In an age of digital technologies, this work emphasizes the intimate relationship that exists between the drawing and its maker, the process between paper and mind. LaRaine Papa Montgomery, Professor of Architecture Graphics, Coordinator, Savannah College of Art and Design. This book contains a wealth of information on architectural graphic communication. My students have found this to be an invaluable resource for graphic presentation techniques ranging from traditional hand drawing to advanced computer graphics. It features an amazingly wide range of examples, including both student work and professional work by renowned architects. With the addition of a new chapter on portfolio design, this new edition illustrates the full gamut of graphic communication skills, from the conceptual sketch through the documentation of the final portfolio. Mark A. Pearson, AIA, LEED AP, Associate Professor of Architecture, College of DuPage. This book should be in the library of all architecture and design students as well as practicing professionals. The richness and variety of hand-drawn and digital illustrations by students and architects offers deep insight into the many drawing types and methods used today.
