Aquilion Four 3d Manual:

Radiomics in Gastric Cancer Bo Zhang, Damiano Caruso, 2023-12-28 Gastric cancer GC is one of the most common malignancies worldwide. It is particularly challenging due to common detection at the advanced stages of the diseases preventing potential therapeutic and treatment strategies for patients. Common forms of treatment include chemotherapy which has been found to improve the survival rate and overall quality of life for patients with unresectable locally advanced or at the metastatic stages of the disease. However, chemotherapy has also proven to cause significant side effects in some patients. Lymphatic metastasis has been found to be common in gastric cancer patients. Lymph vascular invasion (LVI) has been identified to be associated to the infiltration of tumor cells in the arteries, veins, or lymphatic vessels. This has been identified to prompt local recurrence and the distant metastasis of various tumors. This has led to the LVI status as an independent prognostic factor, and studies have found the occurrence of pathological LVI is associated with gastric cancer progression and linked to poor clinical prognosis and low survival rate. **Bulletin of the Osaka Medical College**, 2005

In addition, it discusses the development and application of computer-aided detection and diagnosis (CAD) systems in medical imaging. Also, there will be a special track on computer-aided diagnosis of COVID-19 by CT and X-ray images. Given its coverage, the book provides both a forum and a valuable resource for researchers involved in image formation, experimental methods, image performance, segmentation, pattern recognition, feature extraction, classifier design, machine learning, deep learning, radiomics, CAD workstation design, human-computer interaction, databases, and performance evaluation. **Applied Radiology**, 2004.
