Vocal Group to Perform In Aramco Communities

The Blue Notes, a vocal quintet from the United States, will perform in AEA-sponsored programs from May 31 to June 9 in Abqaiq, Dhahran, Ras Tanura and 'Udhailiyah.

The group's act features crisp dance routines, natural vocal harmonies on their pop, rock and soul material, and some old and new songs.

The quintet, supported by an eight-piece band, Shades of Blue, will appear in each area as follows:

Dhahran — Wednesday, May 31, at 8:30 p.m. and Friday, June 2, at 7:30 p.m. at the Pool Patio.

Ras Tanura — Thursday, June 1, at 7:30 p.m. at the School Gymnasium.

Abqaiq — Wednesday, June 7, at 9 p.m. at the School Gymnasium.

'Udhailiyah — Thursday, June 8, (See "Blue Notes," Page 2)

The Islamic Heritage

The religion of Islam was revealed to the Prophet Muhammad in Mecca and Medina, in what is now Saudi Arabia. From here it spread throughout the Middle East and North Africa into Europe and the Far East. From it developed a wide and varied civilization which for centuries represented the higher form of contemporary culture.

The story of this culture, and the legacy it has left to the modern world, is told in a series of articles beginning here in *The Arabian Sun* and adapted from a booklet, *Islam and the World*, published by Kees Standard Library Inc. a few years ago. We begin with a chapter on Islamic engineering. Other chapters will deal with Islamic architecture, medicine, mathematics and astronomy, navigation and geography, horticulture, crafts, metallurgy, calligraphy, literature and music, and philosophy. A print of the motion picture film is available at the Public Relations film library.

(See story on Page 1)

"Hercules," the biggest derrick barge in the Gulf, dwarfs the tugs and supply boat beside it when viewed from directly overhead as, above, the vessel's 315-foot, 1,600-ton crane completes a lift at the new Zuluf GOSP-1. Adjacent to the main production platform at right is the jack-up barge "Windbroom VII," currently quartering 261 men at work on the electrical and mechanical hook-up.

Zuluf GOSP-1 Progress: 12 Lifts in 9 Days

Twelve "big lifts" accomplished in the nine days preceding April 7 — more than 5,000 tons in all — put into place the major components of Zuluf GOSP-1, Aramco's third offshore gas-oil separation plant to be installed within two years. Forecasts call for the GOSP to come on-stream in September.

Work offshore began in early January as the eight main piles of the production platform support structure were driven 60 feet into the seabed, and the insert piles, some going as deep as 250 feet, were drilled and grouted into place. Water depth is approximately 100 feet at the location, 40 miles

offshore from Safaniya and about two miles from Zuluf GOSP-2.

The new installation is a second-generation plant, a complete rebuilding of the original Zuluf GOSP-1 that in terms of the present operation had become obsolete. Until two years ago, old Zuluf-1 was the gathering station for all Zuluf-Marjan crude. In that capacity it has been superceded by Zuluf GOSP-2 — on-stream since last July — which is connected by 24-inch lines to both the new Zuluf GOSP-1 and Marjan GOSP-1. The production from all three GOSPs is pumped via a 48-inch pipeline to the onshore GOSP

facilities at Safaniya designed as the last stage of separation for the partially processed Arabian medium crude from these three single-stage plants.

As producing center for this northern offshore area, Zuluf GOSP-2 is Aramco's largest offshore gas-oil separation plant, and it was designed as the most extensively equipped. For this reason the design and criteria of Zuluf-2 served as a baseline for the new Zuluf-1. The new plant will operate similarly with two parallel trains, the crude to be degassed to 250 psig in either of two high-pressure production traps; the plant has similar vessels for removal of sand produced with the crude oil, and it has similar equipment for individual well testing. Furthermore, the new facility incorporates design elements that will minimize noise, reduce maintenance, provide adequate safety features, and prevent pollution of the surrounding environment.

In terms of design capacity, the new GOSP is rated at 450,000 barrels per day, larger by 50,000 bpd than the old Zuluf-1. Physically, it is 1,025 feet long overall, stretching from the 150 x 53-foot main platform to the smaller auxiliary platform where three gas turbine driven pumping units and one gas turbine generator are located, and (See "Zuluf GOSP-1," Page 8)

Chicago Trib Visitors

Chicago Tribune representatives visited Aramco last week for a tour of company facilities and a meeting with Aramco executive management. The group also visited Riyadh where they met with Saudi Arab Government officials. Shown above with Aramco Board Chairman John J. Killebrew, President Hugh H. Garner and other company officials are, from right, James Yarnall, rising correspondent; Stanton R. Cook, publisher; Clayton Kirkpatrick, editor-in-chief; and William Neillirk, national economics correspondent (hidden from view).
