Peer-to-peer Accommodation and Community Resilience Anna Farmaki, Dimitri Ioannides, Stella Kladou, 2022-03-16

The growth of peer to peer P2P accommodation has been remarkable. However, the rapid expansion of the phenomenon has yielded several concerns over its potentially negative economic, social, and environmental impacts. These impacts are highlighted in policy agendas as an emerging problem encountered by many local communities in destinations experiencing a boom in P2P accommodation. Specifically, concerns have been raised over the impact of the growth of P2P accommodation on local housing markets, residents' well-being, and the environment as a result of the touristification of residential areas. In fact, many observers accuse P2P accommodation of fuelling the overtourism problem that several destinations face. This edited book addresses the need to examine the P2P accommodation phenomenon from a community resilience lens. In particular, through a collection of chapters presenting a range of empirical and conceptual perspectives from urban and rural communities, the book considers the implications of P2P accommodation growth on the resilience of local communities and the sustainable development of places. Hospitality, Home and Life in the Platform Economies of Tourism Maartje

Roelofsen, 2022-05-20. This book explores how digital platforms in the realm of tourism and hospitality have shaped social and material worlds. Based on extensive ethnographic fieldwork with hosts and guests, the book analyses the impacts of platforms on the scale of the city, the home, and the everyday life of individuals. The book first situates platforms within the broader history of digital developments in tourism and questions what is essentially new about these socio-technical formations. The following chapters demonstrate how platforms have affected urban housing, challenged the tourism sector, and transformed understandings of hospitality and home. This is illustrated through a case study of Airbnb's development and impact in Sofia, Bulgaria. The final chapters of the book reflect on the political dimensions of datafication processes and digital systems of measurement that underpin the platform's workings, showing how the platform economies of tourism benefit their users in highly uneven ways.

Airbnb, Short-Term Rentals and the Future of Housing Lily M. Hoffman, Barbara Schmitter Heisler, 2020-11-03. How do Airbnb and short-term rentals affect housing and communities? Locating the origins and success of Airbnb in the conditions wrought by the 2008 financial crisis, the authors bring together a diverse body of literature and construct case studies of cities in the US, Australia, and Germany to examine the struggles of local authorities to protect their housing and neighborhoods from the increasing professionalization and commercialization of Airbnb. The book argues that the most disruptive impact of Airbnb and short-term rentals has been on housing and neighborhoods in urban centers where housing markets are stressed. Despite its claims, Airbnb has revealed itself as platform capitalism incentivizing speculation in residential housing. At the heart of this trajectory is its business model and control over access to data. In a first narrative, the authors discuss how Airbnb has institutionalized short-term rentals, consequently removing long-term rentals, contributing to rising rents and changing neighborhood milieus as visitors replace long-term residents. In a second narrative, the authors

trace the transformation of short term rentals into a multibillion dollar hybrid real estate sector promoting a variety of flexible tenure models While these models provide more options for owners and investors they have the potential to undermine housing security and exacerbate housing inequality While the overall effects have been similar across countries and cities depending on housing systems local response has varied from less restrictive in Australia to increasingly restrictive in the United States and most restrictive in Germany Although Airbnb has made some concessions it has not given any city the data needed to efficiently enforce regulations making for costly externalities Written in a clear and direct style this volume will appeal to students and scholars in Urban Studies Urban Planning Housing and Tourism Studies **The Elgar Companion to Corporate Social Responsibility and the Sustainable Development Goals** Samuel O. Deconstructing Digital Capitalism and the Smart Society Mel van Elteren, 2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future
