ECINEQ meeting *The Politics and Governance of Basic Education* Brian Levy, Robert Cameron, Ursula Hoadley, Vinodhan Naidoo, 2018-09-05 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. *The Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re-orient the system towards learning.

Law, Development and Regulatory Globalisation Adithya Chintapanti, 2023-12-08 Exploring the phenomenon of diffusion of legal norms accompanying economic globalisation in developing countries, this book examines the blanket imposition of standard regulatory templates maintaining that every jurisdiction requires customised legal solutions. Adopted by over 80 developing jurisdictions, the World Bank's 1993 regulatory template for electricity sector reform has been one of the most widely diffused regulatory models. This book uses the example of its implementation in India to address the more general process of regulatory globalisation for developing countries. Amongst other objectives, the World Bank's template endeavoured to insulate economic decision making from politics through legal reform. Through this template, the World Bank endeavoured to transform the role of the Indian state in the electricity sector from an interventionist or welfare state to a neo-liberal regulatory state by imposing constitution-like obligations. The book demonstrates that the unique social, economic and political characteristics of a jurisdiction cannot be ignored when incorporating a regulatory template in a jurisdictional context, for by influencing the way an external regulatory model is internalized, it is these characteristics that determine its outcome. Providing a detailed empirical analysis of this key aspect of development policy, this book will be of interest to scholars and students in the fields of law and development, politics and public administration, as well as development practitioners and policy makers involved in reforming sector regulatory frameworks in their countries.
