CURRENT NOTES: A SERIES OF ARTICLES ON ANTIQUITIES, BIOGRAPHY, HERALRY, HISTORY, LANGUAGES, LITERATURE, NATURAL HISTORY, CURIOUS CUSTOMS, ETC. G. WILLIS,1854 **Architectural Type and Character** Samir Younés,Carroll William

Westfall,2022-01-31 Architectural Type and Character provides an alternative perspective to the current role given to history in architecture reunifying architectural history and architectural design to reform architectural discourse and practice

Historians provide important material for appreciating buildings and guiding those who produce them In current histories a building is the product of a time its form follows its function irresistible influences produce it and style preferably novel is its most important attribute This book argues for an alternative Through a two part structure the book first develops the theoretical foundations for this alternative history of architecture The second part then provides drawings and

interpretations of over one hundred sites from different times and places Architectural Type and Character A Practical Guide to a History of Architecture is an excellent desk reference and studio guide for students and architectures alike to understand analyze and create buildings **Architecture and Embodiment** Harry Francis Mallgrave,2013-06-26

In recent years we have seen a number of dramatic discoveries within the biological and related sciences Traditional arguments such as nature versus nurture are rapidly disappearing because of the realization that just as we are affecting our environments so too do these altered environments restructure our cognitive abilities and outlooks If the biological and technological breakthroughs are promising benefits such as extended life expectancies these same discoveries also have the potential to improve in significant ways the quality of our built environments This poses a compelling challenge to conventional architectural theory This is the first book to consider these new scientific and humanistic models in architectural terms

Constructed as a series of five essays around the themes of beauty culture emotion the experience of architecture and artistic play this book draws upon a broad range of discussions taking place in philosophy psychology biology neuroscience and anthropology and in doing so questions what implications these discussions hold for architectural design Drawing upon a wealth of research Mallgrave argues that we should turn our focus away from the objectification of architecture treating design as the creation of objects and redirect it back to those for whom we design the people inhabiting our built environments **World Architecture and Society** Peter Louis Bonfitto,2021-12-06
