Destroy the Copy - Plaster Cast Collections in the 19th-20th Centuries Annetta Alexandridis, Lorenz Winkler-Horaček, 2022-09-06
Based on two international conferences held at Cornell University and the Freie Universit t of Berlin in 2010 and 2015 this volume is the first ever to explicitly address the destruction of plaster cast collections of ancient Mediterranean and Western sculpture
Focusing on Europe the Americas and Japan art historians archaeologists and a literary scholar discuss how different museum and academic traditions national as well as disciplinary notions of value and authenticity or colonialism impacted the fate of collections
The

texts offer detailed documentation of degrees of destruction by spectacular acts of defacement demolition discarding or neglect They also shed light on the accompanying discourses regarding aesthetic ideals political ideologies educational and scholarly practices or race With destruction being understood as a critical part of reception the histories of cast collections defy the traditional homogenous narrative of rise and decline Their diverse histories provide critical evidence for rethinking the use and display of plaster cast collections in the contemporary moment *New Perspectives on Procrastination, Volume II* Frode Svartdal,Piers Steel,2022-09-13 Towards a Psychophysiological Approach in Physical Activity, Exercise, and Sports Pedro Forte,Daniel Leite Portella,Diogo Monteiro,José Eduardo Teixeira,2023-10-30 In recent years there has been an increase in interest in mental health disorders as a result of mediatic coverage of Olympic athletes mental health struggles and also due to the COVID 19 pandemic lockdowns These phenomena helped to further exacerbate a problem already extensively present in sport and society Therefore applying a psychophysiological approach to physical activity exercise and sports research has become very popular Indeed mental fatigue and mental disorders are not only psychological in origin but also require an explanation from a psychophysiological perspective due to the effective interconnection between the psychological and physiological dimensions Psychological variables can also influence performance and the psychophysiological system has a strong effect on the control of physical capacities Moreover pacing behaviour decision making self regulation and effort perception can also explain the role of the brain in physical activity and exercise management Thus the aim of this Research Topic is to share the impact of a psychophysiological approach in physical activity exercise and sports **Exploring Data: An Introduction to Data Analysis for Social Scientists** Jane; Marsh Elliott (Catherine),2009 Report of the Commissioner of Education Made to the Secretary of the Interior for the Year ... with Accompanying Papers United States.
