Duetting and Turn-Taking Patterns of Singing Mammals: From Genes to Vocal Plasticity, and Beyond Patrice Adret, Dena Jane Clink, Charles T. Snowdon, Sofya Dolotovskaya, 2023-10-23 Mammalian vocal duets and turn taking exchanges long coordinated acoustic signals exchanged between two individuals are primarily found in family living pair bonded mammals with a socially monogamous lifestyle some rodents some lemurs tarsiers titi monkeys a Mentawai langur gibbons and siamangs Duetting and turn taking patterns combine visual chemical tactile and auditory cues to produce some of the most exuberant displays in the realm of animal communication How and why such phenotypes evolved independently across main lineages are fundamental questions at the core of the nature nurture debate Duetting styles ranging from antiphonal non overlapping to simultaneous overlapping emissions have now been documented in various taxa some of which are quite reminiscent of turn taking rules in human conversation Nonetheless much remains to be learned about this complex motor skill and at all four levels of analysis namely 1 developmental processes 2 causal mechanisms 3 functional properties and 4 evolutionary history Given the strong link between this form of coordinated singing and pair bonding gaining a deeper understanding of this kind of cooperative behavior will likely shed more light on the deep evolutionary roots of human culture language and music

Bond, Joanna Trylska, Peter Guy Wolynes, 2022-01-11 [Globalization, Mass Education and Technical and Vocational Education and Training](#) Miriam Preckler Galguera, 2018-06-05 This book assesses the influence of the international organization UNESCO on the development of national Technical and Vocational Education and Training TVET systems in the Southern African Community Region SADC focusing particularly on Botswana and Namibia Designed around UNESCO's Better Education for Africa's Rise BEAR project the study is an excellent example of applied policy research Analysis is from the perspective of key stakeholders including UNESCO headquarters and field offices Ministries of Education and of Labor employers and employees education and training institutions international partners and more Both qualitative and quantitative evidence are used to provide a comparative overview and the author also reveals the current state of data on skills Readers will discover common goals and challenges across the nations but also a common lack of action to measure the impact and influence that UNESCO's programs have had at a national level prior to this study Were the newly implemented educational policies successful or not If the public policies failed why was that These chapters shed light on such questions and how UNESCO's contribution influenced the national development processes in the context of globalization processes and trends of global mass education The book has much to offer for both scholars and those working in UN agencies or national governments who seek to develop education systems and better link them to the world of work

Turn-taking in human communicative interaction Judith Holler, Robin H. Kendrick, Marisa Casillas, 2016-05-09 The core use of language is in face to face conversation This is characterized by rapid turn taking This turn taking poses a

number central puzzles for the psychology of language Consider for example that in large corpora the gap between turns is on the order of 100 to 300 ms but the latencies involved in language production require minimally between 600 ms for a single word or 1500 ms for as simple sentence This implies that participants in conversation are predicting the ends of the incoming turn and preparing in advance But how is this done What aspects of this prediction are done when What happens when the prediction is wrong What stops participants coming in too early If the system is running on prediction why is there consistently a mode of 100 to 300 ms in response time The timing puzzle raises further puzzles it seems that comprehension must run parallel with the preparation for production but it has been presumed that there are strict cognitive limitations on more than one central process running at a time How is this bottleneck overcome Far from being easy as some psychologists have suggested conversation may be one of the most demanding cognitive tasks in our everyday lives Further questions naturally arise how do children learn to master this demanding task and what is the developmental trajectory in this domain Research shows that aspects of turn taking such as its timing are remarkably stable across languages and cultures but the word order of languages varies enormously How then does prediction of the incoming turn work when the verb often the informational nugget in a clause is at the end Conversely how can production work fast enough in languages that have the verb at the beginning thereby requiring early planning of the whole clause What happens when one changes modality as in sign languages with the loss of channel constraints is turn taking much freer And what about face to face communication amongst hearing individuals do gestures gaze and other body behaviors facilitate turn taking One can also ask the phylogenetic question how did such a system evolve There seem to be parallels analogies in duetting bird species and in a variety of monkey species but there is little evidence of anything like this among the great apes All this constitutes a neglected set of problems at the heart of the psychology of language and of the language sciences This Research Topic contributes to advancing our understanding of these problems by summarizing recent work from psycholinguists developmental psychologists students of dialog and conversation analysis linguists phoneticians and comparative ethologists

Seed Dormancy, Germination and Pre-Harvest Sprouting Chengdao Li,Hiro Nonogaki,Jose Barrero,2019-03-28 Pre harvest sprouting PHS and late maturity alpha amylase LMA are two of the biggest grain quality defects that grain growers encounter About 50 percent of the global wheat crop is affected by pre harvest sprouting to various degrees Pre harvest sprouting is a genetically based quality defect and results in the presence of alpha amylase in otherwise sound mature grain It can range from perhaps undetectable to severe damage on grain and is measured by the falling numbers or alpha amylase activity This is an international issue with sprouting damage lowering the value of crops to growers seed and grain merchants millers maltsters bakers other processors and ultimately the consumer As such it has attracted attention from researchers in many biological and non biological disciplines The 13th International Symposium on Pre Harvest Sprouting in Cereals was held 18 20 September 2016 in Perth to discuss current findings of grain physiology genetic pathways trait

expression and screening methods related to pre harvest sprouting and LMA This event followed the previous symposium in 2012 in Canada

Sulphur emissions by ships Great Britain: Parliament: House of Commons: Transport Committee,2012-03-09 Sulphur emissions from shipping are increasing and shipping is expected to be the main source of EU sulphur emissions by 2020 A draft EU directive aims to curb sulphur emissions from ships The Transport Committee agrees that this significant source of air pollution needs more stringent limits but the UK government must negotiate to ensure the EU Directive goes no further than the revised MARPOL Annex VI agreed in 2008 The Committee recognises that the benefits of the revised MARPOL Annex VI significantly exceed the costs of compliance acknowledges that costs will fall most directly on ship operators and accepts that the abatement technology required for passenger shipping may not yet be ready for widespread commercial use The report also reminds the shipping sector that tighter emissions limits have been under discussion for many years operators could have been more proactive about developing effective pollution abatement technology and must shoulder the cost of ensuring that their activities comply with relevant environmental legislation In addition the Committee concludes that the UK Government must establish how the Commission will monitor the impact of the revised Directive on maritime sulphur emissions from the shipping industry establish what the Commission plans to do in order to curb the risk of modal shift from sea to road transport push the Commission to clarify the definition of passenger ships on regular service and the use of techniques such as emissions averaging

Environmental Impact Statement: Chapters 1 through 9 United States. Department of the Air Force, 2000. *Research Handbook on Employee Turnover* George Saridakis, Sir Cary Cooper, 2016-04-29. Covering the period of the financial crisis, this Research Handbook discusses the degree of importance of different driving forces on employee turnover. The discussions contribute to policy agendas on productivity, firm performance and economic growth. The contributors provide a selection of theoretical and empirical research papers that deal with aspects of employee turnover as well as its effects on workers and firms within the current socio-economic environment. It draws on theories and evidence from economics, management, social sciences and other related disciplines. With its interdisciplinary approach, this book will appeal to a variety of students and academics in related fields. It will also be of interest to policy makers, HR experts, firm managers and other stakeholders.

Integrating Computational and Neural Findings in Visual Object Perception Judith C. Peters, Hans P. Op de Beeck, Rainer Goebel, 2016-06-29. The articles in this Research Topic provide a state-of-the-art overview of the current progress in integrating computational and empirical research on visual object recognition. Developments in this exciting multidisciplinary field have recently gained momentum. High performance computing enabled breakthroughs in computer vision and computational neuroscience. In parallel, innovative machine learning applications have recently become available for datamining the large-scale, high-resolution brain data acquired with ultra-high field fMRI and dense multi-unit recordings. Finally, new techniques to integrate such rich simulated and empirical datasets for direct model testing could aid the development of a comprehensive brain model. We hope that this Research Topic contributes to these encouraging advances.
