MK Spectral Classifications ,1980 *Fundamental and Applied Aspects of Modern Physics* Simon H. Connell,Rudolph Tegen,2001 This volume is a compilation of significant papers by leading scientists exploring exciting frontiers of physics It presents the latest results in well defined fields as well as fields represented by the interfaces between mainstream sciences G t Hooft is the 1999 Nobel Laureate in Physics and A Richter is the Stern Gerlach prize recipient of 2000 **Molecular Genetics of Recombination** Andrés Aguilera,Rodney Rothstein,2007-04-24 This work offers a fascinating insight into a crucial genetic process Recombination is quite simply one of the most important topics in contemporary biology This book is a totally comprehensive treatment of the subject summarizing all existing views on the topic and at the same time putting them into context It provides in depth and up to date analysis of the chapter topics and has been written by international experts in the field *Plant & Control Engineering* ,2002 **Proceedings of the ... Conference on the Design of Experiments in Army Research, Development and Testing** ,1975 Lloyd's Register of Yachts 1889 Lloyd's Register Foundation,1889-01-01 The Lloyd s Register of Yachts was first issued in 1878 and was issued annually until 1980 except during the years 1916 18 and 1940 46 Two supplements containing additions and corrections were also issued annually The Register contains the names details and characters of Yachts classed by the Society together with the particulars of other Yachts which are considered to be of interest illustrates plates of the Flags of Yacht and Sailing Clubs together with a List of Club Officers an illustrated List of the Distinguishing Flags of Yachtsmen a List of the Names and Addresses of Yacht Owners and much other information For more information on the Lloyd s Register of Yachts please click here <https://www.lloydregister.com/> **Meiosis** R. Benavente,J. -N. Volff,2009 Meiosis is a key event in the life of all sexually reproductive organisms As a consequence of recombination and segregation of maternal and paternal sets of chromosomes it represents the largest natural source of genetic variability The field of meiosis research is expanding rapidly with significant progress resulting from the use of suitable model systems as well as from the identification and characterization of proteins many of them meiosis specific which play a key role during meiotic events This volume provides the reader with a series of authoritative review articles summarizing some of the most recent advances in the field of meiosis research Most of the more commonly used model systems are investigated taking the comparative aspects into account Written by leading experts in the field the book is a valuable reference for researchers and graduate students in genetics cell and developmental biology reproductive biology and andrology Lloyd's Register of British and Foreign Shipping ,1878 Seismic Attributes for Prospect Identification and Reservoir Characterization Satinder Chopra,K. J. Marfurt,2007 Introducing the physical basis mathematical implementation and geologic expression of modern volumetric attributes including coherence dip azimuth curvature amplitude gradients seismic textures and spectral decomposition the authors demonstrate the importance of effective color display and sensitivity to seismic acquisition and processing Seismic attributes

play a key role in exploration and exploitation of hydrocarbons In *Seismic Attributes for Prospect Identification and Reservoir Characterization* SEG Geophysical Developments No 11 the authors introduce the physical basis mathematical implementation and geologic expression of modern volumetric attributes including coherence dip azimuth curvature amplitude gradients seismic textures and spectral decomposition The authors demonstrate the importance of effective color display and sensitivity to seismic acquisition and processing Examples from different basins illustrate the attribute expression of tectonic deformation clastic depositional systems carbonate depositional systems and diagenesis drilling hazards and reservoir characterization The book is illustrated generously with color figures throughout *Seismic Attributes* will appeal to seismic interpreters who want to extract more information from data seismic processors and imagers who want to learn how their efforts impact subtle stratigraphic and fracture plays sedimentologists stratigraphers and structural geologists who use large 3D seismic volumes to interpret their plays within a regional basinwide context and reservoir engineers whose work is based on detailed 3D reservoir models Copublished with EAGE *Sequential Intelligent Dynamic System Modeling and Control* Hai-Jun Rong,Zhao-Xu Yang,2024-07-05 The book offers novel research results of sequential intelligent dynamic system modeling and control in a unified framework from theory proposals to real applications It covers an in depth study of various learning algorithms for the permanent adaptation of intelligent model parameters as well as of structural parts of the model The comprehensive researches on sequential fuzzy and neural controller design schemes for some complex real applications are included This is particularly suited for readers who are interested to learn practical solutions for controlling nonlinear systems that are uncertain and varied at any time In addition the organization of the book from addressing fundamental concepts and presenting novel intelligent models to solving real applications is one of the major features of the book which makes it a valuable resource for both beginners and researchers wanting to further their understanding and study about realtime online intelligent modeling and control of nonlinear dynamic systems The book can benefit researchers engineers and graduate students in the fields of control engineering artificial intelligence computational intelligence intelligent control nonlinear system modeling and control etc *The Impact of Binary Stars on Stellar Evolution* Giacomo Beccari,Henri M. J. Boffin,2019-04-18 An advanced review of how binary stars affect stellar evolution presenting results from state of the art models and recent observations *Insulin-like Growth Factors, Somatomedins* E. Martin Spencer,1983 Satellite symposium to the 11th Congress of the International Diabetes Federation Pref **Intelligent Innovations in Multimedia Data Engineering and Management** Bhattacharyya, Siddhartha,2018-09-07 With the ever increasing volume of data proper management of data is a challenging proposition to scientists and researchers and given the vast storage space required multimedia data is no exception in this regard Scientists and researchers are investing great effort to discover new space efficient methods for storage and archiving of this data *Intelligent Innovations in Multimedia Data Engineering and Management* provides emerging research exploring the theoretical and practical aspects of storage

systems and computing methods for large forms of data Featuring coverage on a broad range of topics such as binary image fuzzy logic and metaheuristic algorithms this book is ideally designed for computer engineers IT professionals technology developers academicians and researchers seeking current research on advancing strategies and computing techniques for various types of data Lloyd's Register of British and Foreign Shipping ,1964 **Computer Vision Technology for Food Quality Evaluation** Da-Wen Sun,2011-04-28 The first book in this rapidly expanding area Computer Vision Technology for Food Quality Evaluation thoroughly discusses the latest advances in image processing and analysis Computer vision has attracted much research and development attention in recent years and as a result significant scientific and technological advances have been made in quality inspection classification and evaluation of a wide range of food and agricultural products This unique work provides engineers and technologists working in research development and operations in the food industry with critical comprehensive and readily accessible information on the art and science of computer vision technology Undergraduate and postgraduate students and researchers in universities and research institutions will also find this an essential reference source Discusses novel technology for recognizing objects and extracting quantitative information from digital images in order to provide objective rapid non contact and non destructive quality evaluation International authors with both academic and professional credentials address in detail one aspect of the relevant technology per chapter making this ideal for textbook use Divided into three parts it begins with an outline of the fundamentals of the technology followed by full coverage of the application in the most researched areas of meats and other foods fruits vegetables and grains

emerges as a pivotal player in data mining and machine learning At its core clustering seeks to unveil heterogeneous groups within unlabeled data representing a crucial unsupervised task in machine learning The objective is to automatically assign labels to each unlabeled datum with minimal human intervention Analyzing this data allows for categorization and drawing conclusions applicable across diverse application domains The challenge with unlabeled data lies in defining a quantifiable goal to guide the model building process constituting the central theme of clustering This book presents concepts and different methodologies of data clustering For example deep clustering of images semi supervised deep clustering deep multi view clustering etc This book can be used as a reference for researchers and postgraduate students in related research background

Diagnostic Imaging in Medicine Richard C. Reba, David J. Goodenough, H.F. Davidson, 2012-12-06 An Advanced Study Institute on Ultrasonics in Medical Diagnosis was held in Milan Italy from 10 to 15 June 1974 This ASI was of a short five day duration and limited to cardiac diagnosis by ultra sound only Since that time the field of diagnostic imaging in medicine has literally exploded with new and improved means of medical diagnosis such as computed tomography microwaves nuclear magnetic resonance and other sophisticated techniques These developments have enabled medical practitioners to make diagnoses with a minimum of danger to the patient and a maximum of accuracy never before possible and represent a multi quantum advance over the early state of the art presented at the 1974 ASI Since then several meetings have taken place on these individual topics to bring together experts who presented their latest research results but none have discussed the entire field of diagnostic imaging in medicine in one meeting nor have they had the teaching character of an Advanced Study Institute The art and science of medicine have been altered repeatedly during the eight year interval since the last ASI Today s clinician must be part technologist and must be enough of an investigator to understand and appreciate the scientific method The current complex advances in instrumentation and pharmacology have had a marked effect on how medicine is practiced There was therefore an urgent need to bring the entire field of imaging in medicine to one teaching podium where the many advances of the last six or seven years could be reviewed
