Invisible Residents Ivan T. Sanderson,2005 This book is a groundbreaking contribution to the study of the UFO enigma originally published over 30 years ago. In this book Sanderson, a renowned zoologist with a keen interest in the paranormal, puts forward the curious theory that the OINTS (Other Intelligences) live under the Earth's oceans. This underwater parallel civilization may be twice as old as Homo sapiens, he proposes, and may have developed what we call space flight. Sanderson postulates that the OINTS are behind many UFO sightings as well as the mysterious disappearances of aircraft and ships in the Bermuda Triangle. What better place to have an impenetrable base than deep within the oceans of the planet? Yet if UFOs or at least some of them are coming from beneath our oceans or lakes, does it necessarily mean that there is another civilization besides our own that is responsible? In fact, could it be that since WWII a number of underwater UFO bases have been constructed by the very human governments of our planet? Whatever their source, Sanderson offers here an exhaustive study of USOs (Unidentified Submarine Objects) observed in nearly every part of the world. He presents many well-documented and exciting case studies of these unusual sightings.

He continues north to west Texas, delving into the mysteries of Big Bend, including mysterious Phoenician tablets discovered there and the strange lights of Marfa. In Arizona, he investigates tales of Egyptian catacombs in the Grand Canyon, cruises along the Devil's Highway, and tackles the century-old mystery of the Superstition Mountains and the Lost Dutchman mine. In Nevada and California, Childress checks out the rumors of mummified giants and weird tunnels in Death Valley, plus he searches the Mohave Desert for the mysterious remains of ancient dwellers alongside lakes that supposedly dried up tens of thousands of years ago.
