

## INTRODUCTION TO FINE ARTS DEPTH OF KNOWLEDGE MANUAL

One of the requirements of *No Child Left Behind* is that states develop high quality standards and rigorous tests to assess those standards. Officials at the Missouri Department of Elementary and Secondary Education chose to use an alignment method developed by Norman Webb called *Depth of Knowledge (DOK)* to determine whether or not our standards are being accurately and rigorously assessed by the MAP and End-Of-Course exams. Items on these tests are used to measure student mastery of the Grade Level Expectations (GLEs) in each assessed content area. Thus, each GLE can be assigned a DOK level, which defines the level of complexity necessary to adequately demonstrate the knowledge or skill described in the GLE.

The Depth of Knowledge indicators are broken down into four levels. All of these levels define stratified categories of cognitive processing – in other words, how students think.

- At DOK 1, students are able to give rote responses to questions because they have memorized the answer. For example, listing the birth and death dates of composers or choreographers or identifying famous works of art simply entails drawing upon known information. This level is summarized as **RECALL**.
- At DOK 2, students most often compare and contrast information, categorize items, make connections, and demonstrate conceptual knowledge. This level is summarized as **CONCEPT or SKILL**.
- At DOK 3, students begin to make decisions about ways to solve problems. No longer is a rote response satisfactory. Students should come up with creative solutions that draw upon previous knowledge and require application of learning in a new context. This level is summarized as **STRATEGIC THINKING**.
- At DOK 4, students analyze the results of experiments, draw upon multiple sources to formulate creative solutions, and investigate unique and challenging problems that require complex understanding. This level is summarized as **EXTENDED THINKING**.

It was not Webb's intent to assess the level of skill development that is so critical to arts learning. In fact, Webb categorizes any skill as DOK 2, irrespective of the difficulty of the task. Much of what students of the arts do can be adequately addressed by DOK. For example, when students write a research paper on art history or on the life of a composer the level of complexity can be easily ascertained. However, applying DOK levels becomes tricky when a student is performing a complex dance, singing an intricate solo, performing and integrating the multiple facets of acting, or creating original artwork. These types of performance events are at the core of arts learning, and any reduction in opportunities to engage in these critical activities diminishes the value of the arts for student learning.
