architecture matters

**Work-Life Balance in Architecture** Igea Troiani, 2024-03-04 This book seeks to improve the work lives of architects of diverse demographics who do not fit or want to replicate the traditional 24/7 white male architect lifestyle Aimed at a workforce whose life and career expectations have changed drastically in recent years it helps readers of

different generations to make informed choices about their careers enabling students educators and professionals to prioritise wellbeing and offer their design and practice voice to enhance a built environment for all Work Life Balance in Architecture examines what it means to play the game of architecture to choose to study and pursue a career in architecture rather than another profession The book shows the economic social and professional structures within which architectural education and practice operate and reveals the impact of a corporate neoliberal big business mentality on wellbeing After setting out the context exacerbating work life imbalance the book discusses the paths an architect may take whether this leads to a career in practice or not in architecture at all and how alternative gameplay moves can advantage or disadvantage those of different gender class ethnicity race or age at different career stages It concludes by examining how the places in which an architect works the time available to work and critiques of perpetual neoliberal economic growth can enhance the lives of all architects today

**Crit - An Architectural Student's Handbook** Charles Doidge, Rachel Sara, Rosie Parnell, 2007-08-15 The architectural crit review or jury is a cornerstone of architectural education around the world Students defend their ideas drawings and models in open forum before staff and fellow students What academic staff see as healthy creative debate students see as hostile confrontation an ego trip for staff and humiliation for them This accessible and readable book written by students and illustrated by telling cartoons guides them through this academic minefield with creative humour It provides practical advice based on experience of many recent students and draws on recent experimentation at Sheffield University and De Montfort University Leicester The aim is twofold first to suggest how to get the most out of the traditional experience and second to describe ways in which this is being developed into an experience that will be more constructive and prepare future students to build more creative relationships with clients and users and across the industry While much has been written about the crit review or jury little has been done to prepare students for it or to develop it in the light of changing professional attitudes and relationships This book is a timely guide to a timeless experience in a changing profession

*The Theory of Architecture* Paul-Alan Johnson, 1994-04-18 The Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings

include Utopic thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic s use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text The Crit: An Architecture Student's Handbook Charles Doidge, Rachel Sara, Rosie Parnell, 2007-06-07 The architectural crit review or jury is a cornerstone of architectural education around the world The defence of ideas drawings and models in an open format before staff and peers is intended to be a foreground for healthy creative debate but many students view it as hostile confrontation an ego trip for staff and humiliation for them This accessible and immensely enjoyable book guides students through this academic minefield This fully updated edition includes advice and suggestions for tutors on how to model a crit around a broad range of learning styles as well as a new section aimed at students with learning disabilities to ensure that the process is constructive and beneficial for all architecture and design scholars Packed with practical tips from tutors students and professionals this reassuringly honest book will prepare students to build more creative relationships with clients and users across the industry Also in the Seriously Useful Guides series Practical Experience The Dissertation The Portfolio **The Collaborators: Interactions in the Architectural Design Process** Gilbert Herbert, Mark Donchin, 2016-03-23 Illustrated by critical analyses of significant buildings including examples by such eminent architects as Adler and Sullivan Erich Mendelsohn and Louis Kahn this book examines collaboration in the architectural design process over a period ranging from the mid 19th century to the late 1960s The examples chosen located in England the United States Israel and South Africa are of international scope They have intrinsic interest as works of architecture and illustrate all facets of collaboration involving architects engineers and clients Prior to dealing with the case studies the theoretical framework is set in three introductory essays which discuss in general terms the organizational implications of partnerships associations and teams the nature of interactions between architect and engineer and cooperation and confrontation in the relationship between architect and client From this original standpoint the interactive role of the designers it examines and reinterprets such well known buildings as the Chicago Auditorium and the Kimbell Art Museum The re evaluation of St Pancras Station and its hotel questions common presumptions about the separation of professional roles played by its engineer and architect

The account of the troubled history of Mendelsohn's project for the first Haifa Power House highlights the difficulties that arise when a determined and eminent architect confronts a powerful and demanding client. In a later era the examination of the John Moffat Building which is less well known but deserving of wider recognition reveals how the fruitful collaboration of multiple architects can result in a successful unified design. These case studies comprise a wide range of programmes, challenges, personalities and interactions. Ultimately in five different ways in five different epochs and in five different circumstantial and cultural contexts this book shows how the dialogue between the players in the design process resonates up to the present.

**Practical Experience** Jane Tankard, Katerina Ruedi Ray, 2012-05-23 The year out or internship in a professional practice can be the most rewarding experience in an architectural student's education. It can also be a shock to the system to find that architectural working practices are very different to architectural study. This book provides a beginner's guide to professional practice and a step by step guide on how to find the placement that best suits your goals. It is the fourth title in the successful Seriously Useful Guides series. In order to give you a real insight into professional experience this guide includes real life case studies from students who have been through the experience and from practices that have taken them on. It guides you through the steps of finding a placement, outlines the norms and expectations for internship in different countries and discusses codes of office behavior and professional ethics. Contemporary architectural practices are becoming increasingly diverse and this guide outlines some Practical experience. Internship choices providing case studies of award winning firms that offer practical experience. These case studies range from conventional practices based on the art of building to practices based on digital media or contemporary urbanism. Finally the term critical practice is becoming increasingly important and the book provides some definitions and examples of critically based architectural practices. Also in the Seriously Useful Guides Series: *The Crit*, *The Portfolio*, *The Dissertation*.

*Curing the Fountainheadache* Andy Pressman, 2006 In her novel *The Fountainhead* Ayn Rand powerfully depicted the clashes that can arise between a single minded architect and his client. Don't let this happen to you. Through case studies, interviews, photographs, rough sketches, detailed plans and even cartoons award winning architect Andy Pressman instructs both architect and client on how to work together in the most mutually supportive way. Here's what to expect during work, how to take the tension out of a project and how to prevent typical misunderstandings. With humor and insight he follows the fortunes, both good and bad, of more than 25 projects, exploring the reasons for success and failure in a unique guide that will prove a solid plus for both sides of the architect-client equation.

*Digital Poetics* Marjan Colletti, 2017-03-02 *Digital Poetics* celebrates the architectural design exuberance made possible by new digital modelling techniques and fabrication technologies. By presenting an unconventional and original humanistic theory of CAD computer aided design, the author suggests that beyond the generation of innovative engineering forms, digital design has the potential to affect the wider complex cultural landscape of today in profound ways. The book is organised around a synthetic and hybrid research methodology, a contemporary propositional and theoretical

discursive investigation and a design led empirical research Both methods inform a critical construct that deals with the nature forms and laws of digitality within a contemporary architectural discourse that affects practice and academia The chapters spiral at from towards around outside inwards and back inside out digitality its cognitive phenomena spatial properties and intrinsic capabilities to achieve or at least approach Digital Poetics The book presents speculative and small scale constructed projects that pioneer techniques and experiments with common 3D and 4D software packages whereby the focus lies not on the drawing processes and mechanics but on the agency and impact the image its reading experience interpretation achieves on the reader and observer The book also features a preface by Fr d ric Migayrou a philosopher and curator and one of the most influential cultural engineers of the contemporary international architectural scene The book is linked to a website which contains a larger selection of images of some featured projects *Architect?, third edition* Roger K.
