Latino Politics en Ciencia Política Tony Affigne, Evelyn Hu-DeHart, Marion Orr, 2014 More than 53 million Latinos now constitute the largest fastest growing and most diverse minority group in the United States and the nation's political future may well be shaped by Latinos continuing political incorporation In the 2012 election Latinos proved to be a critical voting bloc in both Presidential and Congressional races this demographic will only become more important in future American elections Using new evidence from the largest ever scientific survey addressed exclusively to Latino Hispanic respondents Latino Politics en Ciencia Política explores political diversity within the Latino community considering how intra community differences influence political behavior and policy preferences The editors and contributors all noted scholars of race and politics examine key issues of Latino politics in the contemporary United States Latino identities latinidad transnationalism acculturation political community and racial consciousness The book contextualizes today's research within the history of Latino political studies from the field's beginnings to the present explaining how systematic analysis of Latino political behavior has over time become integral to the study of political science Latino Politics en Ciencia Política is thus an ideal text for learning both the state of the field today and key dimensions of Latino political attitudes

Artificial Intelligence in Pathogenic Microorganism Research Chen Li, Yu-Dong Yao, Marcin Grzegorzek, 2025-05-26 Infections caused by pathogenic microorganisms including bacteria viruses fungi and other eukaryotic microbes seriously threaten human health Traditional research methods and laboratory techniques have many limitations and focus more on the identification and classification of pathogenic microorganisms In recent years technologies such as whole genome sequencing and advanced bioinformatics analysis have promoted the research of pathogenic microorganisms However with the interplay of multiple factors like global climate change ecological and environmental changes urbanization social behavior and lifestyle changes pathogenic microorganisms transmission patterns and impact scope are gradually changing There is an urgent need for multidimensional technological approaches to achieve epidemiological monitoring and evolutionary direction prediction of pathogenic microorganisms Additionally more robust data processing and analysis capabilities are required for rapid identification and diagnosis monitoring of drug resistance

development of antimicrobial drugs and vaccines and optimization of treatment plans Therefore Artificial Intelligence AI has entered our field of vision In the field of pathogenic microorganisms AI has shown tremendous potential In epidemiological research AI technology can quickly and automatically collect integrate and analyze the epidemic data of infectious diseases from different regions so as to predict the trend and scope of disease transmission and track the source of infection In the process of diagnosis and treatment of infectious diseases machine learning can not only analyze the microscopic images of pathogens but also analyze the genome sequences of multiple pathogens in a short time and predict their sensitivity or resistance to specific antibiotics greatly improving the efficiency and accuracy of diagnosis and treatment of infectious diseases In drug or vaccine development researchers can use AI models to predict efficient antigens for diseases such as HIV and influenza and thus design more effective vaccine candidates AI models can also analyze the interactions between drugs pathogens and patients in order to design the optimal dosing regimen for each patient In a word AI can help human beings better deal with infectious diseases We welcome original reviews articles and other contributions in related fields which mainly include the following aspects 1 The application of AI in the differential diagnosis of pathogenic microorganisms 2 The application of AI in the formulation of anti infection treatment plans 3 The application of AI in monitoring and predicting the prevalence of pathogenic microorganisms 4 Application of AI in the prediction and prevention of infectious diseases caused by pathogenic microorganisms 5 The application of AI in the research and development of anti infective drugs and vaccines
