Archaeological Chemistry Rsc Rsc Paperbacks:

Archaeological Chemistry A Mark Pollard, Carl Heron, 2007-10-31 The application of chemistry within archaeology is an important and fascinating area. It allows the archaeologist to answer such questions as what is this artefact made of, where did it come from and how has it been changed through burial in the ground, providing pointers to the earliest history of mankind. Archaeological Chemistry begins with a brief description of the goals and history of archaeological science and the place of chemistry within it. It sets out the most widely used analytical techniques in archaeology and compares them in the light of relevant applications. The book includes an analysis of several specific archaeological investigations in which chemistry has been employed in tracing the origins of or in preserving artefacts. The choice of these investigations conforms to themes based on analytical techniques and includes chapters on obsidian, ceramics, glass, metals and resins. Finally, it suggests a future role for chemical and biochemical applications in archaeology. Archaeological Chemistry enables scientists to tackle the fundamental issues of chemical change in the archaeological materials in order to advance the study of the past. It will prove an essential companion to students in archaeological science and chemistry, field and museum archaeologists and all those involved in conserving human artefacts.

Archaeological Chemistry (3rd Edition) A Mark Pollard, Carl Heron, Ruth Ann Armitage, 2017-01-16 Third edition of a comprehensive textbook ideal for students in archaeological science and chemistry, archaeologists and those involved in conserving human artefacts.

ARCHAEOLOGY - Volume I Donald L. Hardesty, 2010-06-15 Archaeology is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems (EOLSS) which is an integrated compendium of twenty-one Encyclopedias. Archaeology is a road for traveling into the past that is independent of and complementary to documents and memory. The archaeological record provides historical perspectives on variability and change in human life support systems with the potential for use in planning for future sustainable development. The Theme is organized into four different topics which represent the main scientific areas of the theme: Foundations of Archaeology, The Archaeology of Life Support Systems, World Cultural Heritage, Preserving Archaeological Sites and Monuments, which are then expanded into multiple subtopics each as a chapter. The first topic deals with historical, methodological and theoretical foundations of archaeology. The second topic explores the archaeological record of human life support systems and includes chapters on foraging, food production such as farming and nomadic lifestyles, civilizations, water management systems and sustainability. World cultural heritage is the third topic. Finally, the fourth topic covers the preservation of cultural memorials such as archaeological sites, landscapes and monuments. These two volumes are aimed at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers and Decision Makers, NGOs and GOs.

Conservation Science for the Cultural Heritage Evangelia A. Varella, 2012-12-15 Conservation Science is a rather innovative application of instrumental analysis with steadily increasing importance Although the first attempts for preserving material from the cultural heritage on a scientific basis are found in the 19th century pioneer chemistry years only the use of sophisticated physicochemical techniques results in effective identification and deterioration studies of monuments and objects and in reliable intervention procedures This volume allows to gain solid knowledge and improved skills on the ways separation schemes and diagnostic methodologies are applied in the safeguarding and authentication of tangible works of art as well as on the modes of implementing novel safeguarding practices built on well established principles such as the use of laser in the decontamination of objects All techniques are covered at a state of the art level while selected applications permit addressing major groups of materials and artefacts Conservation Science is nowadays taught at master s level in all developed countries and museum laboratories increasingly adopt scientific approaches in their restoration initiatives The book is intended as a valuable tool for students and professionals active in these frames In addition it provides an indispensable manual for participants in the specialized intensive courses which are systematically offered by the authors under the auspices of the relevant European network

Materiality, Techniques and Society in Pottery Production Daniel Alberó Santacreu, 2014-01-01 Daniel Alberó Santacreu presents a wide overview of certain aspects of the pottery analysis and summarizes most of the methodological and theoretical information currently applied in archaeology in order to develop wide and deep analysis of ceramic pastes The book provides an adequate framework for understanding the way pottery production is organised and clarifies the meaning and role of the pottery in archaeological and traditional societies The goal of this book is to encourage reflection especially by those researchers who face the analysis of ceramics for the first time by providing a background for the generation of their own research and to formulate their own questions depending on their concerns and interests The three part structure of the book allows readers to move easily from the analysis of the reality and ceramic material culture to the world of the ideas and theories and to develop a dialogue between data and their interpretation Daniel Alberó Santacreu is a Lecturer Assistant in the University of the Balearic Islands member of the Research Group Arqueo UIB and the Ceramic Petrology Group He has carried out the analysis of ceramics from several prehistoric societies placed in the Western Mediterranean as well as the study of handmade pottery from contemporary ethnic groups in Northeast Ghana

The Hammerum Burial Site Ulla Mannering,Tinna Mobjerg,Lise RAeder Knudsen,Hans Rostholm,2019-09-02 The Hammerum Burial Site is the story of a burial site told by more than 20 academics a fascinating combination of different archaeological and scientific studies analyzing individuals objects and context from different angles The site was named after the small modern day town of Hammerum 5 km east of Herning in the central part of Jutland Denmark As early as 1993 the museum investigated this burial site where seven inhumation graves emerged within a small area most of which turned out to be empty of finds Three of the graves did turn out however to contain well preserved organic material so they were removed as block samples in large wooden crates with a view to later excavation Thanks to a grant in 2009 from the Danish Cultural Agency s special pool for the conservation of objects of unique national importance the ENB pool a collaboration between the museum the Danish National Research Foundation Centre for Textile Research and the Conservation Centre in Vejle began These analyses show that grave 83 known as the Hammerum girls grave was a sensation All that remain of the deceased was her hair and her dress but it was the best preserved Danish Iron Age textile from an inhumation grave Therefore it offers an unique opportunity to analyse an object which in most cases has disappeared The analysis tells us an extraordinarily nuanced archaeological story of daily life and of pan European slow fashion a dress used in everyday life produced by carefully choosing fine fibres which together with the coiffure refers to a style recognizable throughout Europe and worn by a mobile well groomed well connected Iron Age female Moreover the preserved organic material permits us a rare glimpse of the grief of the bereaved We can see how they carefully wrapped the Hammerum Girl in skin and put blueberry twigs under her head before laying her to rest an act of compassion and mourning
