African Americans And HIV/AIDS Understanding And Addressing The Epidemic:

Understanding the HIV/AIDS Epidemic in the United States Eric R. Wright, Neal Carnes, 2016-07-30 This book examines the HIV AIDS epidemic in the United States using the concept of syndemics to contextualize the risk of both well known and a few lesser known subpopulations that experience disproportionately high rates of HIV and or AIDS within the United States Since discovery HIV AIDS has exposed a number of social psychological and biological aspects of disease transmission The concept of syndemics or synergistically interacting epidemics has emerged as a powerful framework for understanding both the epidemiological patterns and the myriad of problems associated with HIV AIDS around the world and within the United States The book considers the disparities in HIV AIDS in relation to social aspects risk behavior and critical illness comorbidities It updates and enhances our understanding of the HIV AIDS epidemic in the United States and contributes to the expanding literature on the role of syndemics in shaping the public s health **African Americans and HIV/AIDS**

Hall, Brian John Hall, Clay J. Cockerell, 2011 The science of the virus and its effects and the clinical approaches to its treatment and transmission prevention are placed in the context of the history and epidemiology of the HIV AIDS pandemic Each organ system of the body is explored as to manifestations of the disease treatment now and in the future as well as what the disease has taught us about the immune response The science of epidemiology which is so important in allowing for tracking of the disease and potential limitation of transmission is another aspect of AIDS explored in detail The pandemic manifests differently in different parts of the world and the relevance of the volume is enhanced by its international group of

contributors No other text provides the historical and epidemiological context of this disease along with an update of diagnosis and treatment The underlying science and epidemiology of AIDS are not neglected so the student or clinician who is treating patients with AIDS can gain a full understanding of HIV AIDS in individual patients and in their communities

Strategies for Awareness & Prevention of Hiv/Aids Among African-Americans Dr. Rakesh K. Mehta, 2012-06-25
This handbook has been developed to support health educators community workers teachers and parents in their efforts to protect the African American people from the scourge of HIV AIDS The primary target of the hand book are teenagers youth and other African American persons who are the less fortunate components of our society because it is this population that is most susceptible to this scourge However suggestions included here in apply virtually to all populations especially culturally different people such as Hispanic etc Prevention of HIV AIDS among adults helps to maintain an enlightened parent population prevents AIDS transmitted from the older to the younger generation as in some communities the elder people are involved in sexual relationships with young adolescents The authors commend organizations and individuals such as Bill and Melinda Gates Honble U S President Barack Obama and former US president they funded billions of dollars to offer treatment of HIV AIDS infected people and for education of people most susceptible to HIV infection This hand book titled Strategies for Awareness and its Prevention of HIV AIDS Among African American Mehta and Kalra compliments these efforts with the hope that its contents when followed may reduce the spending required to arrest the HIV AIDS cases and make the funds available for educational projects that impact lifestyle so that spread is stopped and menace of HIV AIDS epidemic among African American is reversed Some of the suggestions have been adapted from Prof Kalra and Prof Sutman book titled WORLD PERSPECTIVE ON HIV AIDS for the less fortunate with their due permission *Poverty in the United States* Ann O'Leary, Paula M. Frew, 2016-12-19 This important text explores the deep relationships between poverty health mental health conditions and widespread social problems as they affect the lives of low income women A robust source of both empirical findings and first person descriptions by poor women of their living conditions it exposes cyclical patterns of structural and environmental stressors contributing to impaired physical and mental health Psychological conditions notably depression and PTSD substance use and abuse domestic and gun related violence relationship instability and hunger in low income communities especially among women of color are discussed in detail In terms of solutions the book's contributors identify areas for major policy reform and make potent recommendations for community outreach wide scale intervention and sustained advocacy Among the topics covered The intersection of women's health and poverty Poverty personal experiences of violence and mental health The role of social support for women living in poverty The logic of exchange sex among women living in poverty Physical safety and neighborhood issues Exploring the complex intersections between housing environments and health behaviors among women living in poverty A stark reminder that health should be considered a basic human right Poverty in the United States Women's Voices is a necessary reference for research professionals particularly interested in women's studies HIV AIDS prevention poverty and social policy **Critical Care**

Geraldine Fela, 2024-07-01 HIV and AIDS devastated communities across Australia in the 1980s and 1990s. In the midst of this profound health crisis, nurses provided crucial care to those living with and dying from the virus. They negotiated homophobia and complex family dynamics as well as defending the rights of their patients. Bringing together stories from across the country, historian Geraldine Fela documents the extraordinary care, compassion, and solidarity shown by HIV and AIDS nurses. *Critical Care* unearths the important and unexamined history of nurses and nursing unions as caregivers and political agents who helped shape Australia's response to HIV and AIDS. Drawing on the frontline experience of nurses, Fela has written an insightful and moving history of the tragedy and triumphs of Australia's response to the AIDS epidemic. Dennis Altman, Vice-Chancellor's Fellow, La Trobe University. *Critical Care* shows how Australia's AIDS crisis aroused fear, hatred, and homophobia and yet forged new bonds of care, community, and love. This beautifully told story of the nursing profession's response to acute suffering and great tragedy, borne predominantly by gay men, is among the most moving Australian histories I have read. It will be essential for anyone interested in health, the professions, gender, sexuality, and the shifting emotional landscape of the nation. Frank Bongiorno, Professor of History, Australian National University. This outstanding book chronicles the role of nurses in addressing the AIDS pandemic after the arrival of HIV. The old approach to epidemics was strict control and isolation. But something new was required by the nature of this unexpected crisis. Fortunately, in Australasia, healthcare professionals and lawmakers rose to the occasion. The special challenge of coping with patients needing care often when they were profoundly sick and dying, where no vaccine was available and no drugs were effective at first, to turn the tide put huge pressure on nurses on the front line. They helped lead our community to address the AIDS paradox. This book tells a heroic story. I honour the author and those whose work she describes so that their lessons will not be forgotten. The Hon Michael Kirby, Past Justice of The High Court of Australia and Patron of The Kirby Institute. As well as being a pleasure to read, this book shines new light on previously hidden stories in the Australian HIV response: that of nurses, trade unions, and First Nations people. Fela's insightful narrative brings to life the unique and vital role played by nurses who provided care in environments that were too often marked by intense fear and shame. Jennifer Power, Associate Professor and Principal Research Fellow, La Trobe University. In this insightful book, Geraldine Fela revisits the Australian response to the HIV/AIDS epidemic and unearths the important and untold contribution of nurses. Nurses were on the frontlines of care during the epidemic, and Fela beautifully brings forth their experiences, perspectives, and voices. In her attention to labour history, gender, and the impact of colonisation, Fela highlights less-told stories of the epidemic that help us re-evaluate the Australian response to HIV/AIDS. This is an important and often moving book. Robert Reynolds, Professor of Modern History, Macquarie University. In the worst years of the AIDS crisis, nurses were the frontline of healthcare. Geraldine Fela's compelling myth-busting book shows how Australian nurses challenged stigma and transformed healthcare relationships and practices. Fela illuminates different healthcare approaches across states and between city and country and how nurses ensured effective

responses to HIV in Indigenous communities Alistair Thomson President Oral History Australia and Emeritus Professor in History Monash University In this marvellous book Geraldine Fela reveals the day to day work of nurses and their unions in responding to the HIV AIDS crisis in Australia Through interviews and archival research she shows how in caring educating advocating they saved lives eased suffering and reshaped our medical system from the ground up Graham Willett Historian Archivist Publisher This book honours those who bathed the sweat from the exhausted brows of sufferers who cared for people abandoned by their families and the community who stood up for those who could no longer stand up for themselves Bravo bravo bravo Caroline Overington The Australian Critical Care is an optimistic and galvanising read that celebrates the power of activism Jinghua Qian ABC ARTS *AIDS, Sexuality, and the Black Church* Angelique C. Ragsdale - Hearn, 2012-09 I wrote this dissertation for the School of Advanced Studies at University of Phoenix Arizona in 2011 To do the research for the dissertation I spent quite a bit of time at the Center of Disease Control and Prevention archives as a graduate student I also interviewed medical doctors and others who knew about the subject matter Since I wrote this dissertation there has been more research published that I will continue to research and add to my archival collection The issues of this dissertation were discussed as the emergent theoretical model and its components which included implications of research practice stigma burden advocacy and awareness Leadership education and community resources were the dominant themes that emerged in the study The study findings imply an increased need for leaders to present public awareness about the affects HIV AIDS has on the African American community Future research should consider the explicit nature of the answers which benefited the study The information would be helpful while improving the quality of life

available for African American women and would enable leaders to interact with a leadership perspective USAID 2009
