individual national patterns of online distribution engaging with archives SVODS and torrent communities The essays also investigate the cross cultural presence of world cinema in non domestic online markets such as Europe s for example As a result the volume sheds light on geo politically specific issues of film circulation consumption and preservation within a range of culturally diverse filmmaking contexts including case studies from India Nigeria Mexico and China In this way the collection maps the impact of different online formats of distribution in the understanding of World Cinema underlining the links between distribution and media provisions as well as engaging with new forms of intermediation

Mendel in the Kitchen Nancy Marie Brown, Nina V. Fedoroff, 2004-09-30 While European restaurants race to footnote menus reassuring concerned gourmands that no genetically modified ingredients were used in the preparation of their food starving populations around the world eagerly await the next harvest of scientifically improved crops Mendel in the Kitchen provides a clear and balanced picture of this tangled tricky and very timely topic Any farmer you talk to could tell you that we ve been playing with the genetic makeup of our food for millennia carefully coaxing nature to do our bidding The practice officially dates back to Gregor Mendel who was not a renowned scientist but a 19th century Augustinian monk Mendel spent many hours toiling in his garden testing and cultivating more than 28 000 pea plants selectively determining very specific characteristics of the peas that were produced ultimately giving birth to the idea of heredity and the now very common practice of artificially modifying our food But as science takes the helm steering common field practices into the laboratory the world is now keenly aware of how adept we have become at tinkering with nature which in turn has produced a variety of questions Are genetically modified foods really safe Will the foods ultimately make us sick perhaps in ways we can t even imagine Isn t it genuinely dangerous to change the nature of nature itself Nina Fedoroff a leading geneticist and recognized expert in biotechnology answers these questions and more Addressing the fear and mistrust that is rapidly spreading Federoff and her co author science writer Nancy Brown weave a narrative rich in history technology and science to dispel myths and misunderstandings In the end Fedoroff argues plant biotechnology can help us to become better stewards of the earth while permitting us to feed ourselves and generations of children to come Indeed this new approach to agriculture holds the promise of being the most environmentally conservative way to increase our food supply
