**High Performance and Optimum Design of Structures and Materials** W. P. De Wilde, S. Hernández, C. A. Brebbia, 2014-06-09 The use of novel materials and new structural concepts nowadays is not restricted to highly technical areas like aerospace aeronautical applications or the automotive industry but affects all engineering fields including those such as civil engineering and architecture Addressing issues involving advanced types of structures particularly those based on new concepts or new materials and their system design contributions highlight the latest developments in design optimisation manufacturing and experimentation Also included are contributions on new software numerical methods and different optimisation techniques Optimisation problems of interest involve those related to size shape and topology of structures and materials Most high performance structures require the development of a generation of new materials which can more easily resist a range of external stimuli or react in a non conventional manner Particular emphasis is placed on intelligent structures and materials as well as the application of computational methods for their modelling control and management Optimisation techniques have much to offer to those involved in the design of new industrial products The formulation of optimum design has evolved from the time it was purely an academic topic able now to satisfy the requirements of real life prototypes The development of new algorithms and the appearance of powerful commercial computer codes with easy to use graphical interfaces have created a fertile field for the incorporation of optimisation in the design process in all engineering disciplines This proceedings volume is the first from a new edition of the High Performance Design of Structures and Materials and the Optimum Design of Structures conferences which follows the success of a number of meetings that originated in 1989 Topics covered include Composite materials Material characterisation Experiments and numerical analysis Steel structures High performance concretes Natural fibre composites Transformable structures Lightweight structures Timber structures Environmentally friendly and sustainable structures Emerging structural applications Optimisation in civil engineering Evolutionary methods in optimisation Shape and topology optimisation Aerospace structures Structural optimisation Biomechanics application Material optimisation Life cost optimisation Intelligence structures and smart materials

**Ownership Structure Effects on Financial Performance** Temesgen Kabeta, Manduku Daniel Ogwoka, Damaris W. W. Muhika, Zulekha Ndurukia, Fredrick Kiprop Lagat, 2023-02-08 TOPICS IN THE BOOK Review of Microfinance and Women Empowerment in Ethiopia Influence of Ethical Investor Relations on the Financial Performance of Listed Firms in Kenya Influence of Tax Compliance Requirement on Formalizing Small and Medium Enterprises in Kenya The Determinants of Demand for Micro Insurance Services in Kenya

Effects of the Ownership Structure on the Relationship between Risk Management Practices and Financial Performance of Financial Institutions in Kenya      **Proceedings of ISES World Congress 2007 (Vol.1-Vol.5)** D. Yogi Goswami, Yuwen Zhao, 2009-09-01 ISES Solar World Congress is the most important conference in the solar energy field around the world The subject of ISES SWC 2007 is Solar Energy and Human Settlement it is the first time that it is held in China This book consists of 619 papers and 23 invited papers whose authors are top scientists and experts in the world ISES SWC 2007 covers all aspects of renewable energy including PV collector solar thermal electricity wind biomass energy and so on Therefore many papers cover more than one research area and bring forward new cross disciplinary technology including BIPV solar hydrogen production and polytechnic system which bring forth the state of art of solar energy technology      **From AIDS to Population Health** James D. Kelly, 2022-11-22 From AIDS to Population Health explores the thirty year history of a unique collaboration between the medical schools of Indiana University and Moi University in Kenya as it progressed from combating the HIV AIDS epidemic in East Africa to the building of a national plan to provide universal healthcare to all The Academic Model Providing Access to Healthcare AMPATH program focuses on the medical education of healthcare professionals who are building communities that can take care of themselves The overwhelming success of the AMPATH program and its continuing vibrant legacy today are showcased through dozens of striking photographs telling interviews and revealing anecdotes and encounters It focuses on four of the most innovative projects among the fifty that AMPATH oversees a microfinance officer who organizes villagers an oncology nurse who runs outreach clinics a farm extension agent working in partnership with a multinational agriculture corporation to improve farm output and a special healthcare clinic exclusively for adolescents Over its thirty year history AMPATH has served more than a million clients and trained 2 600 medical professionals and community health workers always guided by its motto Leading with Care From AIDS to Population Health presents their compelling stories and explores the program s continuing legacy for the first time      Emerging Infectious Diseases ,2016      **Internationalisation of African Higher Education** Chika Sehoole, Jane Knight, 2013-10-30 The role of higher education especially the international dimension is given little importance in the discourse on achieving the Millennium Development Goals MDGs in Africa This book aims to change that The potential of higher education s contribution to Africa s development remains unrealized and often misunderstood In today s globalised world which prioritises economic growth through liberalised trade and competitive market strategies much emphasis has been placed on higher education s ability to produce graduates to serve the labour market and produce new knowledge for the knowledge economy While these are important contributions the book argues that international higher education and new knowledge must go beyond economic purposes and serve the human and social development needs of the continent It is against this background that the African Network for the Internationalisation of Education ANIE undertook research on the international dimension of higher education in Africa and its role in the achievement of the MDGs Through empirical research seven case

studies address how international and regional higher education programmes and policies in African universities can address MDG priorities of promoting gender equality and women s empowerment combating HIV AIDS and establishing global partnerships for development through academic mobility joint research initiatives curriculum innovation and policy development

### **Global Bioethics - Current Challenges, New Developments, and Future Directions**

Peter Clark,2025-07-30 The main strength of this book lies in its examination of the challenges facing the field of bioethics today from multiple perspectives including medical ethical legal social and financial A critical exchange of ideas among professionals in interdisciplinary fields enables all individuals to learn from and benefit from their far reaching insights gained through personal and professional experiences in the fields of medicine and research Examining these complex issues ranging from the future of euthanasia and ethical concerns in neurotechnologies to regulations on patented genetic materials and the spread of bird flu presents viable paradigms for all healthcare professionals who confront these issues today and in the future The more we face these challenges directly examine them critically analyze them thoroughly and debate them enthusiastically the more knowledge will be gained and hopefully more lives will be saved

### **Geology and Health**

H. Catherine W. Skinner,Antony R. Berger,2003-03-20 Geology and Health is an integration of papers from geo bio chemical scientists on health issues of concern to humankind worldwide demonstrating how the health and well being of populations now and in the future can benefit through coordinated scientific efforts International examples on dusts coal arsenic fluorine lead mercury and water borne chemicals that lead to health effects are documented and explored They were selected to illustrate how hazards and potential hazards may be from natural materials and processes and how anthropomorphic changes may have contributed to disease and debilitation instead of solutions Introductory essays by the editors highlight some of the progress toward scientific integration that could be applied to other geographic sites and research efforts A global purview and integration of earth and health sciences expertise could benefit the future of populations from many countries Effective solutions to combat present and future hazards will arise when the full scope of human interactions with the total environment is appreciated by the wide range of people in positions to make important and probably expensive decisions A case to illustrate the point of necessary crossover between Geology and Health was the drilling of shallow tube wells in Bangladesh to provide non contaminated ground water This good solution unfortunately mobilized arsenic from rocks into the aquifer and created an unforeseen or silent hazard arsenic Geologists produce maps of earth materials and are concerned with natural processes in the environment with long time frame horizons The health effects encountered through changing the water source might have been avoided if the hydrological characteristics of the Bangladesh delta had been known and any chemical hazards had been investigated and documented A recurrence of this type of oversight should be avoidable when responsible parties often government officials appreciate the necessity of such integrated efforts The book extols the virtues of cooperation between the earth life and health sciences as the most practical approach to better public

health worldwide      **Kenya's Running Women** Michelle M Sikes,2023-12-01 Since Pauline Konga's breakthrough performance at the 1996 summer Olympics in Atlanta the world has become accustomed to seeing Kenyan women medal at major championships sweep marathons and set world records Yet little is known about the pioneer generation of women who paved the way for Kenya's reputation as an international powerhouse in women's track and field In *Kenya's Running Women* A History historian and former professional runner Michelle M Sikes details the triumphs and many challenges these women faced from the advent of Kenya's athletics program in the colonial era through the professionalization of running in the 1980s and 1990s Sikes reveals how over time running became a vehicle for Kenyan women to expand the boundaries of acceptable female behavior *Kenya's Running Women* demonstrates the necessity of including women in histories of African sport and of incorporating sport into studies of African gender and nation building      **Annual Report** Rockefeller Foundation,2003

*Advances in Phytochemistry, Textile and Renewable Energy Research for Industrial Growth* Charles Nzila,Nyamwala Oluoch,Ambrose Kiprop,Rose Ramkat,Isaac Kosgey,2022-04-06 The International Conference on Phytochemistry Textile Renewable Energy Technologies for Sustainable Development ICPTRE 2020 was hosted by the World Bank funded Africa Centre of Excellence in Phytochemicals Textile and Renewable Energy ACEII PTRE based at Moi University in conjunction with Donghua University China and the Sino Africa International Symposium on Textiles and Apparel SAISTA The theme of the conference was Advancing Science Technology and Innovation for Industrial Growth The research relationships between universities and industry have enabled the two entities to flourish and in the past have been credited for accelerated sustainable development and uplifting of millions out poverty ICPTRE 2020 therefore provided a platform for academic researchers drawn from across the world to meet key industry professionals and actively share knowledge while advancing the role of research in industrial development particularly in the developing nations The conference also provided exhibitors with an opportunity to interact with professionals and showcase their business products technologies and equipment During the course of the conference industrial exhibitions research papers and presentations in the fields of phytochemistry textiles renewable energy industry science technology innovations and much more were presented      **Lake Naivasha, Kenya**

David M. Harper,R. Boar,Mark Everard,P. Hickley,2003-05-31 This is the first comprehensive study of an East African lake for thirty years It represents the culmination of research expeditions which stretch back twenty years and is thus able to pick up long term changes which the individual research activities do not reveal Lake Naivasha is a tropical lake whose natural fluctuations are now dwarfed by human impacts Papers show how the irrigation for horticulture and power cooling has reduced the lake depth significantly exotic arrivals have altered the plant community beyond recognition and its commercial value as a fishery and a tourist feature are reduced by over use Despite this the lake has considerable conservation value at present It provides a different case study in the ever growing library of the effects of human follies Lake Naivasha has achieved global importance in the past ten years because its waters are used to sustain the largest horticultural industry in

Africa The book highlights its fragility under such pressure and points out the way towards sustainable use of the water and the ecosystem *International Journal of Applied Sciences: Current and Future Research Trends (IJASCFRT)* ,2021-12-31

*Kenya Engineer* ,2005 *The Transnationally Partnered University* P. Koehn,M. Obamba,2014-12-04 Analyzing the growing importance of the transnational higher education landscape and the role of African universities Koehn and Obamba show how transnational partnerships among universities can inform policy strengthen synergies between knowledge producers and knowledge users and advance sustainable development practice **Interactive Feedbacks between Soil**

**Fauna and Soil Processes** Maria Luz Cayuela,Julia Clause,Jan Frouz,Philippe C. Baveye,2020-03-30 Soil fauna plays a significant role at all trophic levels of the soil food web and regulates processes that are crucial for soil functioning such as nutrient cycling immobilization and or degradation of toxic compounds formation of soil structure greenhouse gas emissions and C turnover Although soil fauna is not thought to contribute significantly to soil respiration during litter or soil organic matter SOM decomposition the diversity of soil fauna has been found to strongly influence SOM distribution and dynamics Yet the functional contribution of soil fauna to many soil processes is not well understood due to methodological limitations and the high complexity of interactions at various spatiotemporal scales In general soil fauna has received far less scientific attention than bacteria and fungi and lately archaea in soil studies and has been regularly ignored in global biogeochemical models with maybe exceptions for some earthworms However recent studies are raising the awareness of the influence of soil fauna on ecosystems dynamics For instance earthworms have been found to be major players in N<sub>2</sub>O emissions from soils They exert a strong influence on C stabilization and they promote the degradation of polycyclic aromatic hydrocarbons PAHs Less studied ants and termites have been found to increase crop productivity in drylands and different lifeforms of Collembola have been shown to impact microorganisms in various ways over time thereby potentially affecting C and N cycles within farming systems The influence of soil fauna indeed manifests over a broad ranges of spatiotemporal scales For example some effect such as aggregate formation may cumulate over time and finally contribute to the formation of whole soil profiles which serve as a framework for other soil processes such as water movement decomposition etc Meanwhile soil biodiversity is impacted by an increasing human pressure through deforestation agriculture intensification habitat fragmentation or climate change increasing temperatures extreme weather events which leads to soil biodiversity loss in particular of soil fauna with associated consequences on soil functioning and resilience **Narrating the Self and Nation**

**in Kenyan Autobiographical Writings** Samuel Ndogo,2016 Author Samuel Ndogo offers an understanding of the autobiographical genre in contemporary Kenyan literature He draws attention to life writing as a form of cultural re imagination in post colonial Africa Taking into consideration contradictions and paradoxes of referentiality in life writing this book examines the autobiographies of Jaramogi Oginga Odinga Ngugi wa Thiong o Wangari Maathai and Bethwell Ogot The analysis dwells on self representations in correlation with imaginations of the Kenyan nation in these works Thus the study

gives a critical account into the modern memoir the forms and styles it takes the ways in which these authors tend to understand and present their lives Series Contributions to African Research Beitr ge zur Afrikaforschung Vol 63 Subject African Studies Literary Criticism      **Kenya National Assembly Official Record (Hansard)** ,1999-07-14 The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya      **Kenya National Assembly Official Record (Hansard)** ,1999-07-14 The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya
