A Handbook For The Field Assessment Of Land Degradation:

Handbook for the Field Assessment of Land Degradation Michael Stocking, Niamh Murnaghan, 2001 First Published in 2001 Routledge is an imprint of Taylor Francis an informa company A Handbook for the Field Assessment of Land Degradation Michael A Stocking, Niamh Murnaghan, 2013 With the increasing concern over rural livelihoods and the food security of poor communities in developing countries it is vital that land quality is maintained Yet land degradation is widespread and is lowering the productive capacity of the land in these countries. This practical handbook presents simple non technical indicators for assessing land degradation in the field Based on the perspective of the farmer the methods selected lend meaning to real farming situations helping the field professional to understand not only the impact of degradation but also the benefits to be gained from reversing it The handbook shows how to calculate indicators such as those of soil loss explains the interpretation of results and in particular how combinations of different indicators can give conclusive evidence of the severity of land degradation The focus of the book is firmly on understanding the farmer s interaction with the land and how environmental protection food security and the well being of rural land users may be assured With detailed figures photographs worked examples and sample forms based on assessment techniques validated by field professionals in Africa Asia and Latin America this will be an essential training manual will be invaluable for field workers in NGOs and in governmental and educational institutions It will also be of interest to researchers and academics in Advances in Understanding Soil Degradation Elmira Saljnikov, Lothar development environment and agriculture Mueller, Anton Lavrishchev, Frank Eulenstein, 2021-11-26 This book informs about knowledge gain in soil and land degradation to reduce or prevent it for meeting the mission of the Sustainable Developments Goals of the United Nations Essence extent monitoring methods and implications for ecosystem functioning of main soil degradation types are characterized in overview chapters and case studies Challenges approaches and data towards identification of degradation in the frame of improving functionality health and multiple ecosystem services of soil are demonstrated in the studies of international expert teams The book consists of five parts containing 5 12 single chapters each and 36 in total Parts are explaining I Concepts and Indicators II Soil Erosion and Compaction III Soil Contamination IV Soil Carbon and Fertility Monitoring and V Soil Survey and Mapping of Degradation The primary audience of this book are scientists of different disciplines decision makers farmers and further informed people dealing with sustainable management of soil and land

Proceedings of the Global Symposium on Soil Erosion Food and Agriculture Organization of the United Nations, 2019-10-15 The proceedings book of the Global Symposium on Soil Erosion GSER19 contains all papers presented both orally and in poster format during the symposium 15 17 May 2019 FAO HQ The papers presented have provided sufficient scientific evidence to show that soil erosion is a global threat to food production systems available land for future demand rural livelihoods human health and biodiversity and that coordinated effective action needs to be fostered and

accelerated to address this issue Studies presented provided scientific evidence that soil erosion is accelerated by anthropogenic action In the current context of population increase and climate change urgent action is needed from governments to support farmers and land users in the transition to sustainable production systems and crucial action is needed at global level to raise awareness of the importance of healthy and productive soils to ensure a sustainable future and the achievement of many of the SDGs targeting hunger water quality and life on land amongst others Interface Duncan McGregor, David Simon, Donald Thompson, 2012-04-27 Peri urban interfaces the zones where urban and rural areas meet suffer from the greatest problems to humans caused by rapid urbanization including intense pressures on resources slum formation lack of adequate services such as water and sanitation poor planning and degradation of farmland These areas home to hundreds of millions of people face unique problems and need distinctive and innovative approaches and solutions This book authored by top researchers and practitioners covers the full breadth and depth of the impacts of rapid urbanization on livelihoods poverty and resources in the peri urban zones in diverse African Asian Latin American and Caribbean contexts Topics include peri urban resource sustainability ecosystems and societies and environmental changes in peri urban zones Rich case studies cover production systems and livelihoods including the impacts of irrigated vegetable production horticulture dairy enterprises waste fed fisheries and pastoral livelihoods Also addressed are planning and development issues in the peri urban interface including the difficulty in achieving sustainability conflict and cooperation over resources and a fresh look at the relationship between people and their environment. The final part of the book presents policies and strategies for promoting and measuring sustainability in peri urban zones including community based waste management the co management of watersheds and empowerment of the poor This book is the most comprehensive examination of the challenges and solutions facing the people and environments of peri urban zones and is essential reading for all practitioners students and academics in geography and development The Soils of Chile Manuel Casanova, Osvaldo Salazar, Oscar Sequel, Walter Luzio, 2013-01-18 This book is intended for students and soil scientists who want to know about the state of the art in soil sciences in Chile The book merges a comprehensive bibliographical review of the soil surveys carried out throughout the length and breadth of Chilean territory during the past 40 years and more recent information obtained by the authors in a number of field studies As its starting point the book presents a general overview of important features related to Chilean soils such as geology and geomorphology climate land use and vegetation In this long and narrow country different soil formation factors and processes have resulted in a broad variety of soil bodies from the extremely arid Atacama desert to the Patagonian and Antarctic zones This book provides a description and classification mainly Soil Taxonomy of the most important soil types Particularly important are soils derived from volcanic materials which cover extensive areas of Chile The book also deals with soil management topics in relation to the chemical physical and biological properties of Chilean soils and it includes a number of examples from throughout the country Finally the book shows how

man has induced severe soil degradation problems in Chile such as erosive soil degradation non erosive soil degradation and land desertification African Landscapes Michael Bollig, Olaf Bubenzer, 2009-06-12 Landscape studies provide a crucial perspective into the interaction between humans and their environment shedding insight on social cultural and economic topics The research explores both the way that natural processes have affected the development of culture and society as well as the ways that natural landscapes themselves are the product of historical and cultural processes Most previous studies of the landscape selectively focused on either the natural sciences or the social sciences but the research presented in African Landscapes bridges that gap This work is unique in its interdisciplinary scope Over the past twelve years the contributors to this volume have participated in the collaborative research center ACACIA Arid Climate Adaptation and Cultural Innovation in Africa which deals with the relationship between cultural processes and ecological dynamics in Africa s arid areas The case studies presented here come from mainly Sahara Sahel and southwestern Africa and are all linked to broader discussions on the concept of landscape and themes of cultural anthropological geographical botanical sociological and archaeological interest The contributions in this work are enhanced by full color photographs that put the discussion in The Future of Drylands Cathy Lee, Thomas Schaaf, 2008-10-29 context visually Appropriate Technology ,2001 Drylands have been cradles to some of the world's greatest civilizations and contemporary dryland communities feature rich and unique cultures Dryland ecosystems support a surprising amount of biodiversity Desertification however is a significant land degradation problem in the arid semi arid and dry sub humid regions of the world Deterioration of soil and plant cover has adversely affected 70% of the world's drylands as a result of extended droughts as well as mismanagement of range and cultivated lands The situation is likely to worsen with high population growth rates and accompanying land use conflicts The contributions to The Future of Drylands an international scientific conference held under the leadership of UNESCO address these issues and offer practical solutions for combating desertification along with conserving and sustainably managing dryland ecosystems Major themes include the conservation of dryland biological and cultural diversity and the human dryland interface This volume documents how our improved understanding of drylands provides insight into the health and future prospects of these precious ecosystems that should help ensure that dryland communities enjoy a sustainable future

Agroecological Innovations Norman Uphoff,2013-06-17 The world's food supply needs to rise significantly yet both arable and water supplies per capita are decreasing Not only are modern agricultural methods beyond the reach of those suffering the greatest food insecurity but they are also ecologically damaging relying upon fossil energy and chemical inputs. This volume offers a collection of innovative and diverse approaches to agricultural development Documented in 12 case studies these approaches are reliant upon greater knowledge skill and labour input rather than larger capital expenditure. They are shown to increase yield substantially sometimes doubling or tripling output This volume presents the concepts and operational means for reorienting agricultural efforts towards these more environmentally friendly and socially desirable

approaches in the developed as well as developing world Landslides - Disaster Risk Reduction Kyoji Sassa, Philippo Canuti, 2008-11-07 This book documents the First World Landslide Forum which was jointly organized by the International Consortium on Landslides ICL eight UN organizations UNESCO WMO FAO UN ISDR UNU UNEP World Bank UNDP and four NGOs International Council for Science World Federation of Engineering Organizations Kyoto Univ and Japan Landslide Society in Tokyo in 2008 The material consists of four parts The Open Forum Progress of IPL Activities Four Thematic Lectures in the Plenary Symposium Global Landslide Risk Reduction Six Keynote Lectures in the Plenary session and the aims and overviews of eighteen parallel sessions dealing with various aspects necessary for landslide disaster risk reduction such as observations from space climate change and slope instability landslides threatening heritage sites the economic and social impact of landslides monitoring prediction and early warning and risk management strategies in urban area etc Thus it enables the reader to benefit from a wide range of research intended to reduce risk due to landslide disasters as presented in the first global multi disciplinary meeting Monitoring and Evaluation of Soil Conservation and Watershed Development Projects Jan de Graaff, 2019-04-29 This book provides diverse information and critical know how to implement appropriate methodology and cost efficient monitoring and evaluation systems better suited to assess the impacts of soil conservation and wastershed multi sectoral development activities It draws on a worldwide experience of specialists and a large array of ground truthing projects and programmes This book will meet its objective if it contributes to convince financing institutions and project managers that integrated watershed management activities have the potential to generate highly desirable impacts for the society at large which have to be accurately measured by adequate M E systems **Research and Management** Martin F. Price, 2013 This book brings together scientists and practitioners from five continents to present their experience in undertaking activities that contribute to our understanding and informed management of mountain areas In particular they address the challenges of working in interdisciplinary teams and of effectively involving stakeholders. The result is a powerful book that integrates research from different disciplines in the natural and social sciences and in some cases indigenous knowledge to address the question of how knowledge is gained about mountain areas and how can it be integrated and used in effective management A comprehensive introduction covers the challenges in mountain area research and management and the need for integrated approaches This is followed by chapters that look at key areas of mountain research and management over the past 25 years covering inter and trans disciplinary research subsistence cultures and sustainable development innovations in watershed management and biodiversity conservation Subsequent chapters cover key areas of research and management on five continents with a focus on comparison of common challenges and solutions across regions The concluding chapter brings these experiences together Published with Parks Canada Newsletter ,1995 *Environmental Degradation in Asia* Ayad M. Fadhil Al-Quraishi, Yaseen T. Mustafa, Abdelazim M. Negm, 2022-11-01 This unique book focuses on environmental degradation in

Asian countries including land degradation and soil erosion The land degradation covers assessing environmental degradation using geospatial technology land use land cover mapping environmental and anthropogenic degradation assessment of land degradation vulnerability evaluation of the impact of earthquake and the environmental control of the sand dunes It also addresses the soil degradation and environmental pollution and presents several case studies such as tectonic activity and erosion assessment of aircraft sound soil degradation assessment for the arid territories soil pollution waste engine oil contamination soil degradation soil erosion modelling land use and land cover change and its effect on soil erosion changes Additionally the book discusses the impact of climate change and human activities including urban environmental quality air pollution and the impact of armed conflict on the environment Moreover topics such as vegetation degradation including forest changes hydrological and agricultural drought are presented The book includes authors and scientists from Egypt Iraq Iran India Mongolia United Arab Emirates Uzbekistan Republic of Kazakhstan USA Turkey South Africa Italy China Malaysia Poland and Russia Graduate students researchers engineers policy planners policymakers and stockholders could benefit from the information and the knowledge in this book **Sustainable Management of** Headwater Resources Libor Jansky, Martin J. Haigh, Haushila Prasad, 2005 Headwaters are the source of freshwater resources the margins of drainage basins and the first and zero order basins that surround every catchment The challenge is to define appropriate self sustainable management strategies and structures for these lands which meet the needs of the headwater habitat including its human inhabitants and the needs of habitats downstream The contributors to this book strive to anticipate emerging and future problems to discover integrated solutions to the problems already caused by land degradation natural hazards and development processes and to help develop better land management environmental protection and landscape regeneration practices and policies They also address the many challenges that remain the concern for effective sharing of local experience in science and technology community participation the role of education effectiveness and limits of current technology the selection of appropriate policies and goals modes of effective management and the sustainability of current activities Sustainable Management of Headwater Resources provides an understanding of current and prior situations and provides scientific analyses of local and regional headwater issues in India and Africa The authors analyse the current situation through field experiments that provide reliable information on the status of headwater resources in these regions This book originates from the conference on Sustainable Management of Headwater Resources at the 5th International Conference on Headwaters in Nairobi Kenya

The Common Good and Ecological Integrity Laura Westra, Janice Gray, Antonio D'Aloia, 2016-05-20 Proponents of the concept of ecological integrity argue that it is a necessary component of global governance on which the sustainable future of the planet and its inhabitants depends This book presents the latest research and current thinking on the role of ecological integrity in support of life on Earth and the importance of governance for the common good or the benefit of all The book considers whether present forms of governance support the

common good or whether they are endangering its very foundations It explores the connection between consumerism and capitalism the destruction of natural resources and with it the elimination of many of the ecosystem services that support life in general and human life in particular Chapters focus on the defence of human rights and in particular the rights to key resources such as food water and general health wellbeing as well as energy and security Topics covered include climate change biodiversity migration and conflict resolution with approaches from various perspectives such as politics ethics sociology and law Overall the book provides a stimulating insight into the multifaceted debates surrounding ecological integrity global governance and sustainability Desertification and Land Degradation Ajai, Rimjhim Bhatnagar, 2022-03-30 Desertification and land degradation are complex phenomena and we need to understand their causes consequences and means to mitigate and combat their impact Therefore this book aims to explain the concept and characteristics of drylands desert and desertification land degradation wastelands and the concept of ecosystem services It also discusses various types of processes of land degradations their characteristics physics and indicators along with mapping monitoring and assessment of methods involved Concept of Ocean Biological Deserts is discussed along with international and regional efforts towards combating land degradation and desertification Key Features Provides all the aspect of desertification and land degradation at one place Includes comprehensive methods to monitor different desertification land degradation processes Comprehensive overview of the mapping monitoring and modelling techniques Role of space borne data in identifying monitoring and combating desertification is evaluated and reported with real case studies Explains the concept of ocean biological deserts Applied Geomorphology and Contemporary Issues Sujit Mandal, Ramkrishna their characteristics and mapping Maiti, Michael Nones, Heinz R. Beckedahl, 2022-09-03 The edited book deals with climate change and its response to river system which is one of the most burning issues of the Global environment Due to urbanization and industrialization land degradation and resource depletion are happening and promoting livelihood challenges in the world which is reflected in the book too The book addresses the construction of dams over large rivers and its possible consequences in the environment Changes of the hydrology and sedimentology are to be addressed in the book The climate change phenomena and associated geomorphic hazards and contemporary environmental issues such as sea level rise coastal flood drought wind erosion flood soil erosion landslide depletion of ground water coastal erosion etc are elaborated in the book with suitable methods and techniques So this edited book will contribute a lot to general to particular filed of studies and will help to geographers geomorphologists environmentalists planners policy makers and developers for studies and promoting regional plans and Handbook for saline soil management Food and Agriculture Organization of the United development Nations, 2018-07-18 This handbook has been prepared for the training workshop on innovative methods of amelioration and use of salt affected soils which takes place in Kharkiv Ukraine in September 2017 This workshop is conducted within the framework of the Implementation Plan of the Eurasian Soil Partnership which is a sub regional affiliation of the Global Soil

Partnership The main goals of the Global Soil Partnership GSP and Regional Soil Partnerships RSPs include the development of global and regional plans of action for the sustainable management and monitoring of limited soil resources as a key element as well as the maintenance of food security and ecological services of soils The RSPs rely on the existing regional networks that connect the national and local networks partners projects and measures to ensure that the interests of all member countries of the partnership are taken into account A RSP should give directives for the development of regional targets priorities and requred mechanisms of implementation and also undertake regular assessments of progress in reaching goals and accomplishing the tasks The Eurasian Region covers Eastern Europe Central Asia and Caucasus and includes the following countries Armenia Azerbaijan Belarus Georgia Kazakhstan Kyrgyzstan Moldova Russia Tajikistan Turkey Turkmenistan Ukraine and Uzbekistan The Eurasian Region is diverse in terms of climatic conditions soils flora and fauna land use and human activities Soil degradation is a serious problem within this region with its most destructive consequences including salinization erosion loss of soil organic matter nutrients and biodiversity as well as soil compaction Soil salinization presents a serious challenge that requires co ordination between countries that share common water and land resources International co operation is also needed to attract and manage investment into water and land resources It should be emphasized that salinization is both the cause and the result of other agricultural problems Combating salinization should together with other measures for achieving the sustainable intensification of agriculture be considered as a basis for food security
