Architecture And The American Dream:

Architecture and the American Dream Craig Whitaker, 1996 We admire a building or a group of buildings because they express however subtly certain images and ideas we have about ourselves In this riveting study Craig Whitaker reinterprets the American architectural landscape as the manifest vision of our collective conscience Asserting that the built environment is shaped largely by cultural values Whitaker dissects American architecture by revealing its archetypes and analyzing their origins in the national psyche The result is a superbly evocative essay on how Americans think and live and how these spheres are combined in our architecture On a grand scale Whitaker examines the ways in which our architectural eclecticism is rooted in the democratic notion of individual liberty upon which this nation was founded From New York to St Louis to Los Angeles and all of the towns in between these shared values have created a landscape that at first appears chaotic but is in fact remarkably homogeneous The grid plan of most American cities he argues connotes equality and a refusal to acknowledge the hierarchies of the past while issues of privacy and public display permeate the orientation of our homes and streets And the open road has been raised to the level of a cultural icon expressing ideas unique to this country ideas of mobility and freedom progress and communication By continuously peeling away the layers of meaning that clearly signify national obsessions Whitaker lucidly documents the way in which America has grown and developed for better and for worse In a multidisciplinary fashion drawing on art and literature history and politics film and advertising he takes in the whole of American culture high and low Compelling and thought provoking **Architecture and the American Dream** is certain to give Americans a new perspective from which to define themselves in relation to their environment

Architecture and the American Dream Craig Whitaker, 1998 Architect and planner Craig Whitaker takes in the whole of American life to examine how our cities and houses reflect our culture Drawing on art and literature history and politics film and advertising Whitaker offers a new perspective from which Americans can define themselves in relation to their environment 400

Between Dream Houses and "God's Own Junkyard": Architecture and the Built Environment in American Suburban Fiction Stefanie Strebel, 2021-06-28 The American suburb is a space dominated by architectural mass production sprawl as well as a monotonous aesthetic eclecticism and many critics argue that it has developed from a postwar utopia into a disorienting environment with which it is difficult to identify The typical suburb has come to display characteristics of an atopia that is a space without borders or even a non place a generic space of transience Dealing with the representation of architecture and the built environment in suburban literature and film from the 1920s until present this study demonstrates that in its fictional representations too suburbia has largely turned into a place of non architecture A lack of architectural ethos and an abundance of Junkspace define suburban narratives causing an increasing sense of disorientation and entropy in fictional characters

Foreclosed: Rehousing the American Dream, **Work-Life Balance in Architecture** Igea Troiani, 2024-03-04 This book seeks to improve the work

lives of architects of diverse demographics who do not fit or want to replicate the traditional 24/7 white male architect lifestyle. Aimed at a workforce whose life and career expectations have changed drastically in recent years, it helps readers of different generations to make informed choices about their careers, enabling students, educators, and professionals to prioritise wellbeing and offer their design and practice voice to enhance a built environment for all. Work-Life Balance in Architecture examines what it means to play the game of architecture, to choose to study and pursue a career in architecture rather than another profession. The book shows the economic, social, and professional structures within which architectural education and practice operate and reveals the impact of a corporate neoliberal big business mentality on wellbeing. After setting out the context exacerbating work-life imbalance, the book discusses the paths an architect may take, whether this leads to a career in practice or not in architecture at all, and how alternative gameplay moves can advantage or disadvantage those of different gender, class, ethnicity, race, or age at different career stages. It concludes by examining how the places in which an architect works, the time available to work, and critiques of perpetual neoliberal economic growth can enhance the lives of all architects today.

The Strip Stefan Al, 2022-03-22. The transformations of the Strip from the fake Wild West to neon signs twenty stories high to starchitecture and how they mirror America itself. The Las Vegas Strip has impersonated the Wild West with saloon doors and wagon wheels; it has decked itself out in midcentury modern sleekness. It has illuminated itself with twenty-story high neon signs, then junked them. After that came Disney-like theme parks featuring castles and pirates, followed by replicas of Venetian canals, New York skyscrapers, and the Eiffel Tower. It might be noted that forty-two million people visited Las Vegas in 2015, ten million more than visited the real Paris. More recently, the Strip decided to get classy with casinos designed by famous architects and zillion-dollar collections of art. Las Vegas became the implosion capital of the world as developers, driven by competition, got rid of the old to make way for the new, offering a non-metaphorical definition of creative destruction. In *The Strip*, Stefan Al examines the many transformations of the Las Vegas Strip, arguing that they mirror transformations in America itself. The Strip is not as popularly supposed a display of architectural freaks but representative of architectural trends and a record of social, cultural, and economic change. Al tells two parallel stories. He describes the feverish competition of Las Vegas developers to build the snazziest, most tourist-grabbing casinos and resorts, with a cast of characters including the mobster Bugsy Siegel, the eccentric billionaire Howard Hughes, and the would-be political kingmaker Sheldon Adelson. And he views the Strip in a larger social context, showing that it has not only reflected trends but also magnified them and sometimes even initiated them. Generously illustrated with stunning color images throughout, *The Strip* traces the many metamorphoses of a city that offers a vivid projection of the American dream.

Remaking the American Dream Vinit Mukhija, 2022-12-20 The redefinition of the single family house the urban landscape and the American Dream Sitting squarely at the center of the American Dream the detached single family home has long been the basic building block of most US cities In *Remaking the American Dream* Vinit Mukhija considers how this is changing in both the American psyche and the urban landscape In defiance of long held norms and standards single family housing is slowly but significantly transforming through incremental additions of second and third units Drawing on empirical evidence of informal and formal changes *Remaking the American Dream* documents homeowners quiet unpermitted modifications conversions and workarounds as well as gradual institutional alterations to once rigid local land use regulations Mukhija's primary case study is Los Angeles and the role played by the State of California findings he contrasts with the experience of other cities including Santa Cruz Seattle Portland Minneapolis and Vancouver In each instance he shows how and asks why homeowners are adapting their homes and governments are changing the rules that regulate single family housing to allow for accessory dwelling units ADUs or second units Key to Mukhija's research is the question of why the idea of single family living is changing and what this means for the future of US cities The answer this book suggests heralds nothing less than a redefinition of American urbanism and the American Dream

The Greening of Architecture Phillip James Tabb, A. Senem Deviren, 2017-03-02 Contemporary architecture and the culture it reflects dependent as it is on fossil fuels has contributed to the cause and necessity of a burgeoning green process that emerged over the past half century This text is the first to offer a comprehensive critical history and analysis of the greening of architecture through accumulative reduction of negative environmental effects caused by buildings urban designs and settlements Describing the progressive development of green architecture from 1960 to 2010 it illustrates how it is ever evolving and ameliorated through alterations in form technology materials and use and it examines different places worldwide that represent a diversity of cultural and climatic contexts The book is divided into seven chapters with an overview of the environmental issues and the nature of green architecture in response to them followed by an historic perspective of the pioneering evolution of green technology and architectural integration over the past five decades and finally providing the intransigent and culturally pervasive current examples within a wide range of geographic territories The greening of architecture is seen as an evolutionary process that is informed by significant world events climate change environmental theories movements in architecture technological innovations and seminal works in architecture and planning throughout

each decade over the past fifty years This time period is bounded on one end by the awareness of environmental problems beginning in the 1960 s the influential texts by Rachel Carson E F Schumacher Buckminster Fuller and Steward Brand and the impact of the OPEC Oil Embargo of 1973 and on the other end the pervasiveness of the necessary greening of architecture that includes systemic reforms in architectural and urban design land use planning transportation agriculture and energy production found in the 2000 s The greening process moves from remediation to holistic models of architecture Geographical landscapes give a global account of the greening process where some examples are parallel and sympathetic and others are in clear contrast to one another with very individuated approaches Certain events like the Rio Summit in 1992 and Kyoto Protocol in 1997 and themes such as the Hannover Principles in 2000 provide a dynamic ideological critique as well as a formal and technical discussion of the embodied and accumulative content of greening principles in architecture

Once Upon an American Dream Andrew Lainsbury,2000 Branded a cultural Chernobyl and the tragic kingdom the Euro Disney Resort has been on its own thrill ride since opening in 1992 The much publicized version of the Magic Kingdom gave Europeans alcohol free mocktails surly employees even colors too muted for the Disney image Facing financial disaster was it any wonder that Disney execs found themselves wishing upon a star for answers After so many knee jerk criticisms of Euro Disney this book combines firsthand experience and research to shed new light on claims that the park is nothing more than a form of American cultural imperialism Andrew Lainsbury a former Euro Disney employee who knows what the park meant to its visitors goes beyond media bites and academic scorn to examine Europe s love hate relationship with Euro Disneyland and some of the undiscussed issues surrounding it Once Upon an American Dream is a story of global capitalism on a grand scale Lainsbury has plumbed company archives and interviewed key players to give readers the real view from Le Chateau de la Belle au Bois Dormant Sleeping Beauty s Castle He cracks open the Euro Disney controversy to reveal the park not as a tragic experiment in exporting American culture but the result of European efforts to import a popular form of American entertainment Lainsbury tells how the Walt Disney Company came to build a European park and locate it in France how political negotiations affected its design and development how it was promoted to continental audiences and what caused its widely publicized financial woes before being rescued by a real prince from Saudi Arabia He reveals what it took to win back the hearts of skeptical Europeans such as serving wine selling flashy merchandise and placating disgruntled workers Finally he looks into the magic mirror to speculate on the role of Euro Disney and the Walt Disney Company in the twenty first century Ultimately Lainsbury shows that cultural imperialism is not an exclusively American phenomenon but a global corporate strategy and that global corporatism by needing to be responsive to consumers is so complex that it may not be as monolithic as feared Once Upon an American Dream is a fairy tale for our times reminding us that for all the critical huffing and puffing the creation and marketing of pleasure is what Euro Disneyland is all about
