Architecture And Psychoanalysis Architecture And Psychoanalysis:

Architecture and Psychoanalysis John Shannon Hendrix, 2006 Textbook The Architecture of Psychoanalysis Jane Rendell, 2019 In this thought provoking book Jane Rendell explores how architectural space registers in psychoanalysis She investigates both the inherently spatial vocabulary of psychoanalysis and ideas around the physical setting of the psychoanalytic encounter with reference to Sigmund Freud D W Winnicott and Andre Green Building on the innovative writing methods employed in *Art and Architecture* and *Site Writing* she also addresses the concept of architecture as social condenser a Russian constructivist notion that connects material space and community relations Tracing this idea's progress from 1920s Moscow to 1950s Britain Rendell shows how interior and exterior meet in both psychoanalysis and architectural practice Illuminating a novel field of interdisciplinary enquiry this book breathes fresh life into notions of social space Publisher *Lacan + Architecture* John Shannon Hendrix, Francesco Proto, 2024-11-14 This book seeks to revise and revive architectural theory through psychoanalysis as well as to apply psychoanalytic theory to architecture Its authors argue for Lacan's central importance for a comprehensive theory of building and suggest how architectural theory might offer new resources for psychoanalytic theorists They address both the perceived crisis in the contemporary state of architecture and architectural theory and crises in society at large including political and economic fracture and instability and threats to mental health and well being It offers fresh insights to architects architectural educators and practitioners scholars of psychoanalysis and anyone interested in the human condition in relation to the built environment This book has been awarded the 2025 Architectural Theory Book of the Year Architecture and the Unconscious John Shannon Hendrix, Lorens Eyan Holm, 2016-06-17 There are a number of recent texts that draw on psychoanalytic theory as an interpretative approach for understanding architecture or that use the formal and social logics of architecture for understanding the psyche But there remains work to be done in bringing what largely amounts to a series of independent voices into a discourse that is greater than the sum of its parts in the way that say the architect Peter Eisenman was able to do with the architecture of deconstruction or that the historian Manfredo Tafuri was able to do with the Marxist critique of architecture The discourse of the present volume focuses specifically for the first time on the subject of the unconscious in relation to the design perception and understanding of architecture It brings together an international group of contributors who provide informed and varied points of view on the role of the unconscious in architectural design and theory and in doing so expand architectural theory to unexplored areas enriching architecture in relation to the humanities The book explores how architecture engages dreams desires imagination memory and emotions how architecture can appeal to a broader scope of human experience and identity Beginning by examining the historical development of the engagement of the unconscious in architectural discourse and the current and historical theoretical and practical intersections of architecture and psychoanalysis the volume also analyses the city and the urban condition Psychoanalysis and Architecture Cosimo

Schinaia,2018-05-08 This book explores how psychoanalysis and architecture can enhance and increase the chances of mental containment while also fostering exchange between inside and outside The way in which psychoanalysts take care of mental suffering and the way in which architects and city planners assess the environment are grounded in a shared concern with the notion of dwelling It is a matter of fact that dwelling exists in a complex context comprised of both biological need and symbolic function Psychoanalysis and architecture can work together in both thinking about and designing not only our homes but also the analyst s consulting rooms and more generally our therapy places However this is possible only if they renounce the current limited and restrictive model of this interaction and propose one more that is more in harmony with the questions and situations that clients themselves pose

Form Follows Libido Sylvia Lavin,2007-09-28 How modern architecture came to embrace the urges and fears of the affective unconscious Eight million Americans a year cool their heels in psychiatric waiting rooms Design can help lower this nervous overhead Richard Neutra 1954 Sylvia Lavin s Form Follows Libido argues that by the 1950s some architects felt an urge to steer the cool abstraction of high modernism away from a neutral formalism toward the production of more erotic affective environments Lavin turns to the architecture of Richard Neutra 1892 1970 to explore the genesis of these new mood inducing environments In a series of engaging essays weaving through the designs and writings of this Vienna born California based architect Lavin discovers in Neutra a sustained and poignant psychoanalytic reflection set in the context of a burgeoning psychoanalytic culture in America Lavin shows that Neutra s redirection of modernism constituted not a lyrical regression to sentimentality but a deliberate advance of architectural theory and technique to engage the unconscious mind fueled by the ideas of psychoanalysis that were being rapidly disseminated at the time In Neutra s responses to a vivid range of issues from psychoanalysis proper to the popular psychology of tele evangelical prayer Lavin uncovers a radical reconstitution of the architectural discipline Arguing persuasively that the received historical views of both psychoanalysis and architecture have led to a suppression of their compelling coincidences and unorthodoxies Lavin sets out to unleash midcentury architecture s hidden libido Neither Neutra nor psychoanalysis emerges unscathed from her investigation of how architecture came to be saturated by the intrigues of affect often against its will If Reyner Banham sought to put architecture on the couch then Lavin through Neutra leaps beyond Banham s ameliorative aim to lure contemporary architecture into the lush and dangerous liaisons of environmental design

Dialogues between Psychoanalysis and Architecture Christina Moutsou,2023-11-28 Dialogues between Psychoanalysis and Architecture explores the multisensory space of therapy real or virtual and how important it is in providing the container for the therapeutic relationship and process This book is highly original in bringing psychoanalysis and architecture together and highlighting how both disciplines strive to achieve transformation of our psychic space It brings together contributions that comprise three parts the first explores the space of the consulting room through the senses to examine issues such as smell and its link with memory and belonging hearing out the Other the psychoanalytic

couch the medical therapy room and the so called sixth sense secondly the book questions how the consulting room can represent or be redesigned to reflect the philosophy that underlies the therapy process foregrounding an architectural point of view and thirdly the book attends to the significance of the consulting room as a virtual space as it emerged during the pandemic of COVID 19 and beyond Architectural psychotherapeutic and interdisciplinary perspectives allow for an important new dimension on the psychological use of space and will appeal to psychoanalysts psychoanalytic and integrative psychotherapists art therapists students of psychotherapy as well as architects and designers

Architecture and Fire Stamatis Zografos, 2019-06-12 Architecture and Fire develops a conceptual reassessment of architectural conservation through the study of the intimate relationship between architecture and fire Stamatis Zografos expands on the general agreement among many theorists that the primitive hut was erected around fire locating fire as the first memory of architecture at the very beginning of architectural evolution Following the introduction Zografos analyses the archive and the renewed interest in the study of archives through the psychoanalysis of Jacques Derrida He moves on to explore the ambivalent nature of fire employing the conflicting philosophies of Gaston Bachelard and Henri Bergson to do so before discussing architectural conservation and the relationship between listed buildings the function of archives and the preservation of memories from the past The following chapter investigates how architecture evolves by absorbing and accommodating fire while the penultimate chapter examines the critical moment of architectural evolution the destruction of buildings by fire with a focus on the tragic disaster at London's Grenfell Tower in 2017 Zografos concludes with thoughts on Freud's drive theory He argues the practice of architectural conservation is an expression of the life drive and a simultaneous repression of the death drive which suggests controlled destruction should be an integral part of the conservation agenda Architecture and Fire is founded in new interdisciplinary research navigating across the boundaries of architecture conservation archival theory classical mythology evolutionary theory thermodynamics philosophy and psychoanalysis It will be of interest to readers working in and around these disciplines

Architecture and the Mimetic Self Lucy Huskinson, 2018-02-02 Buildings shape our identity and sense of self in profound ways that are not always evident to architects and town planners or even to those who think they are intimately familiar with the buildings they inhabit Architecture and the Mimetic Self provides a useful theoretical guide to our unconscious behaviour in relation to buildings and explains both how and why we are drawn to specific elements and features of architectural design It reveals how even the most uninspiring of buildings can be modified to meet our unconscious expectations and requirements of them and by the same token it explores the repercussions for our wellbeing when buildings fail to do so Criteria for effective architectural design have for a long time been grounded in utilitarian and aesthetic principles of function efficiency cost and visual impact Although these are important considerations they often fail to meet the fundamental needs of those who inhabit and use buildings Misconceptions are rife not least because our responses to architecture are often difficult to measure and are in

large part unconscious By bridging psychoanalytic thought and architectural theory Architecture and the Mimetic Self frees the former from its preoccupations with interpersonal human relations to address the vital relationships that we establish with our nonhuman environments In addition to providing a guide to the unconscious behaviours that are most relevant for evaluating architectural design this book explains how our relationships with the built environment inform a more expansive and useful psychoanalytic theory of human relationship and identity It will appeal to psychoanalysts and analytical psychologists architects and all who are interested in the overlaps of psychology architecture and the built environment

Reading Architecture with Freud and Lacan Lorens Holm, 2022-09-30 Reading Architecture with Freud and Lacan Shadowing the Public Realm methodically outlines key concepts in psychoanalytic discourse by reading them against key modern and post modern architects It begins with what is arguably the central concept for each discipline by putting the unconscious in a dialectic relation to space Each subsequent chapter begins with a detail in architectural discourse a kind of provocation that anchors each excursion into the thought of Freud and Lacan The text is cyclical episodic and cloudlike rather than expository the intention is not simply to explain the concept of the unconscious but to different degrees perform it in the text The book offers powerful critiques of current planning practice which has no tools to address our attachment to places It concludes with powerful critiques of our incapacity to change the environmentally damaging ways we live our lives which is an effect of our incapacity to recognise the presence of the death drive in our nature The text is an extended thesis spanning the chapters that the field of the Other is the common grammar that organises subjects into civilisations which has consequences for how we treat the public realm in architecture politics and the city The field of the Other is a slightly different slice through the urban social world It shadows but does not correspond exactly to more familiar categories like private public inside outside figure ground or piazza boulevard Reading Architecture with Freud and Lacan will be an essential resource to anyone interested in how the environment we build is a reflection of our desire Psychoanalysis is one of the great humanist discourses of the 20th century and this book will be a valuable reference to the humanist in architects planners and social scientists whether they are students professionals or amateurs It will appeal to historians of the 20th century and to psychoanalysts and architects who are interested in how their respective discourses interdigitate with each other and with other discourses

The Architecture of Psychoanalysis Jane Rendell, 2017-03-01 In this thought provoking book Jane Rendell explores how architectural space registers in psychoanalysis She investigates both the inherently spatial vocabulary of psychoanalysis and ideas around the physical setting of the psychoanalytic encounter with reference to Sigmund Freud D W Winnicott and Andre Green Building on the innovative writing methods employed in Art and Architecture and Site Writing she also addresses the concept of architecture as social condenser a Russian constructivist notion that connects material space and community relations Tracing this idea's progress from 1920s Moscow to 1950s Britain Rendell shows how interior and exterior meet in both psychoanalysis and architectural practice Illuminating a novel

field of interdisciplinary enquiry this book breathes fresh life into notions of social space Psychoanalysis and Architecture Jerome A. Winer, James William Anderson, 2006 *The Routledge Handbook of Psychoanalysis in the Social Sciences and Humanities* Anthony Elliott, Jeffrey Prager, 2016-04-14 The Routledge Handbook of Psychoanalysis in the Social Sciences and Humanities provides a comprehensive critical overview of the historical theoretical and applied forms of psychoanalytical criticism This path breaking Handbook offers students new ways of understanding the powers and limits of psychoanalysis and of the social cultural and political possibilities of psychoanalytic critique The book offers students and professionals clear and concise chapters on the development of psychoanalysis introducing key theories that have influenced debates over the psyche desire and emotion in the social sciences and humanities There are substantive chapters on classical Freudian theory Kleinian and Bionian theory object relations psychoanalysis Lacanian and post Lacanian approaches feminist psychoanalysis as well as postmodern trends in psychoanalysis There is a strong emphasis on interdisciplinary approaches to psychoanalytic critique with contributions drawing from developments in sociology politics history cultural studies women s studies and architecture Freud for Architects John Abell, 2020-11-22 Freud for Architects explains what Freud offers to the understanding of architectural creativity and architectural experience with case examples from early modern architecture to the present Freud s observations on the human psyche and its influence on culture and social behavior have generated a great deal of discussion since the 19th century Yet what Freud s key ideas offer to the understanding of architectural creativity and experience has received little direct attention That is partly because Freud opened the door to a place where conventional research in architecture has little traction the unconscious Adding to the difficulties Freud s collection of work is vast and daunting Freud for Architects navigates Freud s key ideas and bridges a chasm between architecture and psychoanalytic theory The book highlights Freud s ideas on the foundational developments of childhood developments on which the adult psyche is based It explains why and how the developmental stages could influence adult architectural preferences and preoccupations spatial intuition and beliefs about what is proper and right for architectural design As such Freud for Architects will be of great interest to students practitioners and scholars in a range of disciplines including architecture psychoanalysis and philosophy **Library of Congress Subject Headings** Library of Congress, Library of Congress. Surrealism and Architecture Thomas Mical, 2005 Twenty one essays examining the relationship of surrealist thought to architectural theory and practice *Ernst L. Freud, Architect* Volker M. Welter, 2011-10-01 Ernst L Freud 1892-1970 was a son of Sigmund Freud and the father of painter Lucian Freud and the late Sir Clement Freud politician and broadcaster After his studies in Munich and Vienna where he and his friend Richard Neutra attended Adolf Loos's private Bauschule Freud practiced in Berlin and after 1933 in London Even though his work focused on domestic architecture and interiors Freud was possibly the first architect to design psychoanalytical consulting rooms including the customary couches a subject dealt with here for the first time By interweaving an account of Freud's professional and personal life in Vienna Berlin and London with a critical discussion of selected examples of his domestic architecture interior designs and psychoanalytic consulting rooms the author offers a rich tapestry of Ernst L Freud's world His clients constituted a Who's Who of the Jewish and non Jewish bourgeoisie in 1920s Berlin and later in London among them the S Fischer publisher family Melanie Klein Ernest Jones the Spenders and Julian Huxley While moving within a social class known for its cultural and avant garde activities Freud refrained from spatial formal or technological experiments Instead he focused on creating modern homes for his bourgeois clients

Psychoanalysis and the Global Ilan Kapoor, 2018-09 Psychoanalysis and the Global is about the hole at the heart of the global meaning the instability and indecipherability that lies at the hub of globalization The contributors use psychoanalysis to expose the unconscious desires excesses and antagonisms that accompany the world of economic flows cultural circulation and sociopolitical change Unlike the mainstream discourse of globalization which most often assumes unencumbered movement across borders these contributors uncover what Lacan calls the Real of the global its rifts gaps exceptions and contradictions Psychoanalysis and the Global adopts a psychoanalytic lens to highlight the unconscious circuits of enjoyment racism and anxiety that trouble if not undermine globalization's economic cultural and environmental goals or gains The contributors interrogate how unconscious desires and drives are externalized in our increasingly globalizing world the ways in which traumas and emotional conflicts are integral to the disjunctures homogeneities and contingencies of global interactions how social passions are manifested and materialized in political economy as much as in climate change urban architecture refugee and gender politics or the growth of neo populism and how the unconscious serves as a basis for the rise and breakdown of popular movements against authoritarianism and neoliberal globalization Psychoanalysis and the Global represents a major step forward in understanding globalization and also in extending the
