

Sistema de proteção de três estágios

Este sistema compreende:

- **Primeiro estágio (cintos de segurança de três pontos):** em pequenos acidentes envolvendo impacto frontal e durante frenagem brusca os dispositivos automáticos do cinto de segurança prendem ao banco os ocupantes que estiverem utilizando os cintos de segurança.
- **Segundo estágio (tensionadores dos cintos de segurança do motorista e passageiro dianteiro):** em sequência ao acionamento dos cintos de segurança os tensionadores dos cintos dos bancos dianteiros são acionados, puxando os fechos dos cintos para baixo, reduzindo ou eliminando folgas entre o cinto e o corpo dos ocupantes dos bancos dianteiros.

- **Terceiro estágio ("Air bag" para o motorista e passageiro dianteiro):** em colisões frontais sérias, quando ocorre o acionamento do sistema "Air bag", reduz as chances de colisão dos ocupantes dos bancos dianteiros com o volante, painel de instrumentos ou pára-brisa.

⚠ Atenção! O sistema de "Air bag" serve para completar o sistema de cintos de segurança de três pontos e tensionadores do cinto. Portanto, os cintos de segurança devem sempre ser usados pelos ocupantes do veículo, independente do veículo ser equipado ou não com o sistema de "Air bag".

Cintos de segurança

⚠ Atenção!

- Todos os ocupantes do veículo devem usar cintos de segurança. Os ferimentos causados por colisão poderão ser muito piores se você não estiver usando o cinto de segurança. Você poderá colidir com objetos no interior do veículo ou ser atirado para fora dele.
- Um cinto que tenha sido sujeito a esforços como, por exemplo, num acidente, deverá ser substituído por um novo.

📌 Nota Antes de fechar a porta, certifique-se de que o cinto esteja fora do curso desta. Se o cinto ficar preso na porta, poderá haver danos a ele e ao veículo.

Advanced Techniques in Liposuction and Fat Transfer Nikolay Serdev, 2011-09-12 Liposuction is the first cosmetic procedure to change beautification surgery from open extensive excision surgery into a more atraumatic closed one. It gave rise to the modern understanding of minimally scarring and minimally invasive surgery and changed the understanding and preferences of both patients and doctors. It also became the most common procedure in cosmetic surgery world wide practiced by an increased number of physicians from various specialties. The techniques of fat grafting closely bound with liposuction have found widespread application and fat stem cells seem to be changing the future of many areas in medicine. Turning the pages the reader will find a lot of information about advances, tips and tricks as well as important milestones in the development of the different methods available such as classic power ultrasound laser and radio frequency assisted liposuction etc. Most useful anesthesia techniques are described and discussed and guidelines have been established for medical indications. Special attention is paid to good patient selection, complications and risks. Technical as well as clinical aspects of digital and digitized coronarography, morphometry, parametric imaging and functional quantification of the human coronary circulation were presented and discussed by prominent exponents of those groups who have been active in this particular field for many years. This book contains the chapters representing the lectures held by leading experts during the symposium that update the knowledge currently available including most recent aspects in angiography and intravascular ultrasound imaging. It also includes a historical review on the development of angiographic techniques from the very early days on to our times given by one of the pioneers in heart catheterization and angiography Dr Kurt Amplatz. Those who had the chance to listen to his talk will surely remember his impressive humorous lecture as one of the highlights of this meeting. *Australian National Bibliography: 1992* National Library of Australia, 1988. *PC Mag*, 1996-12-03 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services.
