Once upon a time, there was a fish named Nemo.

He lives with his dad Marlin in the ocean. Marlin **worries about** Nemo a lot.

Marlin tries to find the boat. He **meets** Dory, who has memory problems.

They escape from the sharks and find a map. The map has an address written on it.

Marley and Dory **ask for** directions from a group of fish. They tell them to go to the EAC (East Australian Current).

One day, Nemo is playing with his friends and decides to touch a boat. This is a bad idea, because a diver traps Nemo in his **net**.

Dory and Marlin go to a shark meeting, and the sharks **almost** eat them.

On the way to the EAC, Dory and Marlin are **stung** by jellyfish and are knocked out.

Rediscovering the Spirit of Education After Scientific Management Jim Neyland,2010-01-01 Education is being eroded Otherwise put education is more and more being brought under the yoke of a mode of thought that reduces it to something mechanical narrowly characterized by codes predefined outcomes protocols and rules The cause it is argued is the growing dominance of a new fashion in education called scientific management Scientific management has become the new and unquestionable orthodoxy in education As a consequence it has become increasingly difficult to imagine let alone articulate an alternative This book explores the origins and fundamental assumptions of scientific management and suggests how the spirit of education might be rediscovered by turning instead to a more ethical socially interpersonal and full bodied orientation The approach taken avoids the difficulties usually associated with such ethically oriented treatments of education by drawing on recent findings in neurophysiology psychology primate and language studies The book is a Reader and is designed to both supplement and invigorate undergraduate and postgraduate courses in education and to appeal to general readers who have an interest in education
